How To Use This Manual

This manual contains the following sections:

- How to Use This Manual
- Safety
- Operations
- Maintenance
- Parts List

The HOW TO USE THIS MANUAL section will tell you how to find important information for ordering correct repair parts.

Parts may be ordered from authorized dealers. When placing an order for parts, the machine model and machine serial number are important. Refer to the MACHINE DATA box which is filled out during the installation of your machine. The MACHINE DATA box is located on the inside of the front cover of this manual.

Model: _____
Date of Purchase: _____
Serial Number: _____
Dealer: _____
Address: _____
Phone Number: _____
Sales Representative: _____

The model and serial number of your machine is located on the back of the machine.

The SAFETY section contains important information regarding hazardous or unsafe practices of the machine. Levels of hazards are identified that could result in product damage, personal injury, or severe injury resulting in death.

The OPERATIONS section is to familiarize the operator with the operation and function of the machine.

The MAINTENANCE section contains preventive maintenance to keep the machine and its components in good working condition. They are listed in this general order:

- Maintenance
- Troubleshooting

The PARTS LIST section contains assembled parts illustrations and corresponding parts list. The parts lists include a number of columns of information:

- **REF** – column refers to the reference number on the parts illustration.
- **PART NO.** – column lists the part number for the part.
- **QTY** – column lists the quantity of the part used in that area of the machine.
- **DESCRIPTION** – column is a brief description of the part.
- **NOTES** – column for information not noted by the other columns.

NOTE: If a service or option kit is installed on your machine, be sure to keep the KIT INSTRUCTIONS which came with the kit. It contains replacement parts numbers needed for ordering future parts.

NOTE: The manual part number is located on the lower right corner of the front cover.

Introduction & Safety Information

Thank you for purchasing this Pressure Washer. We reserve the right to make changes at any time without incurring any obligation.

Owner/User Responsibility:

The owner and/or user must have an understanding of the manufacturer's operating instructions and warnings before using this pressure washer. Warning information should be emphasized and understood. If the operator is not fluent in English, the manufacturer's instructions and warnings shall be read to and discussed with the operator in the operator's native language by the purchaser/owner, making sure that the operator comprehends its contents. Owner and/or user must study and maintain for future reference the manufacturers' instructions. The operator must know how to stop the machine quickly and understand the operation of all controls. Never permit anyone to operate the engine without proper instructions.

SAVE THESE INSTRUCTIONS

This manual should be considered a permanent part of the machine and should remain with it if machine is resold.

When ordering parts, please specify model and serial number. Use only identical replacement parts. This machine is to be used only by trained operators.

Important Safety Information

WARNING: To reduce the risk of injury, read operating instructions carefully before using.

AVERTISSEMENT: Pour réduire le risque de blessures, lire attentivement les instructions de fonctionnement avant l'utilisation.

1. Read the owner's manual thoroughly. Failure to follow instructions could cause malfunction of the machine and result in death, serious bodily injury and/or property damage.
2. Know how to stop the machine and bleed pressure quickly. Be thoroughly familiar with the controls.
3. Stay alert — watch what you are doing.
4. All installations must comply with local codes. Contact your electrician, plumber, utility company or the selling dealer for specific details. If your machine is rated 250 volts or less, single phase a ground fault circuit interrupter (GFCI) will be provided. If rated more than 250 volts, or more than single phase this product should only be connected to a power supply protected by a GFCI.

DANGER: Improper connection of the equipment-grounding conductor can result in a risk of electrocution. Check with a qualified electrician or service personnel if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the product - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. Do not use any type of adapter with this product.

DANGER: Une mauvaise connexion du conducteur de terre de l'équipement peut entraîner un risque d'électrocution. Vérifier auprès d'un électricien qualifié ou du personnel d'entretien si vous avez des doutes quant à savoir si la sortie est correctement mise à la masse. Ne pas modifier la fiche fournie avec le produit - si elle n'entre pas dans la sortie, faire installer une sortie appropriée par un électricien qualifié. Ne jamais utiliser un adaptateur avec ce produit.

WARNING: Must be plugged into properly wired three hole grounded outlet that accommodates plug on power cord. Failure to comply could result in electrical shock.

AVERTISSEMENT: Doit être raccordé dans une sortie à trois trous mise à la masse et correctement câblée qui peut accueillir une fiche sur un cordon d'alimentation. Le non-respect de cette consigne pourrait causer un choc électrique.

5. To protect the operator from electrical shock, the machine must be electrically grounded. It is the responsibility of the owner to connect this machine to a UL grounded receptacle of proper voltage and amperage ratings. Do not spray water on or near electrical components. Do not touch machine with wet hands or while standing in water. Always disconnect power before servicing.

WARNING: Flammable liquids can create fumes which can ignite, causing property damage or severe injury.

AVERTISSEMENT: Des liquides inflammables peuvent produire des vapeurs qui peuvent s'enflammer, causant ainsi des dommages à la propriété ou des blessures graves.

WARNING: Risk of explosion — Operate only where open flame or torch is permitted.

AVERTISSEMENT: Risque d'explosion Utiliser uniquement dans des endroits où l'utilisation d'une flamme nue ou d'une torche est permise.

6. In oil burning models, use only kerosene, No. 1 home heating fuel, or diesel. If diesel is used, add a soot remover to every tankful.

WARNING: Risk of fire — Do not add fuel when the product is operating or still hot.

AVERTISSEMENT: Risque d'incendie. Ne pas ajouter de carburant pendant que la machine fonctionne ou est encore chaude.

