- According to applicable regulations, the appliance must never be used on the drinking water net without a system separator. Ensure that the connection of your building water installation on which the high-pressure cleaner is operated is equipped with a system separator pursuant to EN 12729 Type BA.
- Water that has flown through a system separator is no longer classified as drinking water.
- High-pressure hoses, fixtures and couplings are important for the safety of the appliance. Only use high-pressure hoses, fixtures and couplings recommended by the manufacturer.
- When disconnecting the supply or high pressure hose, water may leak from the connections after operation.

⚠ **CAUTION**

- Mind the weight of the appliance when selecting the storage location and during transport (see technical data) to prevent accidents or injuries.

Working with detergent

⚠ **WARNING**

- This appliance was designed to be used with detergents which are supplied or recommended by the manufacturer. The use of other detergents or chemicals may compromise the safety of the appliance.
- The improper use of detergents can cause severe injuries or toxication.
- Store detergents away from the reach of children.

Personal protective equipment

⚠ **CAUTION**

- Wear protective clothing and safety goggles to protect against splash back containing water or dirt.
- During the use of high-pressure cleaners aerosols can develop. Inhalation of aerosols can cause health damage. Depending on the application, completely shielded nozzles (e.g. surface cleaner) that significantly reduce the emission of aqueous aerosols can be used for high-pressure cleaning. The use of such shielding is not possible with all applications. If the use of a completely shielded nozzle is not possible, a respirator of the category FFP 2 or the like should be used, depending on the environment to be cleaned.

Safety Devices

⚠ **CAUTION**

- Safety installations serve the protection of the user and may not be modified or bypassed.

Appliance switch

The appliance switch prevents unintentional operation of the appliance.

Lock trigger gun

This lock locks the lever of the trigger gun and prevents the inadvertent start of the appliance.

Overflow valve with pressure switch

The overflow valve prevents the permissible working pressure from being exceeded. If the lever on the trigger gun is released the pressure switch turns off the pump, the high pressure jet is stopped. If the lever is pulled the pump is turned on again.

Water supply

According to the applicable regulations, the appliance must never be used on the drinking water supply without a system separator. Use a suitable system separator manufactured by KÄRCHER; or, as an alternative, a system separator as per EN 12729 Type BA.

Water flowing through a system separator is considered non-drinkable.

CAUTION

Always connect the system separator to the water supply, never directly to the appliance!

ATTENTION

Impurities in the water can damage the high-pressure pump and the accessories. For protection, the use of the KÄRCHER water filter (optional accessory, order no. 4.730-059) is recommended.

Water supply from mains

For connection values, see type plate/technical data.

Observe regulations of water supplier.

- Attach the water supply hose to the coupling on the water connection.
→ Connect the water supply hose to the water supply.
→ Completely open the water tap.

Drawing in water from open reservoirs

- Screw the suction hose into the water connection of the appliance and insert it into the water source (e.g. rainwater drum).
- Separate the high pressure hose from the high pressure connection of the appliance.
- Switch the appliance on (I/ON) for a max. of 2 minutes and wait until the water exits the high-pressure connection without bubbles.
- Turn off the appliance "0/OFF".

Battery operation

- Turn on the appliance "I/ON".
The displays for battery operation and mains operation are subjected to a brief test routine and will illuminate consecutively.
- The display for battery operation illuminates continuously and shows the battery status.
The appliance is now ready for operation.
