Brush head rotatable by +/- 200° with KART technology

- Enables extreme manoeuvrability of the machine, even in areas with a lot of furniture and when negotiating curves.
- The brush is always perpendicular to the direction of travel. The squeegee reliably absorbs the water in every corner.
- Cleaning and vacuuming in reverse is easily possible.

Includes high-performance lithium-ion battery

- Completely maintenance-free and with a service life that is up to three times longer than conventional batteries.
- Interim and partial charging possible as required.
- Extremely fast charging times (full charge in three hours, half charge in one hour).

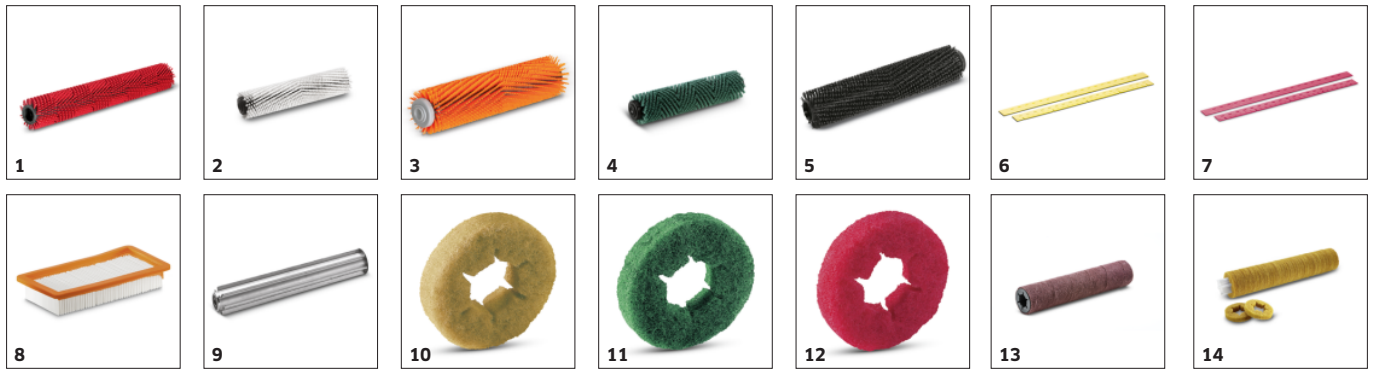

Compact device design

- Makes it possible to drive away from walls at a 90° angle.
- The lack of machine protrusions make handling easier.