WARNING: Do not use gasoline crankcase draining or oil containing gasoline, solvents or

alcohol. Doing so will result in fire and/or explosion.

AVERTISSEMENT: Ne pas utiliser d'essence, de drainage du carter de moteur ou d'essence contenant de l'huile, de solvants ou de l'alcool. Agir de la sorte risquerait de créer un incendie et/ou une explosion.

7. Oil burning appliances shall be installed only in locations where combustible dusts and flammable gases or vapors are not present. Do not store or use gasoline near this machine.
8. Do not allow acids, caustic or abrasive fluids to pass through the pump.
9. Never run pump dry or leave spray gun closed longer than 1-2 minutes.
10. Keep operating area clear of all persons.

WARNING: High pressure spray can cause paint chips or other particles to become airborne and fly at high speeds. To avoid personal injury, eye, hand and foot safety devices must be worn. Always wear properly rated eye protection such as safety goggles or face shield while spraying.

(Safety glasses do not provide full protection.)
AVERTISSEMENT: Un jet haute pression peut écailler la peinture ou provoquer l'émission d'autres particules dans l'air et leur projection à hautes vitesses. Pour éviter les lésions corporelles, une protection des yeux, du visage, des mains et des pieds doit être portée lors de l'utilisation de cet équipement. Toujours porter une protection oculaire adaptée comme des lunettes étanches ou un écran facial pendant la pulvérisation. (Des lunettes de sécurité ne fournissent pas une protection complète.)

WARNING: Appropriate ear protection must be worn during operation.

AVERTISSEMENT: Une protection de l'ouïe appropriée doit être portée pendant le fonctionnement.

WARNING: Hot discharge fluid. Do not touch or direct discharge stream at persons or animals.

AVERTISSEMENT: Liquide de décharge chaud. Ne pas toucher ou décharger directement le jet vers des personnes ou des animaux, car cela risquerait de causer des blessures graves ou

même la mort.

WARNING: This machine produces hot water and must have insulated components attached to protect the operator.

AVERTISSEMENT: Cette machine produit de l'eau chaude et doit comporter des composants isolés attachés pour protéger l'opérateur.

WARNING: Risk of injury. Hot surfaces can cause burns. Use only designated gripping areas of spray gun and wand. Do not place hands or feet on non-insulated areas of the pressure washer.

AVERTISSEMENT: Risque de blessures. Les surfaces chaudes peuvent causer des brûlures. Utiliser uniquement

les zones de prise désignées du pistolet pulvérisateur et de la lance. Ne pas placer les mains ou les pieds sur des endroits non isolés de la laveuse à pression.

11. To reduce the risk of injury, close supervision is necessary when a machine is used near children. Do not allow children to operate the pressure washer. **This machine must be attended during operation.**

WARNING: Grip cleaning wand securely with both hands before starting. Failure to do this could result in injury from a whipping wand.

AVERTISSEMENT: Agripper la lance de nettoyage avec les deux mains avant de commencer. Le non-respect de cette consigne pourrait mener à des blessures causées par le

mouvement violent de la lance.

12. Never make adjustments on machine while in operation.
13. Be certain all quick coupler fittings are secured before using pressure washer.

WARNING: High pressure developed by these machines will cause personal injury or equipment damage. Keep clear of nozzle. Use caution when operating. Do not direct discharge stream at people or animals, or severe injury or death will result.

AVERTISSEMENT: La haute pression générée par ces machines causera des lésions corporelles ou des dommages à l'équipement. Se tenir à l'écart de la buse. Faire preuve de prudence lors de l'utilisation. Ne pas décharger directement le jet vers des personnes ou des animaux, car cela risquerait de causer des blessures graves ou même la mort.

WARNING: Protect machine from freezing.

AVERTISSEMENT: Protéger la machine contre le gel.

14. To keep machine in best operating conditions, it is important you protect machine from freezing. Failure to protect machine from freezing could cause malfunction of the machine and result in death, serious bodily injury, and/or property damage. Follow storage instructions specified in this manual.
15. Inlet water must be clean fresh water and no hotter than 90°F.

DANGER: Risk of asphyxiation.
Use this product only in a well ventilated area.

DANGER: Risque d'asphyxie.
Utiliser ce produit uniquement dans un endroit bien ventilé.

16. Avoid installing machines in small areas or near exhaust fans. Adequate oxygen is

needed for combustion or dangerous carbon monoxide will result

17. Manufacturer will not be liable for any changes made to our standard machines or any components not purchased from us.

18. The best insurance against an accident is precaution and knowledge of the machine.

WARNING: Be extremely careful
when using a ladder, scaffolding
or any other relatively unstable
location. The cleaning area
should have adequate slopes
and drainage to reduce the
possibility of a fall due to
slippery surfaces.

AVERTISSEMENT: Faire preuve
d'une extrême prudence au
moment d'utiliser une échelle,

des échafaudages ou toute autre surface
relativement instable. La zone de nettoyage doit
avoir une pente et un drainage adéquats pour
réduire la possibilité d'une chute due à une surface
glissante.

20. Do not overreach or stand on unstable support.
Keep good footing and balance at all times.

21. Do not operate this machine when fatigued or
under the influence of alcohol, prescription medica-
tions, or drugs.

WARNING: Do not spray machine,
people, animals or electrical
parts.

AVERTISSEMENT: Ne pas
vaporiser sur la machine ou les
gens, les animaux ou les pièces
électriques.

WARNING: If connection is made
to a potable water supply, this
machine shall be protected
against backflow.

AVERTISSEMENT: Si une
connexion est établie avec un
réseau d'eau potable, le réseau
doit être protégé contre le retour
d'eau.

