

makes a difference

FOR BUSINESSES THAT SHINE.

Cleaning systems for retail.

A system for success.

The application of comprehensive hygiene and cleaning concepts is one of the keys to success in retail. Visible cleanliness and tidiness are valued highly by customers and, whether they know it or not, play an important role when making that final purchasing decision. Kärcher offers appropriate, efficient and cost-effective cleaning solutions for all work areas and floor coverings: the Kärcher system – a range of perfectly-tailored machines, accessories and cleaning agents. Our system is professionally enhanced by a range of modern services – from leasing/financing, maintenance and repair to a comprehensive cleaning management service – thus ensuring appropriate levels of cleanliness and compliance with hygiene standards. Kärcher, the world's market leader for cleaning systems.

Kärcher – practice-based solutions for our customers.

The name Kärcher is synonymous with high performance, quality and innovation worldwide. It also stands for cleaning expertise that sets standards. The Kärcher system offers impressive solutions for every requirement: perfectly-tailored machines, accessories and cleaning agents. Innovative technology, low consumption and durability means our products are high-performing, efficient and cost-effective. They are also inconspicuous, visually stylish in a classic anthracite design, and acoustically discreet with exceptionally low noise levels.

1 Always the best cleaning agents

For over 30 years, Kärcher has developed its own highly-efficient and eco-friendly cleaning agents and chemicals for specific cleaning tasks. Kärcher has been a supplier of high-quality systems for years and now ranks as a world leading manufacturer of cleaning machines, cleaning agents and chemicals. Kärcher has a wealth of expertise and technologies that set standards and offer tailor-made solutions from one source.

2 ecoefficiency – achieve more through greater efficiency

Efficiency comes in a range of forms: reduced energy consumption, high-performance internal-combustion engines, lower cleaning agent consumption, using highly-concentrated cleaning agents to avoid packaging, as well as structural recyclability and/or the minimisation of components. These are effects which can only be achieved through new ideas and innovative technologies and which, above all, require the will and ability to actually carry them out. Kärcher offers a comprehensive range of machines featuring the ecoefficiency mode as well as cleaning agents for effective, efficient and eco-friendly cleaning.

3 Tank rinsing system

The B 40 C/W, B 60 W and B 80 W are the first and only scrubber driers with an integrated tank rinsing system. After cleaning, the dirty water tank can be cleaned via an integrated rinsing system. These machines also support the HACCP concept.

4 Safety as a key function

The KIK system of the B 40 C/W, B 60 W and B 80 W offers much greater protection against operating errors. Operators cannot change the basic machine settings which are preset or enabled by the supervisor for the cleaning job or facility concerned. The operator only needs to insert the key. The machine can only be started with the associated coded key and is thus protected against unauthorised use.

5 6-stage filtration system including HEPA

The 6-stage filtration system with 3-ply fleece filter bag, permanent main filter, motor filter and blower/HEPA filter ensures optimal dust separation with an efficiency of up to 99.997% in HEPA quality.

6 An outstanding combination of form and function

Kärcher machines have repeatedly won awards for their successful combination of form and function, such as the “red dot design award” and the “if Product Design Award”. They are also TÜV approved for application in hygiene-sensitive areas and HACCP certified.

Cleanliness and safety: always crucial.

The customer always comes first, and they expect hygiene standards to be high and noise levels to be low in all areas. Cleaning systems for customer areas must therefore have certain characteristics. They have to be discreet and quiet, easy to transport, ergonomically designed and usable even in small spaces. The combined qualities of Kärcher's cleaning devices ensure that every job is easy to complete.

Small sweepers for delivering a fast effective clean of small areas, as well as for spot cleaning.

Compact scrubber driers: great for cleaning between aisles and around slip corners.

Eco spray mop: the fast solution for ensuring clean floors and slip resistance.

Universal vacuums: remove dry, damp or liquid stains. Ready to tackle any dirt - Kärcher vacuum cleaners.

1 Equipped for the biggest tasks

The B 140 R ride-on scrubber drier's large capacity makes it ideal for large markets, shopping centres and warehouses. Depending on the area of application, the machine can be equipped with disc brushes (BD 140 R) or roller brushes (BR 140 R) and with a working width of 75 or 90 cms. The innovative EASY operating concept guarantees simple manoeuvring everywhere.

