

RIDE-ON SWEEPER

KM 125/130 R

The Kärcher KM 125/130 with its highly effective, patented and fully automatic filter cleaning system, unique sweeping crescent side brush - which makes sweeping in corners even easier - and automatic wear adjustment of the main brush. Also featuring a new sweeping concept, where the main brush is fitted between the rear wheels, protecting the sweeping system fully when driving over obstacles.

Technical Specification

Ride-on sweeper	KM 125/130
Working width (mm):	1,250 - 1,700
Waste container capacity (l):	130
Max area performance (m ² /h):	10,000
Speed (km/h):	8

Highly effective automatic filter cleaning system

- For continuous dust-free operation. The automatic filter cleaning system constantly keeps the high quality nano-coated polyester filter clean.

Protected main brush

- The main brush is now fitted between the rear wheels of the machine. This keeps it fully protected whilst driving over obstacles and allows for easy checking or changing of the brush.

Kärcher Intelligent Key (KIK)

- The Kärcher Intelligent Key system, allows each operator to have their own customisable key, making machine operation significantly easier. Settings such as machine speed and brush pressure can be locked, allowing the operator to focus on cleaning.

Innovative crescent sweeping brush

- Clever crescent sweeping brush banishes multiples manoeuvres, cleaning into corners in a single pass. Delivers big productivity savings over time.

KÄRCHER

makes a difference

Sweeper Accessories

Maximising the potential of your Kärcher machine

Kärcher Fleet

Kärcher Fleet gives managers the opportunity to continually optimise their fleet. Used to monitor if the machines are being used according to plan and to inform managers in a timely manner in cases of violations of use or important machine conditions to pursue preventative management.

Different Wheels For All Applications

Various grades and compositions of wheels and tyres are available. Puncture-proof tyres for sweeping in areas with metal shavings, glass or other heavily contaminated areas. Or non-marking rubber tyres for use on sensitive floors.

Safety Kits

From protective roofs, weather proof cabs, rotating beacons to working lights. A large number of safety kits are available to ensure machine can be safely used in any environment.

Various Power Options

A host of power options are available, so that you can completely tailor the machine to your cleaning requirements. Proven and reliable petrol and diesel engines or even versatile battery and LPG options for use indoors.

Different Brush Grades

Brush grades to meet all cleaning conditions. From soft, natural brushes for fine dust or smooth delicate floors. To water-resistant, extremely durable universal brushes for all surfaces.

Manual Cleaning Kits

With practical on-board storage for a dust pan and brush, litter picker can all be safely and securely stored on the machine.

Automatic Filter Cleaning

Highly effective, fully automatic filter cleaning for continuous dust-free operation.

Clean Carpets Safely and Efficiently

Carpet cleaning kits for sweeping large carpeted areas.

Working and road lights

With a host of add-on kits that improve working visibility or even allow the machine to be used on public roads.

Additional Sweeping Brushes and Crescent Brushes

Improve the productivity of your sweeper even more with the addition of a 3rd side broom. This will allow your sweeper to cover larger areas, faster. For time and cost saving.

Suction Kits

Suction kits allow access to those hard to reach areas. Under racking or at high levels, it makes your sweeper even more versatile.

Water Spraying System For Dust Suppression Kit

For areas with heavily contaminated, fine dust. The water spraying system wets the fine dust, preventing dust clouds from forming.

Other machines in the range

Heavy Duty Industrial Sweeper

Municipal Sweeper

250 Litre Ride-On Scrubber Drier

Super Class Pressure Washer

Industrial Vacuum Cleaner

Specialist Ice Blaster