WARNING: To prevent damage or injury -
Keep brake engaged during machine
operation and storage.

AVERTISSEMENT: Pour prévenir les dommages ou
les blessures - Garder le frein appliqué pendant le
fonctionnement et l'entreposage de la machine.

Follow the maintenance instructions
specified in the manual.

Suivre les instructions d'entretien
spécifiées dans le manuel.

Technical Specification

| Model # | Pump Volume @ Pump Head | Pump Pressure at Pump Head | Machine Voltage | Total Machine Amperage | Burner Type, Energy Input | Pressure @ Bleeder Valve (Pressure post- pump) PSI | Motor HP |
|---------|-------------------------|----------------------------|------------------|------------------------|---------------------------------|--|----------|
| 821 | 4 GPM | 2300 PSI | 208VAC/ 60Hz/1Ph | 33 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 6.2 |
| 842 | 4 GPM | 2000 PSI | 200VAC/ 60Hz/3Ph | 20 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 5.0 |
| 843 | 4 GPM | 2000 PSI | 230VAC/ 60Hz/1Ph | 29 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 5.0 |
| 844 | 4 GPM | 2000 PSI | 230VAC/ 60Hz/3Ph | 19 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 5.0 |
| 845 | 4 GPM | 2000 PSI | 460VAC/ 60Hz/3Ph | 10 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 5.0 |
| 851 | 4 GPM | 3000 PSI | 208VAC/ 60Hz/1Ph | 41 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 8.2 |
| 852 | 4 GPM | 3000 PSI | 208VAC/ 60Hz/3Ph | 25 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 7.5 |
| 853 | 4 GPM | 3000 PSI | 230VAC/ 60Hz/1Ph | 37 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 7.5 |
| 854 | 4 GPM | 3000 PSI | 208VAC/ 60Hz/1Ph | 25 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 7.5 |
| 855 | 4 GPM | 3000 PSI | 460VAC/ 60Hz/3Ph | 14 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 7.5 |
| 856 | 4 GPM | 3000 PSI | 575VAC/ 60Hz/3Ph | 11 Amps | Fuel Oil Fired, 381,000 BTU/Hr. | 185 (170) PSI | 8.2 |
| 873 | 5 GPM | 3000 PSI | 230VAC/ 60Hz/1Ph | 42 Amps | Fuel Oil Fired, 404,000 BTU/Hr. | 165 (150) PSI | 10 |
| 874 | 5 GPM | 3000 PSI | 230VAC/ 60Hz/3Ph | 29 Amps | Fuel Oil Fired, 404,000 BTU/Hr. | 165 (150) PSI | 10 |

Component Identification

Pump — Develops high pressure by pumping water volume through nozzle (Not shown).

Spray Gun — Controls the application of water and detergent onto cleaning surface with trigger device. Includes safety latch.

Detergent Metering Valve — Controls detergent mixture.

Wand — Must be connected to the spray gun.

GFCI — Provided on all single phase machines. Trips when there is current leakage.

Relief Valve — Opens when pressure exceeds factory setting above operating pressure.

High Pressure Hose — Connect one end to water pump discharge nipple and the other end to spray gun.

Pressure Nozzle — Inserted into wand quick coupler to develop pressure

Adjustable Thermostat — Prevents water temperature from exceeding high temperatures. Is not used to maintain constant temperature setting.

Oil Burner Assembly — Converts fuel oil from a liquid state into a combustible mixture.

Hose Reel Bracket — Mounts optional hose reel.

Operations

Assembly Instructions

Unpacking

Unpack carefully. Wear safety glasses or goggles while unpacking, assembling or operating pressure washer. If there are missing components or hidden damage immediately contact dealer or carrier concerning discrepancies.

1. Cut strapping band from pressure washer and pallet.
2. Remove pressure washer from pallet.

Parts Included

- Pressure Washer
- Pressure Hose
- Wand
- Hose Reel Mount W/Hardware
- Trigger Gun
- Operating Instructions and Parts Manual

Tools Required

10" Adjustable Crescent Wrenches (2 ea.)

Blade Screwdriver

Pressure Hose

1. Use teflon tape on plumbing connections to prevent leakage.
2. Install pressure hose on machine as shown.

Wand Components

1. Assemble wand components as shown. Connect pressure hose to trigger gun.

NOTE: The nozzle is not to be installed at this time.

2. Make sure that all plumbing connections are tight.

STEP 1: Attach a 5/8" water supply hose to inlet connector. Minimum flow should be 5 GPM depending on model of machine. Do not exceed 65 psi incoming water pressure.

STEP 2: Attach high pressure hose to discharge nipple using quick coupler. Lock coupler securely by pulling back coupler collar, inserting onto discharge nipple and pushing collar forward until secure.

STEP 3: Attach variable pressure control wand to spray gun using teflon tape on threads to prevent leakage.

STEP 4: Attach the high pressure hose to the spray gun using teflon tape on hose threads.

STEP 5: Before installing nozzle, turn on water supply and run machine allowing water to flush through the system until clear. Pull the spring-loaded collar of the wand coupler collar back to insert your choice of pressure nozzle.

CAUTION: Never replace nozzles without engaging the safety latch on the spray gun trigger.

ATTENTION: Ne jamais remplacer les buses sans d'abord mettre le dispositif de sécurité sur la détente du pistolet pulvérisateur.

STEP 6: Release the coupler collar and push the nozzle until the collar clicks. Pull the nozzle to make sure it is seated properly.

STEP 7: Check oil level by using supplied dip-stick. Use SAE 10W-40 non-foaming only.

