

makes a difference

CLEANING YOU CAN COUNT ON.

PROFESSIONAL | CONSTRUCTION

Making sure dirt does not overrun a building site.

Robust, durable and effective – these are qualities you can count on with innovative Kärcher cleaning machines. Reliable and effective equipment is indispensable when dealing with the many types of dirt found in construction industry and trades. Whether for vehicle, machinery, structure or floor cleaning, with Kärcher's economical solutions you are optimally equipped. They are easy to use, powerful and constructed for the roughest conditions. With Kärcher's sophisticated technology, you will complete your cleaning jobs more quickly and with greater ease.

1 Kärcher in construction

With robust and innovative machines, Kärcher makes all kinds of cleaning quick, easy, economical and effective.

Page 4

2 Clinging dirt

For muck that clings to concrete residue: high-pressure appliances can remove even the most stubborn residual dirt.

Page 6

3 Loose dirt

Dust, shavings and loose material can be removed easily and effectively with Kärcher's high-powered vacuum cleaners.

Page 8

4 Large-volume dirt

Indoors or out – power sweepers guarantee economical use and remove dirt – such as for final site clean-ups – without a trace.

Page 10

5 Special requirements

High performance for the most extreme cases: from cutting concrete at high pressure to extra-safe appliances in risk areas.

Page 12

Cleaning solutions for the toughest conditions.

The construction industry and trade face the toughest working conditions every day – as well as high cost pressure and little time. Cleaning must also adapt to these challenges. For this reason, Kärcher has developed solutions to help you save time and manpower – highly robust products that will optimise cleaning results with their high level of performance. Kärcher machines and accessories last longer, are tougher and offer many well-thought-out, detailed solutions to make your work quicker and easier.

With many years of experience in the area of professional cleaning, Kärcher knows just what is important on construction sites, in workshops and warehouses: saving time, cleaning without additional effort, ease of use and, last but not least, appliance robustness and reliability. Kärcher therefore always develops solutions with these specific requirements in mind. All units undergo lengthy testing, are easy to operate and built to last.

Whether you require appliances suitable for cranes or a space in which to install a toolbox, Kärcher takes every demand into account. We also place great emphasis on cost-effectiveness: long service lives and uninterrupted work as a result of the best filter technology, for instance, ensure greater efficiency. Your investment should pay off quickly – every time you use it. You can be sure that with Kärcher, you always have the best equipment, no matter the working conditions.

1 High performance

To make sure that you lose no time in eliminating stubborn residues or large volumes of dirt, Kärcher products offer particularly high performance. For instance, with Kärcher high-pressure and ultra high-pressure units, you can remove sticky muck quickly and effectively. With up to 2,500 bar pressure, you do not even need to use blasting agents or detergents.

2 Robust

Kärcher machines are developed for the tough conditions of a construction site, with stable construction, solid bumpers and protective tubular cage frame. In addition, all components such as nozzle attachments are developed for maximum durability and extensively tested.

3 Practical

Kärcher machines are equipped with practical features for quick, convenient and effective cleaning. They are largely maintenance-free and allow uninterrupted work with the innovative Tact filter system, for instance, or can be connected directly to your power tools.

4 Safe

With anti-static systems, automatic shutdown when the water fill level is reached during wet/dry suction, integrated exhaust monitoring and various dust class ratings, Kärcher vacuums always guarantee maximum safety. This allows you to meet all the tasks required in your trade.

Remove sticky dirt easily.

When dirt just won't come off, a bit of pressure helps. With Kärcher hot- and cold-water high-pressure cleaners, you can remove even the most stubborn layers of any kind of dirt – such as dust, paint or even concrete. With up to 350 bar at your fingertips, you can clean building fronts, the ground and machinery quickly and effectively. The whole process can be carried out conveniently and, in some cases, without any cleaning agents at all. Various nozzle attachments ensure flexible use and diverse application, which, paired with extreme durability and robustness, make Kärcher machines an investment that will pay off for many years.

Unheated

Highly mobile for use anywhere. With high pressure and high delivery rates, you can remove even the toughest dirt quickly, thoroughly and economically.

Heated

Thoroughly convincing: with high temperatures, you will clean even more economically – high performance that is normally only possible with stationary machines.

Robust

Stand-alone units built for lifting by cranes, with robust tubular frames and sturdy pneumatic tyres. Even without electricity, a combustion motor delivers the highest power.

1 Work cleanly

Protect your investment and ensure long-term durability. Free your workplace, components and machinery of dust, dirt and other adhering residues. With Kärcher cold-water high-pressure cleaners, the process is quick and effortless.

2 Building facade cleaning

Eliminate grime powerfully and quickly without damaging the basic structure of the building. You can adjust water volume and pressure easily to adapt the process to any surface.

3 Floor cleaning

Residues can be easily and effectively removed with cold-water high-pressure cleaners. Using the FR 30 Me attachment with integrated suction device which provides for 10 times the area capacity, this is even easier and more economical than with conventional attachments.

