

A man with long hair and glasses, wearing a black jacket, is seen from the side, looking towards a large glass facade. He is using a long-handled cleaning tool with a blue brush head. The facade is made of large glass panels held together by a metal grid. The background is a clear blue sky. The overall scene is bright and clean.

KÄRCHER

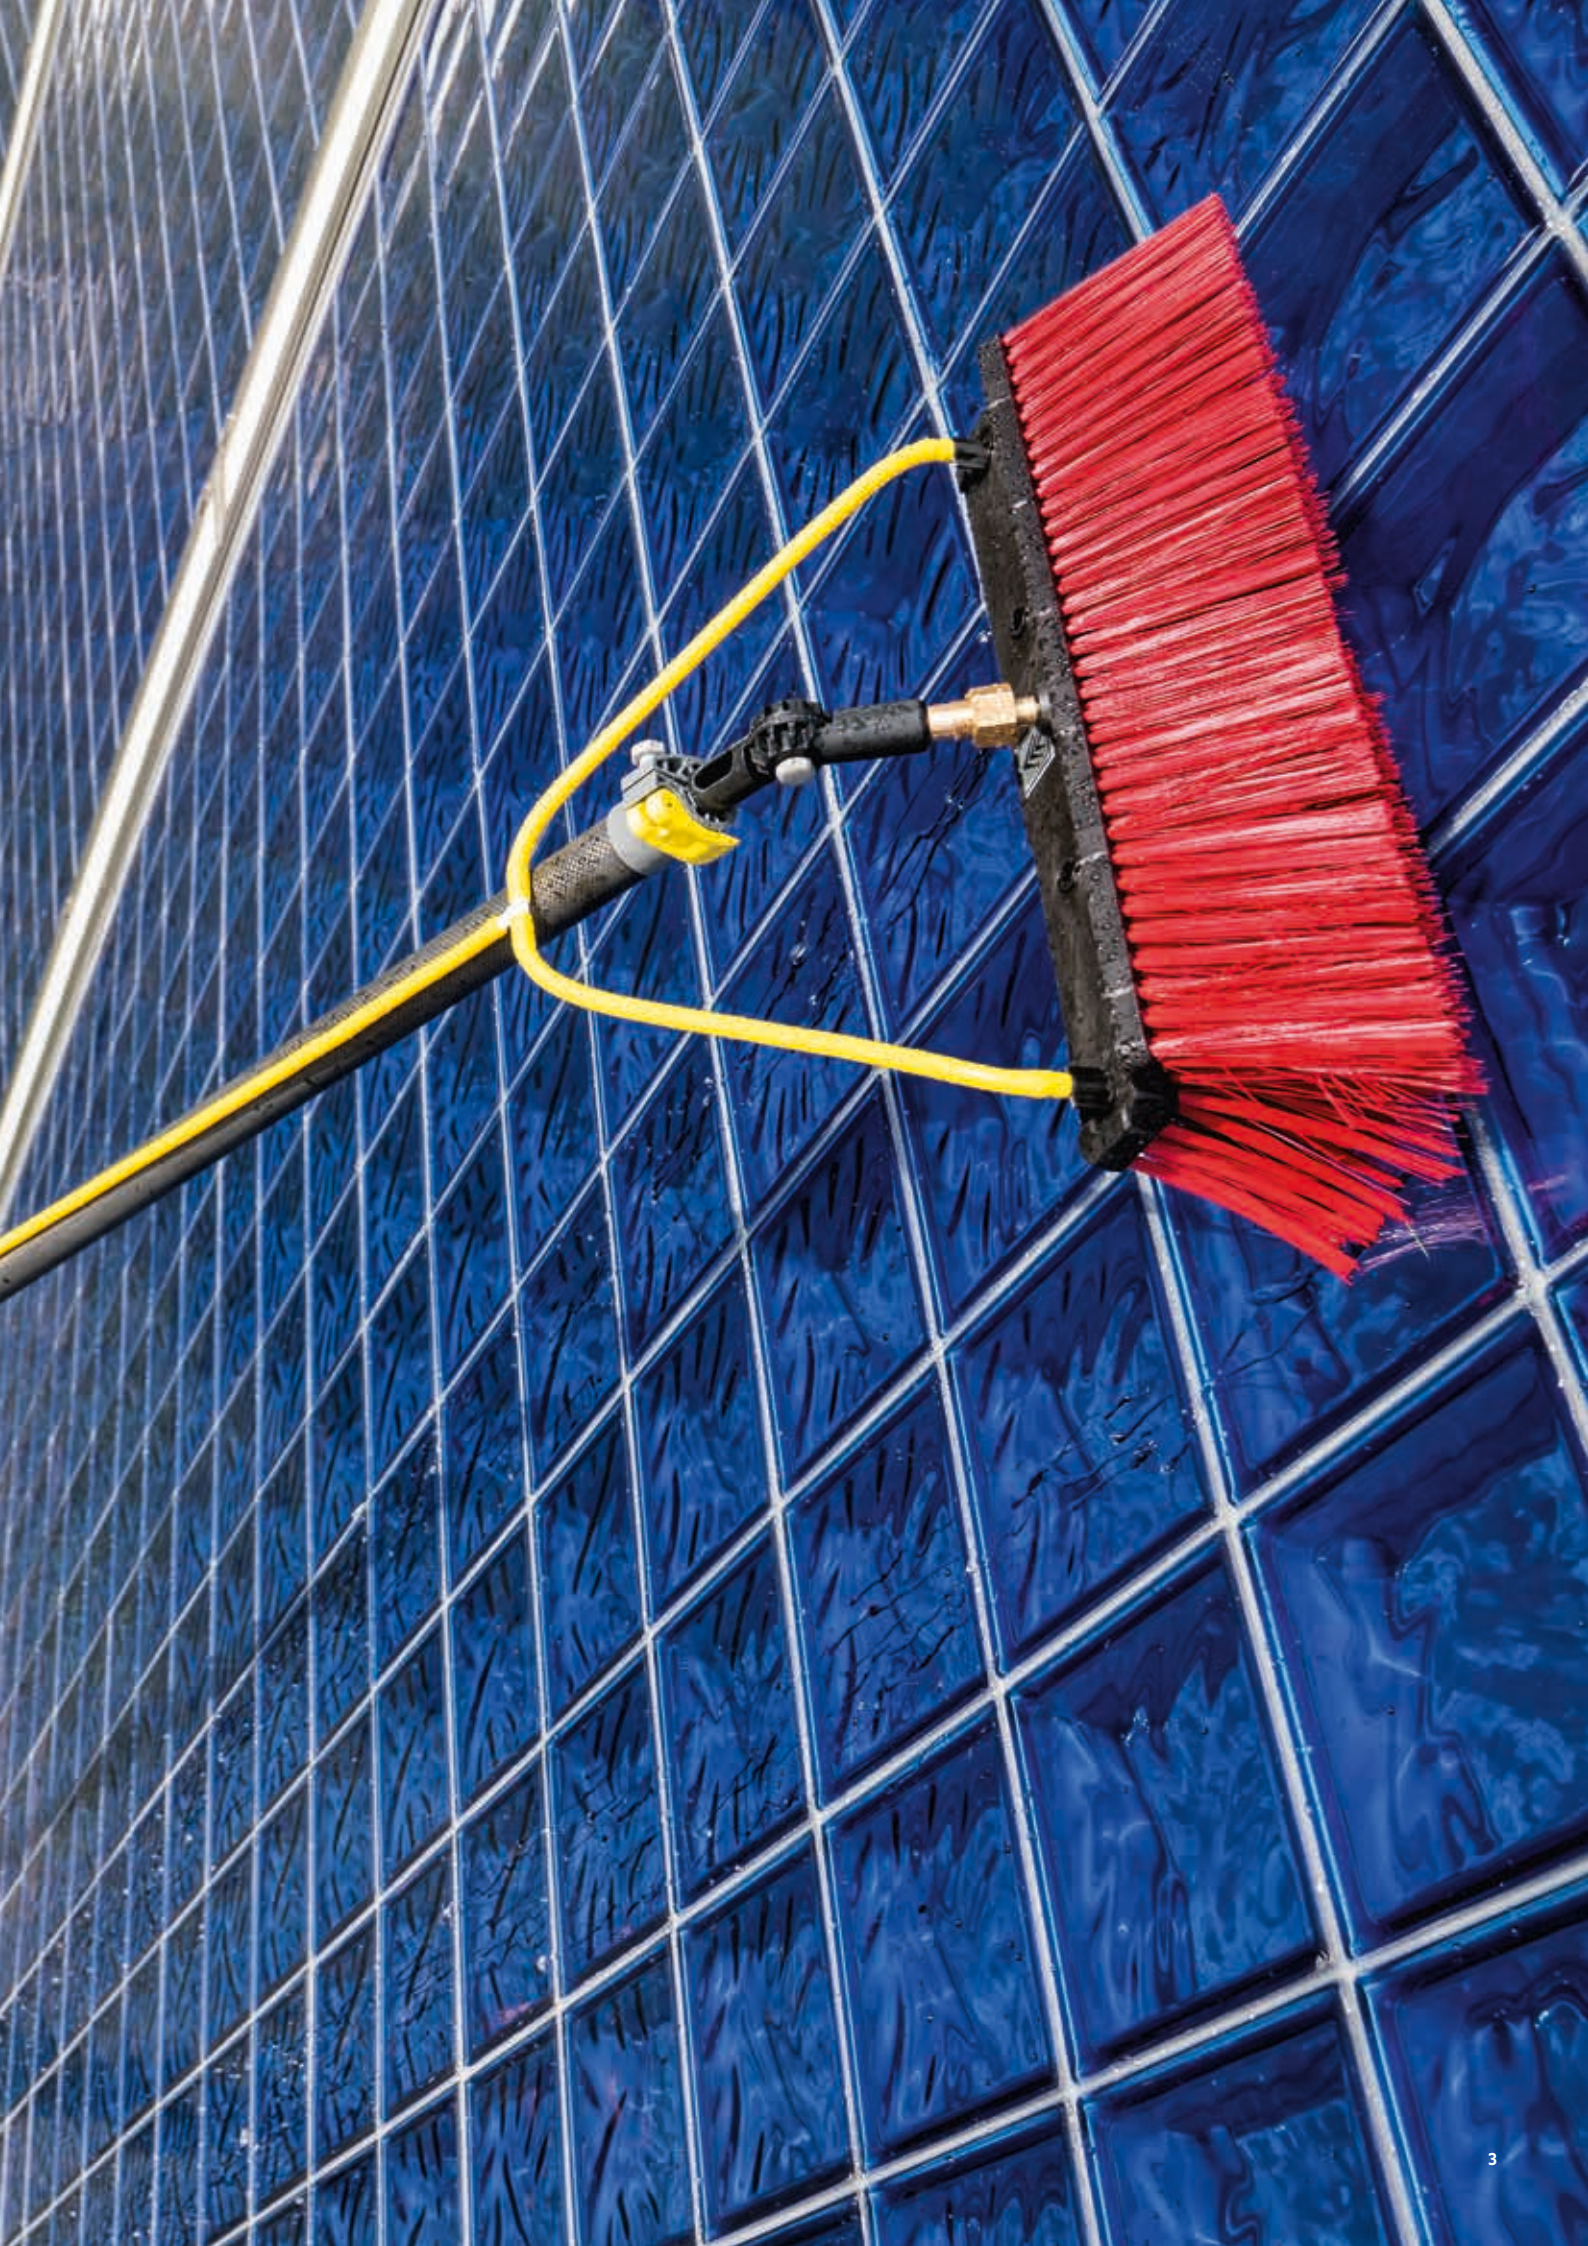

CLEANLINESS HAS NEVER BEEN EASIER

The new system solution for facade, window, solar system and floor cleaning. [kaercher.com](https://www.kaercher.com)

OUR SYSTEM SOLUTION FOR YOUR NEEDS

Flexible, practical and thorough: using a combination of brushes, telescopic lances, attachments and adapters, you can clean facades, glass surfaces, solar panels and floors with clean water at medium or high pressure at a variety of heights.