STEP 8: Fill fuel oil tank. Do not confuse gasoline and fuel oil tanks. Keep proper fuel in proper tank.

Operations

Installation Instructions

Venting

CAUTION - RISK OF ASPHYXIATION: Do not run machine indoors or in an enclosed area without the required venting, as exhaust fumes may be hazardous to your health.

ATTENTION: Risque d'asphyxie: NE PAS faire fonctionner la machine à l'intérieur ou dans un endroit fermé sans une ventilation appropriée, car les gaz d'échappement pourraient comporter des dangers pour la santé.

CAUTION: All venting must be in accordance with applicable federal and state laws, and local ordinances. Consult local heating contractors.

ATTENTION: Toute la ventilation doit être conforme aux lois fédérales et de l'État ou de la province, et aux réglementations locales applicables.

If the pressure washer is to be used in an enclosed area, a flue must be installed to vent burner exhaust to the outside atmosphere. Exhaust gases should not be vented into a wall, a ceiling, or a concealed space of a building. Be sure the flue is the same size as the burner exhaust vent on the pressure washer. Poor draft will cause the pressure washer to soot and not operate properly. When selecting the location for installation, beware of poorly ventilated locations or areas where exhaust fans may cause an insufficient supply of oxygen available for the amount of fuel being burned. If it is necessary to install the machine in a poorly ventilated area, outside fresh air may have to be piped to the burner and a fan installed to bring sufficient air into the machine. Locate the pressure washer so that the flue will be as straight as possible and protrude through the roof at a proper height and location to provide adequate draft. This burner air setting must be adjusted to components for venting of exhaust gases which restrict air flow.

Burner Air Adjustment:

The oil burner on this machine is preset for operation at altitudes below 500 feet. If operated at higher altitudes, it may be necessary to adjust the air band for a #1 or #2 smoke spot on the Bacharach scale.

To adjust, start machine and turn burner ON. Loosen two locking screws found on the air band and close air band until black smoke appears from burner exhaust vent. Note air band position. Next, slowly open the air band until white smoke just starts to appear. Turn air band halfway back to the previously noted position. Tighten locking screws.

For higher altitudes, the air band opening may need to be increased; for lower altitude, the air band may need to be decreased.

For higher humidity, the air band opening may need to be increased; for lower relative humidity, the air band may need to be decreased.

For higher ambient temperatures the air band opening may need to be increased; for lower ambient temperatures, the air band opening may need to be decreased.

Adjust to your operating location's environment as needed for best smoke spot and performance compliant with local, state, and federal regulations.

Electrode Settings:

SR-Series gage: #8.717-379.0

Periodically Check Wiring Connections. If Necessary To Adjust Electrodes, Use Diagram.

CAUTION: If white smoke appears from burner exhaust vent during start-up or operation, discontinue use and readjust air bands.

ATTENTION: Si de la fumée blanche s'échappe de l'évacuation du brûleur pendant le démarrage ou le fonctionnement, cesser d'utiliser et réajuster les bandes d'air.

NOTE: If a flue is installed, have a professional serviceman adjust your burner for a #1 or #2 smoke spot on the Bacharach scale.

For additional burner component information, see **Burner Assembly Exploded View page**. It is recommended that the oil burner be serviced yearly or as needed. Contact your local service center.

Burner Fuel Adjustment

To adjust fuel pressure, First install a pressure gage into the port just after the pump fuel exit. Turn the adjusting screw (located at the regulator port) clockwise to increase, and counterclockwise to decrease. Do not exceed 200 psi or lower the pressure below 130 PSI, when checked at the post-pump pressure port.

The fuel pressure may need to be adjusted due to altitude. For every 500 ft altitude above sea level, the boiling point of water goes down 1 °F. At high altitude environments, this boiling point change may require the heat input to be lowered so the water input does not turn to steam earlier than at the factory settings and activate the pressure sensors and pressure relief equipment when the unit is operated and much higher altitudes from factory settings or local dealer site settings. Check with your dealer before making local site fuel pressure adjustments.

Also, as ambient temperature changes seasonally, the fuel temperature in the feed tank and air temperature inlet can impact fuel flow. In more extreme temperatures, this local-site adjustment may also require different fuel nozzles for fuel inlet temperatures that are at seasonal extremes (higher or lower) in locations where the temperature changes are beyond moderate temperatures of between 40°F and 90°F. Colder temperatures will make for a thicker flow and less fine a fuel spray while hotter temperatures will make for a thinner flow a more fine spray with the same nozzle. Consider alternate nozzle configurations from the baseline factory-supplied nozzle for operating in such temperature extremes if performance is not meeting needs with air band and fuel pressure settings alone.

NOTE: When changing fuel pump, a by-pass plug must be installed in return line port or fuel pump will not prime.

Water Supply

Connect water supply hose to water inlet. The water faucet and supply hose must be capable of providing a minimum of 4.0 gallons per minute (GPM) and a maximum pressure of 65 psi.

Electrical

WARNING: Make sure all switches and controls are in the OFF position prior to connecting electrical supply.

AVERTISSEMENT: S'assurer que tous les commutateurs et tous les contrôles se trouvent en position d'arrêt avant de raccorder l'alimentation électrique.

WARNING: DO NOT stand in water while connecting and disconnecting electrical supply.

AVERTISSEMENT: NE PAS se tenir debout dans l'eau au moment de brancher ou de débrancher l'alimentation électrique.

WARNING: Always disconnect power before servicing your pressure washer.

AVERTISSEMENT: Toujours débrancher l'alimentation avant d'effectuer des opérations d'entretien sur la machine.

