QUICK TO CLEAN, QUICK TO DRY.

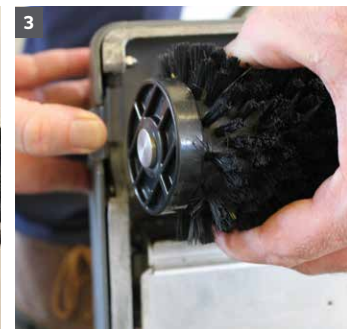

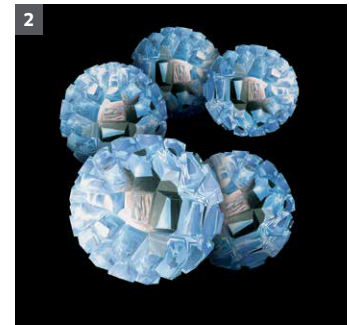

Improve your carpet's appearance and open your floors to traffic in only 20 minutes with iCapsol interim cleaning technology.

PROFESSIONAL | BRS 43/500 C

Discover the benefits of interim cleaning.

Quick to clean, quick to dry, the BRS 43/500 C Deluxe is the productive solution for cleaning carpet. This interim carpet cleaning tool cleans carpets faster, improves the appearance, and keeps carpet cleaner for longer periods of time. Cleaning carpet quickly in a 24/7 environment is a challenge, but our technology allows the carpet to dry slowly due to a lack of airflow through the carpet fibers which are constructed of dense loops. The iCapsol Encapsulating Interim Cleaning chemical breaks down and then surrounds the soil and other detergent residue from previous cleaning. It dries into a hard, non-sticky crystal, encasing the soil within about 20 minutes. The dried crystals can then be easily removed by vacuuming. The result is carpet that is clean and dry and ready for use quickly.

1 Productive carpet cleaning

- Streamlined, compact design makes it easier for the operator to clean in congested areas
- Productively clean and freshen up carpet surfaces with less effort
- Deluxe model with built-in on-board spraying system for increased productivity
- Uses Red Carpet iCapsol Encapsulation Interim Cleaning Chemicals

2 Encapsulation technology

- iCapsol technology encapsulates the soil in microcrystals that are non-sticky and won't attract more soil. The residue is easily vacuumed when carpet is dry
- Low moisture encapsulation carpet cleaning process removes soil while improving the overall carpet appearance; carpet dries in about 20 minutes while reducing water and detergent consumption

3 Thorough and effective

- Unique brush system features two counter-rotating brushes to effectively clean and agitate both sides of the carpet nap
- Counter-rotating brushes lift and groom the carpet pile, while the debris bin catches soil and debris