TOP PERFORMANCE THANKS TO ROLLER BRUSHES

The water-powered drive makes this possible: the attachments for the rotating roller brushes are flexible and can be changed, ensuring our high-pressure washer can be used for an even wider range of different applications.

Quick to change: thanks to a simple changing system, the various attachments are quick and straightforward to change and can be securely attached to the drive. The roller brush can be mounted either directly on the spray lance or on the telescopic lance.

Different degrees of hardness mean that the attachments are suitable for demanding cleaning tasks on solar systems, glass surfaces, rough facades and patios with stone or wood surfaces. For facade cleaning, a further advantage is that the brushes pull themselves upwards, meaning less effort is required.

ALL BENEFITS AT A GLANCE:

Minimal costs:
no need to hire elevated
work platforms

Modular system to meet
precisely your needs

Quick set-up and flexible
working

Different brushes and
attachments ensure flex-
ible use on all surfaces

Safe and easy to operate
and accessories are quick
to change

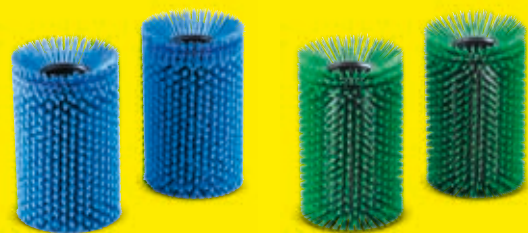

Special carrying system
supports long-lasting
and ergonomic working

ROLLER BRUSH 500: FLEXIBLE, REPLACE- ABLE, STRONG

The right brush attachment for demanding cleaning tasks. The roller brush 500 is available in three different degrees of hardness. Drive and brush attachments are available separately.