IMPORTANT: Consult local building codes for exact electrical requirements. Licensed contractors may be required.

IMPORTANT: This machine must be electrically grounded. LA MACHINE DOIT ÊTRE MISE À LA TERRE.

Grounding Instructions:

This product must be electrically grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances.

DANGER: Improper connection of the equipment grounding conductor can result in a risk of electrocution. Check with a qualified electrician or service personnel if you are in doubt as to whether the outlet is properly grounded.

DANGER: Une mauvaise connexion du conducteur de terre de l'équipement peut entraîner un risque d'électrocution. Vérifier auprès d'un électricien qualifié ou du personnel d'entretien si vous avez des doutes quant à savoir si la sortie est correctement mise à la masse.

Operations

DANGER: Do not modify the plug provided with the product - if it will not fit the outlet, have a proper outlet installed by a qualified electrician. DO NOT use any type of adapter with this product.

DANGER: Ne pas modifier la fiche fournie avec le produit - si elle n'entre pas dans la sortie, faire installer une sortie appropriée par un électricien qualifié. Ne jamais utiliser un adaptateur avec ce produit.

WARNING: To reduce the risk of electrocution, keep all connections dry and off the ground. DO NOT touch plug with wet hands.

AVERTISSEMENT: Pour réduire le risque d'électrocution, garder toutes les connexions sèches et dégagées du sol. NE PAS toucher la fiche avec des mains mouillées.

Operations Instructions

Before Starting

1. Read all manuals provided with this pressure washer. Become familiar with location and function of all operating and safety controls.

DANGER: Improper wiring connections of equipment can result in a risk of electrocution. Check with a qualified electrician or service personnel if you are in doubt as to whether the outlet is properly grounded.

DANGER: Des connexions de câble fautives de l'équipement peuvent entraîner un risque d'électrocution. Vérifier auprès d'un électricien qualifié ou du personnel d'entretien si vous avez des doutes quant à savoir si la sortie est correctement mise à la masse.

WARNING: Check hoses, fittings, wand, trigger gun and fuel connections daily for signs of wear, cracks and looseness, and replace as required.

AVERTISSEMENT: Vérifier les boyaux, les raccords, le pistolet à gâchette et les connexions de carburant pour la présence de traces d'usure, de fissures et de desserrement; remplacer au besoin.

2. Connect water supply hose to the standard garden hose connector. The water faucet and supply hose must be capable of providing 4.0 GPM.
3. Fill oil burner fuel tank. Use kerosene, #1 grade home heating oil, #1 or #2 diesel fuel.

IMPORTANT: Do not use gasoline, crankcase draining, used oil or oil containing gasoline or solvents.

Ne pas utiliser d'essence, de produits de vidange ni d'huile contenant de l'essence ou des solvants.

4. Check pump oil level.
5. If detergents are to be used, only use detergents intended for pressure washers. Follow instructions on the detergent container.

IMPORTANT: Before installing pressure nozzle on initial start-up, turn on the water supply, start the pump by pressing the pump ON switch, and hold the trigger gun open until water appears at the end of the wand. Allow water to run from the end of the wand until clear to prevent the nozzle from clogging.

IMPORTANT: If the pressure washer has not been used for an extended period of time, remove the pressure nozzle from the end of the wand and turn on water supply, and start the pump by pressing the pump ON switch. Hold the trigger gun open and allow water to run from the end of the wand until clear.

6. Install the pressure nozzle on end of wand, refer to figure below.

IMPORTANT: The trigger gun provided with this pressure washer is equipped with a manual trigger lock to prevent accidental operation of the trigger gun, refer to figure above. The trigger lock should be used whenever the trigger gun is not in use.

To Start

WARNING: Risk of injection or severe injury - Keep clear of nozzle - DO NOT direct discharge stream at persons - This machine is to be used only by qualified operators.

AVERTISSEMENT: Risque d'injection et de blessures graves. se tenir à l'écart du jet. Ne pas diriger le jet de sortie vers d'autres personnes. Confier l'utilisation de ce matériel à un opérateur qualifié.

WARNING: Wear eye, ear, hand, foot and skin protection at all times while operating pressure washer.

AVERTISSEMENT: Porter une protection des yeux, des mains, des pieds et de la peau en tout temps en utilisant la laveuse à pression.

WARNING: Before changing pressure nozzle, engage manual trigger gun lock.

AVERTISSEMENT: Avant de changer le buse de projection, engager le dispositif de verrouillage manuel du pistolet à gâchette.

IMPORTANT: The water must be turned on before starting. Running the pump dry will cause damage and void warranty.

IMPORTANT: Do not allow the machine to run with trigger of the trigger gun released for more than 10 minutes at any one time or damage to pump may occur.

1. If equipped with a GFCI, test the GFCI using the reset and test procedures provided on the GFCI device. The GFCI must be tested with every use.
2. Turn ON water supply.
3. Hold wand firmly, release trigger of trigger gun and turn pump switch ON. Squeeze trigger of trigger gun and allow air to purge from system.
4. If HOT water is desired, adjust the thermostat to the proper temperature and turn burner switch ON. The burner will light immediately with a small puff of smoke. You may need to initially adjust your burner for peak performance. See **Oil Burner** section under **Installation**. If smoke continues, refer to the **Troubleshooting Guide** in this manual. When the trigger of the trigger gun is released or when the thermostat temperature setting is reached, the burner will automatically turn off.

IMPORTANT: If ignition or flame failure is experienced, discontinue use of pressure washer at once. Turn off burner and shut off fuel supply. Have cause of failure corrected by an authorized service technician before use of pressure washer is continued.