Made for the construction industry: Kärcher high-pressure cleaners are lightweight to transport, offer different nozzles for all requirements, and can be operated conveniently directly from the hand spray-gun using the servo control so that you can work without having to go up to the appliance.

Loading is no problem: suitable for cranes thanks to lifting points.

Adaptable for every job: nozzle attachments for increased effectiveness and flexibility.

No interruptions: control water and pressure volume directly from the handle.

Tangible results with loose dirt.

Kärcher wet and dry vacuums are precisely the right tool for removing loose residue and particles. From compact, lightweight models to multi-motor high-capacity machines, these products can be used to suck up anything: from fine dust to coarse dirt, from liquids to lubricants. With extreme suction power and capacities of up to 100 litres, any job can be completed quickly. Thanks to drain hoses installed as standard, liquid in the reservoir is easily drained. And with features like the Tact automatic filter clean system, these machines are ready for any challenge the building site can throw at them.

Compact

Maximum mobility with the best suction power. Includes clever details such as integrated plug connector, carrying handle, tool-box mount and much more.

Robust

High performance and stable design. Automatic filter cleaning, complete inventory of accessories and high mobility round off the package.

Durable

Ideal for long working intervals without breaks: Kärcher suction devices with the Power Filter Clean System for constantly high suction power.

1 Work dust free

Whether you are sanding, cutting or drilling, with Kärcher appliances you can suck up the dust right at the source. Your tool can be connected directly to the unit and even works with integrated automatic start/stop. The anti-static system, installed as standard, ensures optimum safety.

2 Dry suction

Here, dust, chippings and dirt have no chance: with up to three powerful motors and up to 235 mbar power, all particles are sucked away with no remnants left. Innovative filter technology ensures constantly high suction power.

3 Wet suction

With the flat-pleated filter you can switch between wet and dry suction without changing the filter and without any interruption. Another benefit: convenient access to the main filter makes maintenance quick and easy.

No interruptions: the patented Tact automatic filter cleaning system is simply constructed, easy to maintain and ensures constantly high suction power.

Hugely mobile and easy to transport: thanks to a novel fold-away push bar and compact square design.

Everything to hand at all times: to ensure that you are always equipped for any task, all accessories are stowed directly in the appliance.

Highly practical: no lengthy searches for a socket on site – simply plug tools directly into the suction unit.

Little effort at high volume.

Whether inside or out, high-productivity Kärcher sweepers are well-suited for the optimum cleaning of construction sites, factory premises or warehouses, from final construction site clean-up to quick interim sweep-ups. From compact appliances for manual use to high-volume ride-on machines, Kärcher offers everything you need for easy, ergonomic and efficient floor cleaning. Thanks to their ease of operation and low-maintenance technology, the machines are quickly ready to use and can easily remove large piles of dirt.

Helpful

Quicker and more economical in small areas than a broom. Effortlessly sweeps up all types of dirt, even in the tightest corners.

Comfortable

Ideal for midsize areas. These suction power sweepers save time and energy, clean all areas easily and efficiently, and even suck up large particles.

Powerful

Fully hydraulic, high-performance, robust and easy to operate. Ride-on sweepers with integrated operating systems that are suitable for even the toughest demands.

1 High surface cleaning rate in m²

1 Cost-effective use

Make the most economical decision – see which machine is right for your application. Surface area, volume and frequency of cleaning will determine machine selection. We are happy to help you work out the best options.

2 Outdoors

With easy operation, long work intervals and high performance, Kärcher machines make outdoor sweeping more economical. Since no tools are required to replace filters and sweeping rollers, they are also highly maintenance-friendly.

3 Indoors

For greater efficiency in your warehouses, or for interim cleaning on the construction site: Kärcher sweepers always achieve the best results thanks to high manoeuvrability, ease of use and an adjustable main sweeping roller.

Simple, practical and effective, Kärcher machines are easier to use and more convenient to empty. With a sweeping principle that fills the hopper 100%, longer work intervals are also possible.

Easy:
just one control for all functions.

Practical:
hydraulic high dump.

Effective:
high-speed sweeping principle fills dirt hopper 100%.

For special requirements, extreme power helps.

Here, resistance is futile: Kärcher offers the best appliances for the toughest jobs. For instance, with extreme-pressure appliances and pressures up to 2,500 bar, removing the most stubborn dirt is child's play. With this power, even concrete can be roughened and steel reinforcements exposed. Even hazardous or explosive dust can easily be removed with our safety vacuums. Sensitive surfaces can be cleaned gently but highly effectively with modern dry ice blasters. Regardless of whether you need extreme safety, extreme pressure or extreme sensitivity, with Kärcher appliances, you have just the right equipment.

Extremely safe

Anti-static, with suction hose locking and earthed to the intake socket. Also approved for dust class H or M.