2 Cleanliness guaranteed

The agile and quiet B 40 C/W delivers optimal cleaning results, even when floors have to be cleaned during the day.

3 A small sweeping sensation

The innovative KM 35/5 C cordless sweeper delivers a comfortable and effective clean. Perfect for use in smaller areas, such as entrance halls, or in shopping trolley bays.

4 Incredibly quiet

The T 15/1 dry vacuum cleaner is the quietest device in its class and perfect for vacuuming during opening hours.

5 Efficient cleaning with a clear view

The step-on BD 50/40 RS scrubber (disc brush)/ BR 55/40 RS (roller brush) impress with their simple operation and brilliant operator visibility. The model is easy to mount and dismount, saving time and energy when obstacles need to be moved out of the way.

Hygiene: when nothing but the best will do.

Handling food requires compliance with strict hygiene regulations both in processing areas and in areas which are open to customers. New and stricter regulations, such as HACCP, the EU standards ISO and IFS International Featured Standard, the British BRC Global Standard for Food Safety or the USA's FDA Regulations, place increased demands on machines and all-in-one solutions. The Kärcher system, which features machines, accessories and cleaning agents developed and produced in-house, ensures all liquid and dry cleaning applications can be carried out to the highest technological standards.

Scrubber driers provide an impressive clean with powerful mechanical action. Particularly user friendly.

Special HD cleaners approved for use in food production areas: efficient, mobile, versatile. Variable pressure and water flow rate for quick cleans.

The Kärcher HD foam system offers a range of practical and ergonomic spray and foam lances for tough cleaning jobs.

Surface cleaners are effective accessories for the quick removal of stubborn floor stains. Self-powered vacuum extraction of dirty water whilst cleaning.

1 Customised service

Compact, stationary high-pressure systems are perfectly adapted to the specific task. The range of possible equipment features covers every type of cleaning application required in hygiene-critical food production areas.

2 Super clean, super fast

The HDS compact class combines tried-and-tested, robust and durable technology with unrivalled operating costs and simple operation. Tough on dirt, but easy on the environment: in ecoefficiency mode, 20% of fuel is saved at 60°C operation. What is more, the high mobility design enables quick and easy manoeuvring.

3 Cold-water high-pressure cleaners

With its adjustable pressure setting (from 20 bar), the powerful HD 10/15-4 Cage Food is perfect for use in food preparation areas. The solution for pre-cleaning, disinfection and neutralisation tasks.

4 One simple clean

The BR 40/10 C Adv compact scrubber drier is a versatile machine which can be used anywhere where a floor scrubbing application with dirty water extraction is required.

5 Quick and effective

The BR 30/4 C can deliver a thorough yet gentle clean of small departments and hard-to-reach areas. Its simultaneous suction of wastewater means that floors are immediately safe for use. Also perfect for the occasional cleaning job during opening hours.

Cleaning agents

Efficient, application-based and eco-friendly products for every cleaning area.

Roller/disc brushes

Specially-designed bristles for every floor covering allow quick and thorough removal of stains.

State of the art.

Modern life has its own unique rhythm. Today shops are open around the clock. Consumers can shop as and when they choose, and they prefer to do it in a friendly setting. That is why shop designers have developed a dynamic layout which is based around the rhythm of the consumer. The modern materials put to use to achieve this pave the way for fabulous design possibilities – however, they present completely new challenges when it comes to cleaning. Kärcher aims to take on this challenge with innovative and efficient cleaning products. The Kärcher system: perfectly-tailored machines, accessories and cleaning agents.

Scrubber driers: reliable, configurable cleaning machines with exemplary handling.

Refreshment for customers to help make that final purchase: Kärcher WPD 100 water dispenser.

These sweepers are flexible; they can be used for both indoor and outdoor cleaning. For perfectly-cleaned, safe walkways.

High productivity vacuum cleaner: manoeuvrable universal machines for a thorough clean on large surfaces. For hard floors and textile floor coverings.

1 Refreshingly good

Water is life. It helps ensure vitality and good health. Studies have shown that when customers are able to stop and enjoy a refreshing glass of water from the Kärcher water dispenser in a pleasant and relaxed setting, they are given a whole new perspective on their shop. A valuable addition to any service.