To Clean

1. Insert detergent inlet line into container of mixed detergent. Open detergent ON/OFF valve. The detergent will be pulled automatically into the system. Allow detergent to reach end of wand before proceeding to step 3.
2. Select pressure nozzle with spray pattern that matches your cleaning needs. Engage manual trigger lock and install selected nozzle.
3. Wash from the bottom to the top, using side to side motions. This washes away heavy dirt and allows the detergent to soak as you work toward the top.
4. Do not wash at a 90° angle to the work (straight at it). This will allow water to splash back at you and reduces your cleaning power. Wash at a 30° to 60° angle to the work. This will allow the water to splash away from you and the water will wash the dirt away faster and easier.
5. Use the width of the spray pattern to wash in a wide path. Overlap spray paths for complete coverage. Wash from side to side, using slow, steady motions.
6. The nozzle should be 12" to 24" from work, closer for tough areas. Be careful on painted or delicate surfaces, the pressure may damage surface if nozzle is too close.
7. Small parts should be washed in a basket so the pressure does not push them away. Larger, light weight parts should be clamped down so the pressure does not push them away.
8. Close the detergent ON/OFF valve to permit rinse. Always rinse with cold water after using detergents. Rinse from the top to the bottom to prevent detergent from dripping onto a rinsed area. For the best results, contact your Hotsy dealer to help you select the best detergent for your application.

Operations

Operations Instructions

STEP 1: Turn on the water. Check for water leaks, tighten as needed.

STEP 2: Plug unit into power source, push reset button on GFCI, then activate pump switch

STEP 3: With the spray nozzle pointed away from you or anybody else, press the trigger on the spray gun to obtain pressurized cold water spray.

STEP 4: For hot water, turn the thermostat knob to 210° then push the burner switch to ON when a steady stream of water flows out of the spray gun. Burner will now light automatically. **NOTE:** Do not start machine with burner switch on.

STEP 5: For steam, open the steam valve counterclockwise. This lowers the pressure and raises the temperature.

STEP 6: The four color-coded quick connect nozzles provide a wide array of spray widths from 15° to 40° and are easily accessible when placed in the convenient rubber nozzle holder, which is provided on the front of the machine. **NOTE:** For a more gentle rinse, select the white 40° nozzle. To scour the surface, select the yellow 15° nozzle.

Detergents & General Washing Techniques

WARNING

WARNING: Some detergents may be harmful if inhaled or ingested, causing severe nausea, fainting or poisoning. The harmful elements may cause property damage or severe injury.

AVERTISSEMENT: Certains détergents peuvent être dangereux s'ils sont inhalés ou ingérés, provoquant de fortes nausées, des évanouissements et l'empoisonnement. Les éléments dangereux peuvent causer des dommages à la propriété ou des blessures graves.

STEP 1: Use detergent designed specifically for pressure washers. Household detergents could

damage the pump. Prepare detergent solution as required by the manufacturer. Fill a container with pressure washer detergent. Place the filter end of detergent suction tube into the detergent container.

STEP 2: With the engine running, pull trigger to operate machine. Liquid detergent is drawn into the machine and mixed with water. Apply detergent to work area. Do not allow detergent to dry on surface.

IMPORTANT: You must flush the detergent after each use by placing the suction tube into a bucket of clean water, open detergent valves then run the pressure washer for 1-2 minutes.

Thermal Pump Protection

If you run your pressure washer for 3-5 minutes without pressing the trigger on the spray gun, circulating water in the pump can reach high temperatures. When the water reaches this temperature, the pump protector

engages and cools the pump by discharging the warm water onto the ground. This thermal device prevents internal damage to the pump.

Cleaning Tips

Pre-rinse cleaning surface with fresh water. Place detergent suction tube directly into cleaning solution and apply to surface at low pressure (for best results, limit your work area to sections approximately 6 feet square and always apply detergent from bottom to top). Allow detergent to remain on surface 1-3 minutes. Do not allow detergent to dry on surface. If surface appears to be drying, simply wet down surface with fresh water. If needed, use brush to remove stubborn dirt. Rinse at high pressure from top to bottom in an even sweeping motion keeping the spray nozzle approximately 1 foot from cleaning surface. Use overlapping strokes as you clean and rinse any surface. For best surface cleaning action spray at a slight angle.

Recommendations:

- Before cleaning any surface, an inconspicuous area should be cleaned to test spray pattern and distance for maximum cleaning results.
- If painted surfaces are peeling or chipping, use extreme caution as pressure washer may remove the loose paint from the surface.
- Keep the spray nozzle a safe distance from the surface you plan to clean. High pressure wash a small area, then check the surface for damage. If no damage is found, continue to pressure washing.

CAUTION - Never use:

- Bleach, chlorine products and other corrosive chemicals
- Liquids containing solvents (i.e., paint thinner, gasoline, oils)
- Tri-sodium phosphate products
- Ammonia products and acid-based products

ATTENTION: Ne jamais utiliser:

- Insecticides, pesticides ou herbicides
- Eau de Javel, produits à base de chlore et autres produits chimiques corrosifs
- Liquides contenant des solvants (c.-à-d. diluant à peinture, essence, huiles, etc.)
- Produits à base de tripolyphosphate de sodium
- Ammoniac ou produits à base d'acide

These chemicals will harm the machine and will damage the surface being cleaned.

Rinsing

It will take a few seconds for the detergent to clear. Apply safety latch to spray gun and close detergent valve. Select and install the desired high pressure nozzle.

