### Expert opinion

The testing of the virus-inactivating properties of the **steam cleaner Professional SG 4/4** with floor nozzle and cleaning cloth was carried out in a practical test with mechanical action (4-field test) in accordance with DIN EN 16615:2015-06 (phase 2 / level 2 test) under clean conditions (0.3 g/l BSA). The statement LI-020-519 is based on the following test reports:

- LI-020-342 (Murines Norovirus, strain S99)
- LI-020-445 (Adenovirus type 5, strain Adenoid 75)

In summary, it can be said that the **steam cleaner Professional SG 4/4** with floor nozzle and cleaning cloth in the practical 4-field test with mechanical action at a speed of 30 cm/s reduces the test viruses of the declaration limited spectrum of virucidal activity.

**Recommendation for the use of steam cleaner Professional SG 4/4 with floor nozzle and cleaning cloth for surface disinfection with mechanical action:**

Declaration	Interfering substance	Cleaning cloth	Speed
Limited spectrum of Virucidal Activity Enveloped Viruses plus adeno-, noro- and rotaviruses	clean conditions	100 % cotton	30 cm/s