2 Endlessly good: Escalator cleaners

Without special equipment, escalators can be extremely difficult to clean. The Kärcher escalator cleaner is a cost-effective and efficient solution. Regular use of the escalator cleaner with Kärcher's specially-designed cleaning agents is guaranteed to leave you with escalators that are clean and safe.

3 Shopping centres

Ride-on scrubber driers are perfect for cleaning and maintaining public areas in shopping centres. The user-friendly EASY operating concept makes sure you achieve the desired level of cleaning every time.

The KIK system offers maximum protection against operating errors. Basic pre-settings can be configured based on the cleaning tasks.

Guaranteed hygiene in storerooms and beyond.

In the food sector, storage areas are an important part of any comprehensive hygiene concept. Sensitive goods are brought in, packaged, stored and removed from storage, repackaged or unpacked and transported to food departments. Even in these areas, the Kärcher system ensures compliance with strict hygiene specifications and legal regulations. Perfectly-tailored cleaning devices, accessories and cleaning agents deliver a fast, simple and cost-effective clean.

Compact walk-behind sweepers complete sweeping tasks in a fraction of the usual time and are considerably more cost-effective than a normal broom.

Ride-on sweepers are the solution for large-area sweeping tasks on both parking bays and pathways.

Ride-on scrubber driers for demanding cleaning jobs and long periods of use. The first choice for underground car parks, multi-storey car parks and loading zones.

1 Full load

Arrivals and departures, loading and unloading – loading areas are constantly in use, which leads to a steady accumulation of dirt. The Kärcher high-pressure cleaner will get rid of it in an instant. A high-pressure water jet makes light work of even stubborn residues, getting into the tightest of corners and delivering a fast clean.

2 100% clean

The compact KM 75/40 W sweeper delivers a thorough and effective clean of heavily obstructed and hard to access storage areas. The dust suction feature also keeps air dust levels to a minimum. And the EASY operational concept ensures that even inexperienced users will have no trouble operating the device.

3 Constant removal of dry and wet dirt

The NT 65/2 Ap wet/dry vacuum cleaner has what it takes to deliver long periods of uninterrupted use with constant suction power: two powerful turbines, a patented filter system, semi-automatic filter cleaning and a large container capacity.

4 Perfect pallet performance

Clean pathways are a must for the safe transport of pallets. The appearance of dirt can disrupt the entire logistic flow. Kärcher's sweepers are perfect for ensuring consistently clean transport routes. Not only are they fast and efficient, they are also easy to use.

5 The right way

Compliance with strict hygiene standards requires selection of the right cleaning machines and a professional cleaning plan, in order to ensure that bacteria, viruses and fungi do not stand a chance. With this in mind, Kärcher has come up with a range of cleaning devices and specially-designed disinfectants and cleaning agents. The Kärcher system: the complete solution.

6 Constant performance without cutting corners

Kärcher's fully hydraulic ride-on sweepers are well-equipped and get into every corner. They feature various drive types which can be adjusted for the specific use: diesel, Lpg or battery.

The perfect outdoor cleaner.

The first impression is crucial. This is particularly true for the exterior areas of companies which serve to both advertise and represent your business to the outside world. In addition, there is also the need to keep dirt levels near entrances to a minimum to prevent dirt being carried in, as well as to keep loading areas and pathways clean. This ranges from leaves and road dirt to coarse debris, such as a broken pallet.

1 Large areas done in no time

In order to clean large outdoor areas cost-effectively, and in a short space of time, you will require high-performance and extremely agile sweepers with low energy consumption, high container storage and a range of accessories.

2 Clear. Eject. Scatter

The professional answer when winter calls: 100 cm-wide snow clearer with hydraulic pivot ejection chimney and hydraulically adjustable projection distance. Great for use with a rear grit or salt spreader.

3 Strong, ergonomic and efficient

Kärcher's snow clearers quickly and efficiently remove snow from pavements and public areas. With either 5 or 6 forward driving speeds, 2 different reverse speeds and a two-stage auger, these machines can be adjusted to suit all space requirements.

