

KÄRCHER

makes a difference

SIMPLICITY AT ITS BEST

PROFESSIONAL | AUTOMOTIVE | CLASSIC RANGE HD/NT

Cleanliness is good for business.

The automotive industry has its own rules. In order for a car dealership to be successful, its appearance is just as important as the technology, advice and service that it offers. Customers expect the dealers they trust to have a spotless business from the showroom right through to the workshop. Cleanliness is always taken as a sign of care and attention, reliability and trustworthiness. The Kärcher system covers all the different options for the different cleaning jobs in the office, showroom, garage, cleaning area, sanitation area and forecourt: cleaning machines with coordinated accessories and cleaning agents. A range of modern services all the way up to the full service package. Add to this the great feeling you get when you know that you are contributing to improving sustainability and environmental protection, as well as the efficiency and profitability of your own business.

The HD Classic Range: tried, tested and approved by millions

Kärcher high-pressure cleaners are seen all over the world as the epitome of performance, reliability and user-friendliness. With clever details such as flexible storage options for accessories and a tilting aid, the HD Classic Range machines have shorter set-up times and are easy to transport. In tough, everyday continuous use, these versatile, compact and mobile high-pressure cleaners never fail to impress with their stamina and efficiency.

1 Built to last

4-pole electric motors, brass cylinder heads, ceramic pistons and a reliable crankshaft pump form a solid basis for ensuring durability and stability. This also means that the machines are always ready for action and have low service costs.

2 Designed to be ergonomic

The easy-to-reach ON/OFF switch and the flip-up cover make maintenance work and servicing quicker. The infinitely variable water flow on the pump means that the right amount of power is always available for all sorts of cleaning applications.

3 Extremely mobile

Stable, large wheels, the tilting aid on the rear section, the foldable handle and compact dimensions together with the fact that they are lightweight mean that the HD Classic models are extremely mobile.

4 Neat and tidy

The storage compartment for nozzles and small parts, the swivel hook for the power cable and the stable metal frame with integrated hose and spray lance holder ensure that accessories don't get lost and are always within easy reach.

5 Easy to service

The wide-opening cover, the large, transparent water intake filter and the clearly visible oil sight glass provide excellent access to all relevant components for easy maintenance and hence optimum pump protection.

The NT Classic Range: can be used anywhere

Kärcher NT Classic models meet all the necessary requirements for use in the automotive industry. These wet and dry vacuum cleaners are compact and robust with very low operating and maintenance costs. The Easy Service design for quick turbine changes saves time and reduces service costs. And the large permanent main filter made from washable fleece for durable vacuuming without filter bags reduces operating costs significantly.

1 Compact, robust and mobile

With their slim design and four steering rollers, NT Classic models are sturdy yet light and safe to manoeuvre and transport. The bumper offers reliable, all-round protection from damage to the vacuum in any situation and prevents other objects from being damaged if the vacuum bumps into them.

2 Powerful performance

The powerful suction of the NT Classic range with a 1500 W turbine is essential for powerfully vacuuming up a wide range of different types of dirt and always guaranteeing excellent cleaning results.

3 Safe storage

Accessories are perfectly integrated into the machine, meaning that they are always within easy reach and won't get lost.

4 Easy service

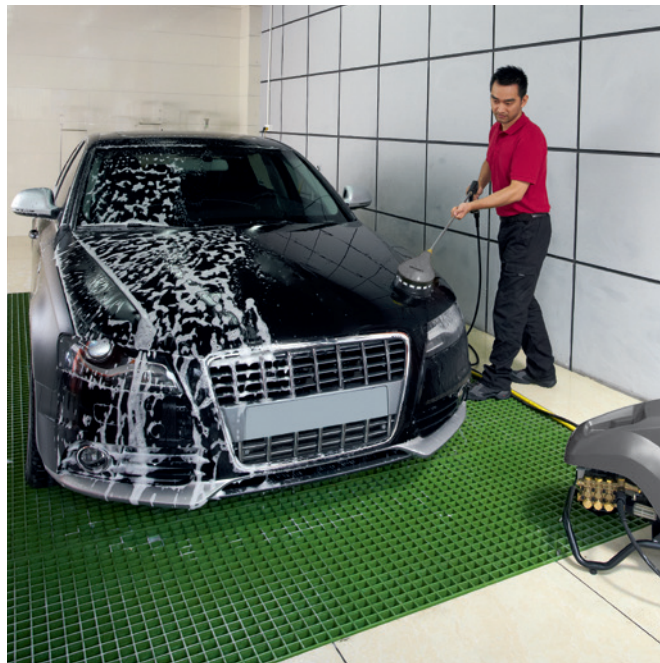

The Easy Service design means that the turbine can be removed within just 44 seconds. This incredible speed saves a tremendous amount of time and costs.

5 Streamlined efficiency

The large permanent filter basket ensures optimum dust separation and durable vacuuming without the need for a filter bag. As a result there are absolutely no filter bag costs.

Cleanliness and safety: garage and vehicle washing

Modern garages are more than just work areas. They are an important part of the image that dealerships present to their customers and a visible representation of modern maintenance and repair work. Creating a clean and professional impression here is therefore all the more important. The Kärcher system has powerful cleaning solutions for stubborn, greasy garage dirt, which achieve residue-free cleanliness in the entire workshop area and the demanding vehicle washing area.

1 Ideal for large areas

When removing oily, greasy dirt from large surface areas, surface cleaners achieve consistent, thorough cleaning results.

2 Compact design for flexible usage

The NT Classic Range's compact 20-litre model can be easily carried and used in many different ways.

3 Foam systems for better results

Flexible foam systems ensure consistent application, low-level consumption and a longer application time for the cleaning agent. This means brilliant cleaning results and environmental protection at the same time.

4 Deep cleaning for interiors

The crevice nozzle is perfect for cleaning inside vehicles. Its length means that even dust hiding deep down can be reached quicker and easier.

A sparkling showroom

The dream of owning a new car is never as real as when you're standing in a showroom. No matter what class of vehicle someone is looking to buy, a spotless finish, shimmering paintwork, shiny chrome sections and that irresistible new-car smell get people's hearts racing. But the presentation of the vehicle stock is only as good as the presentation of the showroom. These first impressions have an effect on people's emotions which is what will be decisive in getting them to make a purchase. For lasting, shiny vehicle finishes, Kärcher offers cleaning solutions for every task at hand: from a quick vacuum, wipe or mop through to cleaning large surface areas with ease.

1 Perfect for all surfaces

For different floor cleaning requirements in showrooms, offices and garages as well as out on the forecourt, the Kärcher system has all-purpose machines which can carry out any applications quickly, thoroughly and efficiently with their corresponding accessories and cleaning agents. With the floor cleaner FRV 30, for example, you can carry out effective high-pressure cleaning whilst automatically vacuuming up the waste water, even indoors.

2 Cleanliness guaranteed

The NT Classic Range vacuum cleaners can clean hard surfaces as well as carpets quickly, thoroughly and very efficiently thanks to their outstanding suction power. Their steering rollers ensure gentle, effortless coasting.
