We would be happy to advise you:

Application

Spray extraction cleaners

- Depending on the degree of contamination, fill the fresh water tank with 25 - 50 ml of detergent to 1 l of fresh water (< 50 °C) (dosing aid: 1 cap corresponds to approx. 20 ml). Use more for a larger tank. Then spray and vacuum simultaneously. Do not rinse. If dirt is heavy, prespray and leave to work for 5 minutes, then vacuum off.
- Vacuum again after cleaning absorbent textiles (wool).

stain removal

- Use product undiluted.
- Dab stain from the outside in.
