

## Blasting Abrasive, coarse

Grit size 0.25–1.4 mm is highly effective on steel, granite, aerated concrete and exposed-aggregate concrete. Also highly suitable for corrosion and paint removal or graffiti removal.

NTA-free

### Properties

- For use with Kärcher blasting systems and guns
- Spray agent made from granulated melting chamber slag (aluminium silicate base)
- Granulation 0.25-1.4mm
- Hardness on the Mohs scale: 6-7
- For removing coarse dirt on undergrounds, such as: Steel, granite, clinker, porphyry, concrete, aerated and exposed aggregate concrete

### Areas:

<b>Agriculture:</b>	Derusting
<b>Building Industry:</b>	Cleaning concrete and formwork material
<b>Contract cleaning:</b>	Façade cleaning
<b>Municipal:</b>	Derusting, graffiti removal

### Application

- High-pressure cleaner with jet system and jet gun

25 kg

**Part number**

6.295-565.0

**Application:****High-pressure cleaner with jet system and jet gun**

- High-pressure cleaner equipped with jet system and gun.
- Insert blasting suction into blasting material.
- Adjust volume regulation as required.
- Blast object.

**Directions for use:**

- Test on an inconspicuous part for material compatibility.
- Store in a dry place.
- Removing blasting abrasive deposits with the air or water stream.

**Further information:**

- Material Safety Data Sheet (MSDS)

**Dosage and yield:**

Content:	Cleaning method:	Primary mixture:	Dosage:	Contamination:	Productivity:
25 kg	High-pressure cleaner with jet system and jet gun		tailored to individual requirements	heavy	dosage-dependent
