

GLEAMING WINDOWS.

Quick and easy like never before

The latest generation of battery-powered Window Vacs from Kärcher ensures streak-free, clean windows and also saves considerable time and effort. The handy devices suck the water easily and reliably from the window after cleaning – without leaving dirty drips or streaks behind.

Compared to conventional methods, cleaning is noticeably easier and three times faster. The convenient battery operation and more compact design of the new generation guarantees maximum flexibility when cleaning all smooth household surfaces. Try it out and see for yourself!

Attractive features

The WV 2 Plus and WV 5 Plus battery-powered Window Vac kits offer an attractive complete package consisting of battery-powered Window Vac, spray bottle with microfibre wiping cloth and a powerful window cleaner concentrate, allowing you to start cleaning right away!

The new generation of battery-powered Window Vacs and their advantages

- More compact, handier and lighter**
 The new Window Vacs are smaller and lighter than the previous line. Thanks to the more compact design and thereby easier handling, the bottom edges of windows are now easier to clean.
- Longer battery running time**
 The new devices can clean a larger area on one battery charge than the previous line.
- Pleasantly quiet**
 The Window Vac's low noise level makes cleaning even more pleasant.

ADDITIONAL FEATURES OF THE WV 5.

Soft grip handle

The rubber coating on the handle makes the device even more comfortable to use.

Battery level indicator
 Three LEDs above the on/off switch show the current battery charging state.

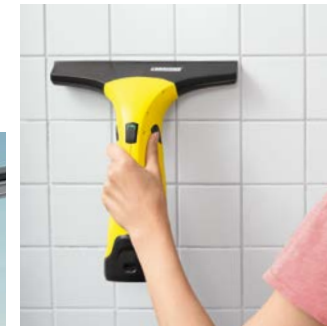

Convenient edge cleaning
 The adjustable spacer allows perfect, streak-free cleaning results right up to the edges.

Removable battery
 The removable battery and optional exchangeable battery allow non-stop window cleaning, without the need to charge the battery in-between.

IDEAL FOR ALL SMOOTH SURFACES.
