### Application

#### Spray method

The cleaning water is applied to the floor directly in front of the mop, then the surface is wiped.

#### Preconditioned method

For optimum results, dampen the mop with cleaning water amounting to 180 % of its own dead weight.

#### Bucket method

For optimal moisture and a single-step wiping process, dip the mop fully into the cleaning water, allow it to absorb as much water as possible and then wring it out in the press.

### Properties

- Carries the European Ecolabel (EU Ecolabel)