Operations

Shut Down And Clean Up

STEP 1: Remove detergent suction tube from container and insert into one gallon of fresh water. Open detergent valve, pull trigger on spray gun and siphon water for one minute.

STEP 2: Close spray gun trigger, then turn burner switch off. Pull spray gun trigger allowing the water to cool to below 100° before turning off pump switch.

STEP 3: Turn pump switch off.

STEP 4: Turn off water supply.

STEP 5: Squeeze trigger on spray gun to relieve remaining pressure.

Storage

CAUTION: Always store your pressure washer in a location where the temperature will not fall below 32°F (0°C). The pump in this machine is susceptible to permanent damage if frozen. **FREEZE DAMAGE IS NOT COVERED BY WARRANTY.**

ATTENTION: Toujours entreposer la laveuse à pression dans un endroit où la température ne sera pas inférieure à 0 °C (32 °F). La pompe sur cette machine est susceptible de subir des dommages si elle est exposée au gel. **LES DOMMAGES DUS AU GEL NE SONT PAS COUVERTS PAR LA GARANTIE.**

1. Stop the pressure washer, squeeze spray gun trigger to release pressure.
2. Detach water supply hose and high pressure hose.
3. Turn on the machine for a few seconds, until remaining water exits. Turn engine off immediately.
4. Drain the fuel and oil from the engine.
5. Do not allow high pressure hose to become kinked.
6. Store the machine and accessories in a room which does not reach freezing temperatures.

CAUTION: Failure to follow the above directions will result in damage to your pressure washer.

ATTENTION: Le non-respect des directives ci-dessus entraînera des dommages à la laveuse à pression.

When the pressure washer is not being operated or is being stored for more than one month, follow these instructions:

1. Replenish engine oil to upper level.

2. Drain diesel from fuel tank, fuel line, fuel valve and carburetor.
3. Cover the pressure washer and store in a clean, dry place that is well ventilated away from open flame or sparks.

After Extended Storage

CAUTION: Prior to restarting, thaw out any possible ice from pressure washer hoses, spray gun or wand.

ATTENTION: Avant de redémarrer, faire fondre la glace se trouvant sur les boyaux, le pistolet pulvérisateur ou la lance de la laveuse à pression.

DANGER: Do not store flammable liquids (gasoline, fuel oil, petroleum, solvents, etc.) near pressure washer, or in non-ventilated areas.

DANGER: Ne pas entreposer de liquides inflammables (essence, mazout, pétrole, solvants, etc.) à proximité de la laveuse à pression ou dans des endroits non ventilés.

IMPORTANT: Machine must be stored indoors.

1. Protect from freezing by storing in a heated area, or by flushing the system with antifreeze (use an automotive engine antifreeze or windshield washer solvent to antifreeze). To flush the system fill the float tank with antifreeze and remove pressure nozzle from wand. Start the machine and allow it to run until antifreeze runs from the end of the wand. Place wand into float tank and circulate the solution through system for several minutes. Open and close the trigger gun several times to circulate antifreeze through the

unloader valve system. Also draw antifreeze through the detergent inlet line to antifreeze the detergent system. For added protection after antifreezing, disconnect the pressure hose from machine and remove the coil drain plug. After coil has drained, replace pressure hose and coil drain plug. If the pressure washer is not to be used for an extended length of time, it is recommended that the system be flushed with antifreeze for rust protection.

WARNING: Unauthorized machine modification or use of non-approved replacement parts may cause personal injury and/or property damage and will void the manufacturer warranty.

AVERTISSEMENT: Une modification non autorisée de la machine ou l'utilisation de pièces de rechange non approuvées peut causer des lésions corporelles et/ou des dommages à la propriété, et annulera la garantie du fabricant.

IMPORTANT: Machine must be stored indoors.

Pump

Use Hotsy Pump Oil P/N 8.923-422.0 or equivalent 10W-40 Non-Foaming oil for pump crankcase. Crankcase must be filled to the full mark on the dipstick or to center of sight glass window found on the rear of the pump. During the break-in-period, make sure the oil is changed after the first 50 hours of operation. After that, replace oil every year or 500 hours of operation, whichever comes first.

Proper Pump Care:

- **DO NOT** pump acids.
- **DO NOT** allow pump to run dry.
- Winterize if storing in freezing temperatures, refer to **Storage** for details.
- Use a water softener on the water system if known to be high in mineral content.
- Use only high quality detergents and follow manufacturer's mix recommendations.
- Flush the system with clear water immediately after using detergent solutions.
- Clean filter screen on detergent inlet line periodically.

- Flush the pressure washer system with antifreeze if storing for an extended period of time, refer to **Storage** for details.

Pump Motor

On a yearly basis, oil pump motor per instructions on motor nameplate.

NOTE: Some motors may be equipped with permanently lubricated bearings and will not require additional lubrication.

Relief Valve

WARNING: The relief valve on this pressure washer has been factory set and sealed and is a field nonadjustable part. Tampering with the factory setting may cause personal injury and/or property damage, and will void the manufacturer warranty.

AVERTISSEMENT: La soupape de décharge sur cette laveuse à pression a été réglée en usine, puis scellée, et est une pièce non réglable. L'altération du paramètre de l'usine pourrait causer des lésions corporelles et/ou des dommages à la propriété, et annulera la garantie du fabricant.

Unloader Valve

WARNING: The unloader valve on this pressure washer has been factory set and sealed and is a field nonadjustable part. Tampering with the factory setting may cause personal injury and/or property damage, and will void the manufacturer warranty. For replacement refer to Pump Assembly page.

