

## BDP 50/1500 C

The BDP 50/1500 C ultra-high speed machine polishes shiny floors 30% faster than conventional high-speed machines.

### 1 Integrated vacuuming system

- The guard ensures that polishing dust stays under the machine. The dust is collected in the dust container by passive vacuuming to reduce dust levels while polishing.
- Collected dust is easy to empty - filter bag is reusable.

### 2 Automatic contact pressure

- The driver plate is spring-mounted. The contact pressure is automatically regulated for consistent polishing results.
- The pad maintains optimal surface contact and follows any floor unevenness.

### 3 Central wheel

- For cleaning right up to edges - also forwards.

## BDP 50/1500 C

■ With central guide wheel - polishing up to the edge
