When compared to a walk-behind-scrubber this machine is twice as productive. This machine was developed from our years of experience as the innovators of the stand-on cleaning segment. No other manufacturer comes close to the depth of our line of stand-on cleaning machines. This model features our innovative cylindrical cleaning technology on our third generation Chariot™ platform.

Next generation stand-on cylindrical cleaning

Experience the productivity of the next-generation of cylindrical scrubbing with the Chariot™ 3 iScrub 26 SP. When compared to a walk-behind-scrubber this machine is twice as productive. This machine was developed from our years of experience as the innovators of the stand-on cleaning segment. No other manufacturer comes close to the depth of our line of stand-on cleaning machines. This model features our innovative cylindrical cleaning technology on our third generation Chariot™ platform.

Cylindrical scrubbing technology

- Cylindrical brushes are continuously self-cleaned by centrifugal force, which allows them to outlast 50 or more cleaning pads
- Provides up to 9 times more downward pressure than traditional disc or pad floor scrubbers, creating more consistent results
- Integrated wet pre-sweep and debris hopper can save up to 40% of your overall cleaning time and labor costs by eliminating the need for pre-sweeping with a separate piece of equipment
- Perfect for scrubbing grouted, uneven, or porous surfaces

1 Cylindrical scrubbing technology

- Cylindrical brushes are continuously self-cleaned by centrifugal force, which allows one cylindrical brush to outlast 50 or more cleaning pads saving on labor, material costs and landfill space
- Provides up to 9 times more downward pressure than traditional disc or pad floor scrubbers, creating more consistent cleaning results by evenly distributing downward pressure along the entire contact area of the brush.
- Integrated wet pre-sweep and debris hopper can save up to 40% of your overall cleaning time and labor costs by eliminating the need for pre-sweeping with a separate piece of equipment
- Perfect for scrubbing grouted, uneven, or porous surfaces

2 Cost savings

- Optional chemical metering system with adjustable dilution rate ensures the correct chemical mix is applied and no product is wasted
- Chariot™ scrubbers reduce labor cost due to our productive stand-on design allowing you to get more done with the same size staff
- Get a quick return on your investment with prices comparable with similar sized walk-behind scrubbers

3 Productivity focused

- Chariot™ scrubbers increase labor productivity up to two times that of a walk-behind scrubber (based on ISSA practical cleaning rates)
- EcoMode optimizes productivity by lengthening run times between recharging and refilling
- Reduced operator fatigue means increased productivity
- Simple-to-train design means more time is spent cleaning
- Full circle visibility, easy to transport around the building, and fits through a standard door
- Optional battery exchange package increases productivity and decreases down-time