4 Proven performance both inside and out

The KM 70/20 C manual sweeper delivers an almost dust-free sweep and is 7 times faster than a conventional broom - both indoors and out.

5 Tough on dirt - easy to handle

Do your cleaning needs extend to multi-story car parks? This is where extremely robust scrubber driers, such as the BR 100/250 R, show their true prowess.

Manoeuvrable sweeper with traction drive and rollable waste container. Roller brush replacement without tools, coarse debris flap.

Ride-on sweeper with continuous filter cleaning and container lift. For long cleaning jobs without dust.

Powerful, manoeuvrable city sweeper with ecoefficiency suction system, water circulation system and articulated steering.

Walk-behind snow clearer with powerful 4-stroke engine and reliable cold starting.

An effective and efficient office clean.

Cleanliness and hygiene are all that matters when it comes to food processing industries. Administration rooms located close to production, such as offices, computer rooms for line control or sanitary facilities, are particularly sensitive areas. Here the task is to minimise the transfer of dirt and dust from the production area into these rooms and vice versa.

1 Top performance on large areas

The innovative BRC device series combines the advantages of spray extraction with the mechanical cleaning power of a brush, making it perfect for cleaning large areas in a short space of time.

2 Professional-standard dry vacuums

The innovative T 10/1 Adv was developed together with contract cleaners and impresses with its high suction power combined with a 5-stage filter system which includes a 3-ply fleece filter bag, a permanent main filter and a motor filter. A HEPA filter cartridge can be retrofitted.

3 Remove dirt deposited deep in the pile

Carpeted corridors and offices require regular deep cleaning, ideally with a Kärcher brush vacuum cleaner for carpets.

4 Mobile cleaners

Kärcher spray extraction cleaners are suitable for use on all types of textile surfaces: floor coverings, upholstery, office chairs and passenger seats. The handy and mobile Puzzi series of spray extraction cleaners, which are as powerful as they are robust, feature a range of extensive accessories and can be used for many applications.

The latest generation of high-performance dry vacuum cleaners with a highly-efficient filter system and superior ergonomics.

A spray extraction device for the highest of demands. Includes integrated water supply and wastewater disposal pump.

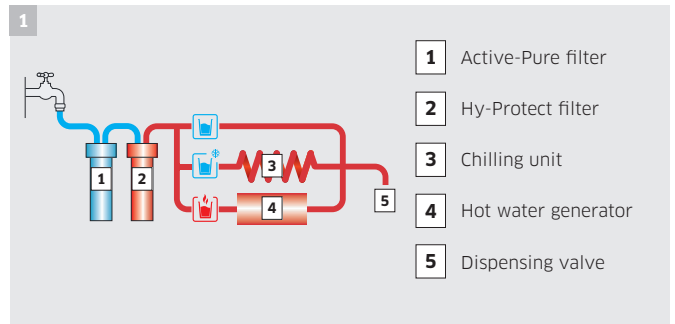

Wet and dry vacuum cleaner with Tact, an antistatic system and power tool autostart.

Slim, walk-behind scrubber drier with high scrubbing performance and straight or curved vacuum bar.

WPD 100 water dispenser – only the best for your customers.

The Kärcher WPD 100 turns normal tap water into healthy drinking water. Directly connected to the main water supply, this device constantly delivers the finest quality water thanks to its unique filter and hygiene concept. Chilled or hot, non-carbonated or carbonated water, all at the push of a button – hygienic, calorie-free, neutral tasting and pure. This is achieved through automatic thermal disinfection, a water dispensing valve with contact protection, and an innovative filter concept consisting of an Active-Pure filter and a Hy-Protect filter.

1 Complete hygiene concept

By means of integrated thermal disinfection, all water pipes, the heating and chilling unit as well as the Hy-Protect filter and water dispensing valve are regularly disinfected automatically – without the use of chemicals. The Active-Pure filter, a sintered activated carbon block filter, ensures a pure taste by removing chlorine, heavy metals and other substances. The Hy-Protect filter delivers hygienically flawless water by means of ultrafiltration. Its fine pore membrane effectively removes bacteria and viruses whilst ensuring the water loses none of its natural minerals.

