KÄRCHER

EASY!FORCE: ZERO FORCE. FULL POWER. NO FATIGUE.

Intuitive Safety Lock

Ensures highest application safety. Preventing unintentional operation and offering maximum safety during use.

Zero Holding Force

Fatigue-free instead of energy sapping. Working with high-pressure cleaners is physically demanding. Our EASY!Force technology changes this once and for all. No more holding force.

Safety Trigger

The EASY!Force trigger gun prevents unintentional operation and offers maximum safety during use, without compromising on ease of use. You only need to press the trigger once to release the high-pressure jet, making it intuitive and simple.

Gun Ergonomics

Your hand and arm can be held in a more comfortable position. Kickback from the lance doesn't hit the arm, hand and joints.

EASY!Lock

With our patented EASY!Lock system, setup times are dramatically reduced compared to a traditional thread system. This makes it 5x faster to connect or disconnect accessories.

THE PATENTED EASY!FORCE HIGH-PRESSURE TRIGGER GUN IS DESIGNED FOR EFFORTLESS, ERGONOMIC AND STRESS-FREE USE.

The EASY!Force trigger gun is revolutionising high-pressure cleaning with its game changing mechanical design. The EASY!Force trigger gun is built in such a way where the water control trigger is at the back of the handle instead of the front. Recoil from the water pressure pushes the trigger on the back of the handle into the middle of the hand. This eliminates the need to form a fist and pull a trigger, which makes for zero holding force being required.

"Great for my shoulder. It has never been so easy to clean."

The EASY!Force trigger gun technology has relieved my hand and shoulder pain, helping me to clean for longer. Not having to squeeze the gun handle has helped alleviate all those muscle pains I was getting from using my old gun when cleaning. The EASY!Lock technology makes it so easy for me to switch between accessories, saving lots of time when cleaning those big jobs."

Grant Baker, NSW
