

Abrasive, fine

The coarse grit size of 0.2–0.8 mm is ideal for cleaning brick, sandstone, terrazzo, steel, hardwood and concrete.

NTA-free

Properties

- For use with Kärcher blasting systems and guns
- Spray agent made from granulated melting chamber slag (aluminium silicate base)
- Granulation 0.2-0.8 mm
- Hardness on the Mohs scale: 6-7
- For removing coarse dirt on undergrounds, such as: clinker, brick, sandstone, terrazzo, steel, hardwood and concrete.

Areas:

Agriculture:	Derusting
Building Industry:	Cleaning concrete and formwork material
Contract cleaning:	Façade cleaning
Municipal:	Derusting, graffiti removal

Application

- High-pressure cleaner with jet system and jet gun

25 kg

Part number

6.295-564.0

Application:**High-pressure cleaner with jet system and jet gun**

- High-pressure cleaner equipped with jet system and gun.
- Insert blasting suction into blasting material.
- Adjust volume regulation as required.
- Blast object.

Directions for use:

- Test on an inconspicuous part for material compatibility.
- Store in a dry place.
- Removing blasting abrasive deposits with the air or water stream.

Further information:

- Material Safety Data Sheet (MSDS)

Dosage and yield:

Content:	Cleaning method:	Primary mixture:	Dosage:	Contamination:	Productivity:
25 kg	High-pressure cleaner with jet system and jet gun		tailored to individual requirements	medium	dosage-dependent