2 Certified quality

The finest quality, certified by two independent institutes: TÜV SÜD and SGS INSTITUT FRESENIUS. Meets the hygiene requirements set out in the DVGW worksheet W 516.

WPD 100 stand-alone version
A refreshing eye-catcher and a potential advertising medium.

WPD table-top version
Ideal for break rooms or for integration into existing installations.

eco!efficiency: Achieve more with efficiency.

If you want to move and change things, you have to point the way. And show your colours. The blue symbols representing the various building blocks of Kärcher eco!efficiency show at a glance how and where Kärcher's power of innovation achieves measurably greater and better efficiency for customers, products and the environment. Kärcher eco!efficiency is implemented in all business areas and is an integral part of corporate policies and actions.

Reduced water consumption

Drinking water is precious and conserving it protects natural resources and saves energy for processing, transport and disposal. Many Kärcher high pressure cleaners and scrubber driers already meet the eco!efficiency standard or feature an eco!efficiency mode, which efficiently regulates the amount of water depending on the cleaning task.

Intelligent energy efficiency

Everything has its limits. Sometimes more power does not make sense. The T 12/1 eco!efficiency dry vacuum cleaner proves that less can be more. Its 750 W motor uses 40% less electricity, achieving 98% of the cleaning performance of the standard model thanks to flow-optimised suction channels, which is more than sufficient for maintenance cleaning.

Materials to suit the job

The selection of optimal materials is a never-ending challenge. New materials and production processes open up new opportunities in manufacturing and the use of machines, accessories and consumables. Lightweight design, durability, avoidance of contaminants, recyclability and costs – standards that Kärcher takes into account in the manufacture of efficient and eco-friendly products.

High recyclability

Raw materials that cannot be avoided from the beginning must be recyclable as far as possible after a long machine life. Kärcher machines are currently more than 90% recyclable.

Less noise

Noise is not just unpleasant, it has shown to be damaging to health. Kärcher counters working noise both in its own production processes and for users by reducing noise levels and power to an optimum level. An example of this is the T 12/1 eco!efficiency dry vacuum cleaner, the working noise level of which has been reduced by 5 dB(A) compared to the standard model, which corresponds to a reduction in volume of more than 50%. Furthermore, the low frequency of the work noise is subjectively perceived as being very pleasant. As a result, the T 12/1 eco!efficiency is also outstandingly suitable for longer work intervals and noise-sensitive areas.

Exemplary reparability

As early as the development phase, Kärcher machines are designed for reparability: as few components and assemblies as possible, the best possible accessibility and as many standard parts as possible.

Reduced CO₂ emissions

Reducing CO₂ greenhouse gas emissions is a global objective. To reduce its CO₂ footprint, Kärcher is making its contribution on all levels of production and in all business areas: through optimised use of materials, energy and water, high recyclability, as well as self-generated renewable energy.

Optimised company processes

Kärcher eco!efficiency simply means continuously trimming all processes in the company to achieve maximum efficiency. This results in constant optimisation in all areas.

Extended service life

The robust construction style and high strength are the key prerequisites for a long usage phase. High quality, reparability and a long-term spare parts supply ensure that Kärcher Professional machines give years of reliable service.

Precisely dosed cleaning agent

The most environmentally friendly and economical cleaning agent is that which is not used. Kärcher DOSE technology enables exact dosage of cleaning agents and, as a result, achieves a much lower level of consumption.

Reduced use of materials

If there is one art that is efficient, it is the art of reduction. Less material consumption through optimised designs is one aspect. Another is reducing the number of components. On average, Kärcher machines consist of significantly fewer components than comparable competitor models. The resulting lighter weight not only saves driving energy, it also saves a serious amount of raw materials and energy in manufacture.

Effective dust filtering

Dust is a nuisance to people and the environment and can be detrimental to health and the environment. Kärcher vacuums feature efficient filter systems with innovative components, e.g. Tact and Tact² systems for fully automatic filter cleaning as well as HEPA filters for hygienically clean, particle-free exhaust air. Fleece filter bags with a better degree of separation, double the retention capacity and a longer service life compared to paper filter bags. And last, but not least, certified safety vacuum cleaners for critical applications.