AVERTISSEMENT: La soupape de décompression sur cette laveuse à pression a été réglée en usine, puis scellée, et est une pièce non réglable. L'altération du paramètre de l'usine pourrait causer des lésions corporelles et/ou des dommages à la propriété, et annulera la garantie du fabricant. Pour des pièces de rechange, se référer page d'assemblage de la pompe

Burner Fuel Filter

Drain any water which has accumulated in fuel filter and clean or replace filter element as needed.

Heating Coil

Coil De-scaling: In hard water areas, scale buildup within the heating coil will occur. Scale deposits will decrease the water temperature rise and may eventually clog the heating coil. Contact your local service center when de-scaling is needed.

Coil De-sooting: Poor grades of fuel oil or inadequate combustion air will cause heavy soot buildup on the outside surface of the heating coil. These deposits will insulate the coil. This will restrict the air flow through the coil, further aggravating the soot buildup. Contact your local service center when de-sooting is needed.

Brake

Every 50 hours inspect brake components for proper operation. Repair or replace if needed.

Troubleshooting

| PROBLEM | POSSIBLE CAUSE | SOLUTION |
|---|---|---|
| PRESSURE WILL NOT RUN | Pump switch in OFF position | Place switch in ON position. |
| | Power supply disconnected | Connect power supply. |
| | Fuse blown or circuit breaker tripped in electrical supply line | Replace fuse or reset circuit breaker. Use only fuses of adequate capacity. |
| | Motor circuit overload tripped | Reset pump switch. |
| PRESSURE RUNS BUT WON'T SPRAY | Trigger of trigger gun released | Squeeze trigger. |
| | Water supply not turned on | Open water supply valve. |
| | Clogged pressure nozzle | Clean pressure nozzle opening. |
| LOW SPRAY PRESSURE AT NOZZLE | Inadequate water supply | Fully open faucet. Check for kinked or damaged hose. Use 5/8 inch minimum hose. Check for debris clogging inlet screen. |
| | Partially clogged or damaged pressure nozzle | Clean or replace. |
| | Air being drawn through detergent inlet line | Refill detergent container. Ensure that pick-up screen is fully immersed. |
| UNEVEN SPRAY PATTERN | Partially clogged or damaged nozzle | Clean or replace. |
| PRESSURE WASHER WILL NOT PRODUCE HOT WATER | Burner switch in OFF position | Place switch in ON position. |
| | Inadequate fuel supply | Refill fuel tank. Use only recommended fuels. Refer to Before Starting under Operation . |
| | Pump switch turned off | Pump must be running before burner will light. |
| | Inadequate water supply | Fully open faucet. Check for kinked or damaged hose. Use 5/8 inch minimum hose. Check for debris clogging inlet screen. |
| | Trigger of trigger gun released | Squeeze trigger. Water must be spraying for burner to light. |
| POOR OR NO DETERGENT FLOW | Inadequate detergent supply | Refill detergent container. Ensure that pick-up screen is full immersed. Open metering valve. |
| | Detergent screen or hose clogged | Clean. Always start with a clean detergent container. |
| | Clogged detergent valve | Clean. |
| MACHINE SMOKES WHILE BURNER UNIT IS RUNNING OR UNIT SMOKES AT COLD START ONLY WHEN BURNER IS OFF | Improper fuel or water in fuel | Drain tank and replace contaminated fuel |
| | Fuel pressure is low <140 psi for burner | Adjust fuel pump pressure to specifications |
| | Burner nozzle is plugged or dirty | Replace nozzle. Check parts breakdown for nozzle size |
| | Burner nozzle spray pattern is faulty | Replace nozzle. Check parts breakdown for nozzle size |
| | Heavy accumulation of soot on coils and burner assembly | Remove coils and burner assembly, clean thoroughly Call local dealer |
| | Misaligned electrode setting | Realign electrodes to specifications |
| | Obstruction in smoke stack | Check for insulation blockage or other foreign objects |

| PROBLEM | POSSIBLE CAUSE | SOLUTION |
|---|---|---|
| MACHINE SMOKES WHILE BURNER UNIT IS RUNNING OR UNIT SMOKES AT COLD-START ONLY WHEN BURNER IS OFF CONTINUED | Low engine RPM | Increase RPM to correct specs. See serial plate |
| | Fuel Pressure is too high for clean burn (fuel PSI above 140 and below 200) and smokes when burner is off | Reduce fuel pressure PSI/Increase air band set for cleaner without max water heat loss |
| POOR CLEANING | Improper detergent concentration or mixing | Mix detergent per manufacturer's instructions. Ensure that powdered detergents are fully dissolved. |
| | Wrong detergent for the application | Select appropriate detergent. |
| | Rinsing with hot water | A final rinse with cold water will reduce water spotting. |

IMPORTANT

If the pressure washer demonstrates other symptoms or the corrective actions listed do not correct the problem, contact the local authorized Hotsy Service Center. The Hotsy Service Center can be identified by visiting **www.hotsy.com**.

IMPORTANT

When ordering from your dealer, please provide the following:

Model Number: _____ **Release:** _____

Machine Serial Number: _____

Component Part Number: _____

Description: _____

800 OIL-FIRED SERIES OPTIONAL EQUIPMENT

924889 8" Draft Regulator

If you need **SERVICE** on your pressure washer, contact your local Hotsy dealer or visit www.Hotsy.com. Smart phone users scan the code below to link directly to the Service Request page.

To **REGISTER** your pressure washer, please visit our Warranty Registration page at www.hotsy.com/WarrantyRegistration.aspx or scan the code below with your smart phone.
