

## **High-pressure pump** 30Y

The type 30Y high-pressure pump provides a max. operating pressure of 1,000 bar and a max. flow rate of 16,7 l/min.

The high-pressure plunger pump of the Y series is particularly compact. Because of its small dimensions and low weight, it can be installed very well in devices with a small base frame. The pump is available with drive shaft installed right and left. With operating pressures up to 1,000 bar, this type is suitable for various cleaning tasks, e.g. in the chemical industry, in the oil and gas industry, but also in the field of ship cleaning.

The sealing water system of the pump prevents leakage, allows for a particularly high durability of the high-pressure seals and counteracts the intrusion of air. In addition to that the hard metal plungers used offer increased wear resistance, high thermal shock resistance and high cavitation insensitivity.

Technical data					
Weight	approx.	69 kg			
Inlet pressure connection		G 1"			
Pressure connection		M 24x1,5			
Crankshaft	max.	1,000 1/min			
	min.	Depends on operation parameters			
Drive shaft		Diameter 40mm k6,			
		feather key DIN 6885 Sheet 1, A12 x 8 x 70			
Torque at drive shaft	max.	291 Nm			
Inlet pressure	min.	1.0 bar			
	max.	5.0 bar			
Pressure amplitude	max.	± 2.0 bar			
Flow temperature min.		+5 °C			
	max.	+45 °C (higher temperatures on request)			
Flow inlet requirement	min.	1.5x nominal feed rate of the pump,			
Flow inlet requirement		dependent on the conversion set			
Emission sound pressure level		> 90 dB(A)			
according to DIN EN ISO 11200		>80 dB(A)			
Oil capacity of transmission end	approx.	5.5 l			
Oil viscosity under ACEA A3; ACEA B4;	ACEA	15 W – 40			
E2; API SL; API CF; API CG-4					
Oil temperature	max.	80 °C