Comprehensive spare parts supply

Durable investment goods can only fully develop their economical and environmental advantages if all spare parts are available until the end of their service life. Depending on the particular product, Kärcher guarantees a spare parts supply for up to 10 years after a model goes out of production.

Measurable time saving

The simple equation of time equals money is still valid, however multiplied by the efficiency factor. More efficient machines that allow work to be carried out more quickly lead to significant labour cost savings and genuine competitive advantages.

Less waste water pollution

It is as easy as it sounds: water that has not been used, does not need to be disposed of. At the same time, dirty water should be concentrated in order to make work easier for sewage treatment plants. The Kärcher system, consisting of the device, accessories and cleaning agents is fine-tuned to achieve maximum effect with minimum effort.

Kärcher service – you can count on us.

If the word service is a promise and not a slip of the tongue, trust is the basis. Because you must be able to rely on your professional cleaning machines at all times. Day after day. Night after night. Everywhere. This is our aim. And we do our best to ensure this. Reliable cleaning machines and cleaning agents. Advanced technologies. Competent advice and training. And much more. Right to the point: Kärcher Service. A name you can trust. And a service that gives you security. That's our promise.

We're there for you, wherever you need us.

Kärcher stands for top performance – not just in products, but also in service. As the world's largest manufacturer of cleaning machines, we are there for our customers all around the world and at more than 50,000 service and sales points. This is how we give you peace of mind. Kärcher – your reliable partner.

1 Planning

Kärcher also provides sound advice for your detailed project and property planning. We calculate exactly which resources you need and how you can configure your machines and equipment for optimal results.

2 Hotline*

Friendly. Competent. Solution-oriented. Kärcher hotline staff are familiar with all products, accessories and cleaning agents and can provide sound advice and assistance by telephone.

3 Service contracts

Consistently high performance: with our service contracts you can be assured that your Kärcher products will operate reliably at all times, thanks to regular inspection and maintenance or an all-inclusive full service package.

4 Application advice

We provide application advice to ensure that you always have the most efficient solution. Area, staff and schedule are the decisive factors in determining the products that best suit your needs.

5 Global presence

Kärcher guarantees you personal service. Our global service and sales network ensures that you always have a competent contact partner locally, for all enquiries regarding service, advice or sales.

6 Technical training

Get the most out of your equipment: with our local technical training courses, we can show your employees how to use innovative Kärcher products to clean every type of facility optimally.

7 We come to you

Our service management system saves you time and money and ensures that we are with you as quickly as possible. With regular service calls as part of the full service package, and always whenever you need us.

8 Extended warranty

Guarantees a long service life. Our extended warranty or machinery breakdown insurance will give you peace of mind and ensure that your Kärcher products have optimal cover.

9 Leasing

Control your cash flow and remain productive with low leasing fees instead of major investments. Including a maintenance contract if required.

10 Rental machines

Stay as flexible as the market - with Kärcher rental machines you always have the equipment you really need, when you actually need it. Contact us to discuss your options.

11 Refurbished machines

Machines in top condition at very attractive terms. A new machine is not always cost-effective. Refurbished Kärcher machines are a cost-effective alternative for your project planning.

Enthusiasm. Innovation. Success.

Since its beginnings more than 75 years ago, as a value-oriented family business, Kärcher has become a world brand with three strong attributes: top performance, innovation and quality. Today, the Kärcher brand enjoys the reputation of being a global leader and resource-conserving supplier of professional cleaning systems and is synonymous with reliable products, optimal user value and ongoing commitment to the environment, culture and sport.

1 Seattle's highest building: the Space Needle
A Kärcher team pressure-washed the structure up to a height of 184 m. The job took eight weeks, working only at night.

2 A facelift for the heads of state
Clean again: In 2005 Kärcher cleaned the National Memorial on Mount Rushmore.

3 Innovative right from the start
In 1950, Kärcher developed the first hot water high-pressure cleaner in Europe for professional cleaning.

4 Clean environment

Kärcher works on environmental protection every day, with new products, technologies and investments in production facilities.

5 In-house research and development

Kärcher develops high-performance cleaning devices, accessories and special cleaning and care products.

6 Internationally represented

We are there for our customers all around the world.

7 Commitment to sports

Clean performance on the pitch. For several years, Kärcher has supported German and international football as a partner.
