

KÄRCHER

ALL OR NOTHING.

CLEANLINESS IS NOT EVERYTHING...

... But without cleanliness, nothing means a thing. Whether in restaurants or catering companies: high hygiene and cleanliness standards make the difference, create trust and play a decisive role in customer satisfaction. It is therefore only logical that caterers worldwide rely on Kärcher's efficient and effective cleaning solutions. Our customized machines for indoor, outdoor, kitchen and sanitary facilities are just as impressive as our diverse service portfolio, which stretches from maintenance all the way to financial services.

Contents:

- 4 In front of the door
- 6 Entrance and dining areas
- 8 Kitchens
- 10 Sanitary areas

LOVE AT FIRST SIGHT

Cleaning professionals know how important the first impression is. In these first moments, customers instinctively decide whether they feel comfortable or not. Clean and well-kept patios, entrance areas, paths and parking spaces create trust and a sense of well-being in those initial moments.

HDS Upright Class

From cleaning dumpsters to removing gum from sidewalks, the HDS Upright Class of pressure washers are sure to give the performance you are looking for. With its outstanding maneuverability and intuitive operation, this machine is perfect for outdoor cleaning.

FR Basic surface cleaner

Whether indoor or outdoor, our surface cleaner will give you the upper hand when it comes to dirty floors. Connected to our compact high-pressure cleaner, the FR Basic will ensure quick cleaning results.

KM 70/20 C sweeper

Sweeping outdoor areas can even be fun! You can cover up to 2,800 m² per hour up to six times faster than with a broom - almost completely without dust, thanks to the intelligent and controlled airflow and filtering. The height-adjustable main roller enables the compact and manoeuvrable machine to be easily adjusted to suit different surfaces.

Jarvis

One-step solution. The Jarvis Series is a complete solution for quick, streak-free cleaning of businesses' entrances, parking lots, tennis courts, pool decks and sidewalks. This easy to use cold water surface cleaner pressure washer is an all-in-one unit with the pump and engine attached to the surface cleaner, and it is designed to attack the superficial dirt sweeping alone does not get. The Jarvis series surface cleaner pressure washer is perfect for all operators - simple on / off operation, flat free tires and a folding handle for easy transport and storage.

CLEANING IS A NEVER-ENDING TASK.

The entrance and dining area are the most heavily frequented areas of a restaurant and require a high level of attention for cleaning. Furniture often makes it difficult to reach corners or angles. Thorough cleaning after closing time can therefore be quite a task.

A task that you will master easily with our machines, which are specially adapted to these conditions. And your guests will love it!

T 12/1 dry vacuum cleaner

Compact, manoeuvrable and extremely powerful: this vacuum makes cleaning work a breeze. The eco!efficiency version even offers energy savings of 40% and is extremely quiet (56 dB[A]).

EB 30/1 Li-ion electric broom

This cable-free, battery-driven electric broom is quick and easy to use. It can be stowed away just as quickly.

BR 30/4 C scrubber drier

This scrubber drier combines great cleaning results with easy operation and manoeuvrability. A roller spinning at 1,300 rpm, contact pressure that is around ten times higher compared with conventional mopping, as well as efficient suction ensure clean and dry hard floors that can be walked on again immediately.

BD 38/12 C Bp scrubber drier

Where space is limited but small and heavily furnished areas need to be cleaned, our battery-powered scrubber drier really shines. The lithium-ion batteries are absolutely maintenance-free, quick to recharge and have a service life around three times longer than lead batteries. The standard eco!efficiency mode has even lower energy requirements, and is 3 dB(A) quieter. On top of this, the machine is extremely easy to operate and extremely mobile thanks to its low weight.

BY PROFESSIONALS, FOR PROFESSIONALS

The kitchen. The heart of every restaurant and catering company. Everything is decided here. This is where the cooking, frying, sautéing and flambéing happens, in order to satisfy the guests and customers. Less appetising, however, are the inevitable side effects of these processes. Grease films on surfaces, burnt material on stoves and splatters of sauce on the floor do not stand a chance against our innovative solutions.

SG 4/4 steam cleaner

The SG 4/4 works entirely using the power of steam, without chemical additives. Floors, work surfaces, wall tiles and kitchen equipment are hygienically cleaned thanks to 4-bar steam pressure. You can easily adjust the steam flow and steam saturation to suit the task at any time, thereby achieving optimal results.

BR 40/10 C Adv scrubber drier

Thorough floor cleaning in restaurant kitchens is very difficult. The dirt is often stubborn and the area is often narrow, but everything still has to be clean. The BR 40/10 is perfectly suited to working in kitchens. It cleans with a high contact pressure and is extremely powerful - both forwards and backwards. It is also compact, manoeuvrable and suitable for passing under low objects.

HD 2.3/14 C Ed Food

This pressure washer is compact, mobile and designed to run with hot or cold water. The FRV surface cleaner helps clean surfaces without backsplash.

HYGIENE. WITHOUT IFS AND BUTS.

Untidy or even dirty sanitary areas are an absolute nightmare for caterers and guests, and this alone is enough to put the whole restaurant visit in a bad light. We want to avoid this. Therefore, we offer you a wide range of machines and cleaning agents which allow you to clean sanitary facilities more effectively and more easily. Your guests will rest easy knowing that they chose just the right place in all respects.

Window Vacuum for smooth, flat surfaces

Our handheld, professional WVP 10 window- and surface vacuum cleaner impresses with high-quality components such as the high-speed motor which delivers significantly higher suction performance than conventional machines. The result is streak-free surfaces, whether you use the window- and surface vacuum cleaner as a window vacuum or to clean tiles, mirrors, display cabinets, counters or any other smooth surface. Horizontal and vertical cleaning alike.

Mechanical cleaning

For deep cleaning of furnishings, tiles and floors in your sanitary rooms, we recommend the SG 4/4 steam cleaner as well as the battery-powered BR 30/4 C Bp scrubber drier. While the SG 4/4 reliably removes limescale from fittings, for example, the BR 30/4 C Bp shines in small spaces thanks to its manoeuvrability. PS 4/7 - Misting provides higher efficacy by improving coverage more efficiently than spray and wipe methods.

makes a difference