Extremely gentle

Ice blasters remove tough dirt in an innovative manner. Without damaging surfaces, without corrosion problems and without contaminated waste water.

Extremely powerful

Whether in a cage frame suitable for use with cranes or as a mobile trailer, hot- and cold-water extreme-pressure cleaners make any job possible with up to 2,500 bar pressure.

1 Concrete restoration made easy

The easy and economical way of preparing the surface, whether roughening new concrete, removing any old coatings or loosening thick bitumen layers. With cold-water extreme-pressure appliances and pressures up to 2,500 bar depending on the model, your job is soon done.

2 Remove stubborn dirt easily

With dry ice blasters, not only can surfaces be gently cleaned of oil, grease and resin, but paint particles can also be removed quickly and effectively during building cleaning. This all takes place without the basic structure of the building being damaged, without additional cleaning products and without waste water residue.

3 Hazardous dust

Deal with high-risk materials safely: asbestos, coal, nickel, tar and mould are hazardous to health. Kärcher safety systems are ideal for disposing of such substances and meet all industrial safety requirements.

Safe, durable and robust. Kärcher appliances for special situations can meet the toughest demands so that your investment continues to pay off. Even safety requirements are always exceeded with well-thought-out details.

Safe:
the closing cap on the intake socket keeps hazardous dust inside the appliance.

Durable:
thanks to wear-free technology, such as recirculation mode, achieved by use of bypass regulator valve.

Robust:
special industrial guns that can withstand internal forces at the highest pressures.

The right solution for any kind of dirt.

Kärcher Service – we promise you can trust us.

If the word “service” should be a promise and not a slip of the tongue, trust is the basis for this. Because in your line of work, you have to be able to trust in the operational reliability of your professional cleaning machines at all times – day in, day out and night in, night out. Everywhere. Our task is to guarantee this. We will do our best: reliable cleaning machinery and cleaning products, advanced technologies, competent guidance and training, and much more. With a single word: Kärcher Service – the name that means trust. And a service that will give you security. We promise.

We are there for you – wherever you need us.

Kärcher stands for peak performance – not only with our products, but also with our service. As the world's largest manufacturer of cleaning machines, we are there for our customers all around the world and at more than 50,000 service and sales points. We can thereby ensure that you don't have to worry. Kärcher – your partner for all scenarios.

1 Hotline*

Friendly. Competent. Service-oriented. Kärcher hotline employees are thoroughly familiar with all appliances, accessories and cleaning products, so they can give you professional advice even on the telephone.

2 Service contracts

Peak performance at all times: with our service contracts, your Kärcher appliances are always ready for use – thanks to regular inspections, maintenance or the complete full-service package.

3 Application advice

With our application advice, we ensure that you are always working with the most efficient solution. Your space, personnel and time frame will determine the optimum equipment for your needs.

4 Global presence

Personal service is guaranteed at Kärcher. With our worldwide service and sales network, you always have a competent contact person on-site for all service, consulting or sales questions.

5 Technical training

Get more out of it: with our on-site technical training, we help your employees clean all objects as effectively as possible with innovative Kärcher appliances.

6 We come to you

With our Service Management System, we save time and money and get to you as quickly as possible. Regularly, as part of the full service, and whenever we are needed.

7 Warranty extension

Long life, guaranteed: protect your business and your Kärcher appliances to the optimum – with our warranty extension or machinery breakdown insurance.

8 Leasing

Remain liquid and fully operational, with low leasing rates instead of large investments. Maintenance contract included if desired.

9 Rental machines

Stay as flexible as the market – with Kärcher rental machinery you have appliances to hand exactly when you are going to use them. Discuss the options with us.

10 Used machines

Appliances in top condition, with the best conditions. It is not always worth buying a new unit. In such cases, Kärcher used appliances are the cost-effective alternative for your project planning.

Enthusiasm. Innovation. Success.

Since its beginnings more than 75 years ago, as a value-oriented family business, Kärcher has become a world brand with three strong attributes: top performance, innovation and quality. Today, the Kärcher brand enjoys the reputation of being a global leader and resource-conserving supplier of professional cleaning systems and is synonymous with reliable products, optimal user value and ongoing commitment to the environment, culture and sport.

1 Seattle's highest building: the Space Needle

A Kärcher team pressure-washed the structure up to a height of 184 m. The job took eight weeks, working only at night.

2 A facelift for the heads of state

Clean again: In 2005 Kärcher cleaned the National Memorial on Mount Rushmore.

3 Innovative right from the start

In 1950, Kärcher developed the first hot water high-pressure cleaner in Europe for professional cleaning.

4 Clean environment

Kärcher works on environmental protection every day, with new products, technologies and investments in production facilities.

5 In-house research and development

Kärcher develops high-performance cleaning machines, accessories and special cleaning and care products.

6 Internationally represented

We are there for our customers all around the world.

7 Commitment to sports

Clean performance on the pitch. For several years, Kärcher has supported German and international football as a partner.

We are there, worldwide.
