

BECAUSE EVERYTHING IS CONNECTED.

The shortest route between two points is a straight line. And the shortest route between all points is a network. For you, Kärcher Fleet is your network as far as cleaning tasks go. Everything is connected with everything else: machines, facilities, services, use planning, reporting – the whole infrastructure of your cleaning fleet. How often have you taken a different path than the correct one? Recognising and taking this path will play a fundamental role in determining success in the future.

The Kärcher System represents a decisive step towards a networked future. We are convinced that we are giving you the best instrument for the transition from current working practices to the digitalisation of cleaning technology.

The basic functions of Kärcher Fleet can be used for free with almost every Kärcher scrubber drier. Whether you do this is up to you.

The possibilities and benefits will inspire you:

- Optimised schedule and efficiency review
- Late work start notification – directly on your smartphone
- Continuous monitoring of machine status
- Alarms in the event a machine fails
- Evaluation of machine running times
- Quick or automatic service requests (if activated)
- Theft protection with geofencing
- Optimisation of fleet, costs and quality

KÄRCHER

makes a difference

THE FUTURE IS CONNECTED.

Kärcher scrubber driers above the B40 range are now fitted with a telematic control unit (TCU) in the factory. Older Kärcher and third-party products can be retro-fitted without any hassle.

We are ready – come with us.

The TCU records defined machine data as well as further data and transfers those about the mobile data connection to a cloud server. As a participant you then have the opportunity to access your prepared data worldwide via a web portal. Future machines are assigned

directly to your account – and you do not have to worry about a thing. Get started now into the age of digital cleaning. You can get your first taster from your sales adviser who will also give you an overview of all the advantages and opportunities that Kärcher Fleet offers.

KÄRCHER FLEET

Your entry into digital cleaning

PROFESSIONAL

The TCU is fitted in factory for the following cleaning machines:
B40, B60, B80, B95 RS, B120, B150

M/Pl. - 03/2016 - Order no. 0025-354.0 - Printed in Germany on chlorine-free bleached paper - Rights to technical modifications reserved.

DIGITAL. ANONYMOUS. SECURE.

Your data belongs to you, and you alone. That is why we contracted two partners who are able to fulfil all requirements in terms of digitalisation, anonymity and data protection sustainably and at the highest level for setting up and maintaining Kärcher Fleet's IT infrastructure.

Vodafone is a system partner for SIM cards and data merging. Amazon Web Services (AWS) is the leading supplier of cloud infrastructure worldwide. All application and database servers for Fleet are operated there. The data centre is located in Ireland and is subject to European data protection law.

Only you have access to your data stored there. Third parties are prevented from accessing customers' data using the most up-to-date technical and organisational measures. Any communication between components which does not occur exclusively within the Fleet network is encrypted.

The entire Fleet software landscape is checked regularly with security audits carried out by external specialists. Kärcher neither monitors nor analyses data for marketing purposes or other company-internal stats. Personal data is not collected, while technical machine data is only used in an anonymised way. Kärcher operates a service portal where customers' machines can be maintained on request.

For questions relating to data protection, please consult your sales adviser directly, who will put you in touch with in-house experts.

The B 40, B 60, B 80, B 95RS, B 120 and B 150 scrubber driers are fitted with a TCU in factory. Other Kärcher and third-party cleaning appliances can be retrofitted to meet the standard Fleet requirements. You can choose between the free service, Freemium, or upgrade to Premium, which features extended functionality.

	Freemium	Premium
Overview list of all machines	Full	Full
Machine status	Full	Full
Service alarm	Full	Full
Managing machine costs	Full	Full
Location (Frequency with which data is updated)	Limited	Full
Battery status (Frequency with which data is updated)	Limited	Full
Reports (Frequency with which data is updated)	Limited	Full

Freemium:* The basic service alone offers you many benefits. You see a neatly arranged list of your machines, giving you a clear overview at all times of their status as well as machine costs. Service features can be requested easily directly from the system. Freemium is free for you, and it will remain this way. In Freemium, you can test special limited versions of Premium functions. You can upgrade to Premium at any time, but are not obliged to do so. You can request the update directly from Kärcher Fleet or from your sales adviser.

Premium:* The upgrade to Premium offers you unlimited use of automatic reports, for example on machine workload, operating life and diverse functions relating to location, use times and the current status of the machine. Your sales adviser will be happy to answer any questions you may have on the many useful functions Premium has to offer.

*Freemium is not available in certain countries in favour of a special Premium offer. Your sales adviser can provide you with more information.