All benefits at a glance:

- Replaceable brush attachments
- Integrated spray bar for optimal water distribution over the whole working width
- Rotating and water-driven roller brush drive
- Gap-free cleaning right up to the edge thanks to bristles which are angled sideways

Optional splash guard with replaceable, transparent cover.

Optional Vario joint for better control of the brush on solar panels.

Technical data

Weight	kg	2.8
Working width	mm	500
Capacity	l/h	350 - 1,000
Area performance	m ² /h	200
Max. temperature	°C	40
Fastening		M 18 × 1.5

THE RIGHT BRUSH FOR EVERY APPLICATION

Maximum versatility for efficient use:

Our brushes are available in various degrees of hardness and for almost every cleaning application, meaning effective cleaning is possible not just for delicate glass surfaces and solar panels with mains water or osmosis water, but also for removing stubborn dirt with a high-pressure cleaner.

All benefits of the brush at a glance:

- Two nozzles for low-pressure use
- Angled bristles for streak-free cleaning
- Soft brushes: split bristles for handling delicate surfaces
- Medium and hard brushes: additional supporting bristles for improved penetration
- Integrated high-pressure nozzle for tackling stubborn dirt

Optional water hose to supply mains water or osmosis water to the low-pressure nozzles.

Optional angle joint to position the brush better on the telescopic lance.

Technical data

Weight	kg	0.9
Working width	mm	400
Max. temperature	°C	60
Fastening		M 18 × 1.5

TELESCOPIC LANCES: MAXIMUM FLEXIBILITY AT EVERY POINT

One system, four different cleaning types:

With our multifunctional telescopic lances, you can access the furthest places during low-pressure cleaning with mains or osmosis water. Medium and high-pressure applications, such as wet and dry vacuum cleaning, are possible with additional attachment kits.

The right adapter for your work:

Use the TL low-pressure adapter for low-pressure applications with rotating brushes. For high-pressure cleaning, Kärcher recommends the TL high-pressure adapter and the TL vacuum adapter for attachment to a vacuum.

High-pressure application

Low-pressure application

Vacuum application

- 1 Maximum control**
Using the separate adjustment screw, the clamping force can be set individually with no need for an additional tool.
- 2 Maximum safety**
Easy and controlled handling with no unwanted rotation thanks to its innovative anti-spin function.
- 3 Maximum ergonomics**
The rotatable foot of the lance ensures that the high-pressure hose is guided out continuously with low effort required.

CARRYING FRAME: EFFORTLESS AND CAN BE USED ANYWHERE

Increased productivity thanks to reduced work strain:

The carrying system transfers the weight of telescopic lances, high-pressure lances or garden tools to the whole torso, adapting to the operator's preferred holding position. As a result, the device is ergonomically secured in place, reducing the holding force in the arms.

All benefits of the carrying frame at a glance:

- Adjustable shoulder strap for different body sizes
- Compatible with telescopic lances, hedge trimmer, multi-tool and high-pressure lances
- The carrying frame comprises a cushioned harness with spring balancer worn on the back, and a snap hook for securing implements and tools.

WS 50, WS 100

- Residue-free drying after cleaning
- Excellent portability and easy to transport
- Powder-coated tubular steel frame with large pneumatic-tyred wheels

WS Regenerator

- Semi-automatic regeneration of the resin filter
- Easy handling (plug 'n' play)
- Efficient solution for intensive use

LIME AND HEAVY DIRT: SAFELY DISSOLVED

Water containing lime can lead to lime residue, which affects the performance of the solar modules and obscures windows. Removing dirt and leaving behind lime residue is not appropriate cleaning.

Our mobile water softener and the PressurePro Solar Cleaner RM 99 reliably prevent lime deposits. In the water softener an ion-exchange resin removes the dissolved lime from the water and reduces the degree of hardness to 0 - 1 °dH. For stubborn or greasy dirt, use our PressurePro Solar Cleaner RM 99, which dissolves the dirt from solar panels and binds the lime.

PressurePro Solar Cleaner RM 99: effective and gentle

RM 99 was developed especially for cleaning module surfaces: highly efficient, gentle on materials and biodegradable. RM 99 prevents lime spots at any degree of water hardness.

Water softener: mobile solution for fighting lime

Our mobile water softener is an easy-to-transport complete system with pneumatic wheels. The sturdy, easy-to-handle pipe frame simplifies loading. Simply connect the automatic regeneration system to quick couplings. A water fine filter protects against dirt particles.

PressurePro Solar Cleaner RM 99

- Removes stubborn dirt effectively and gently
- Avoids lime spots at all degrees of water hardness
- Biodegradable

Technical data

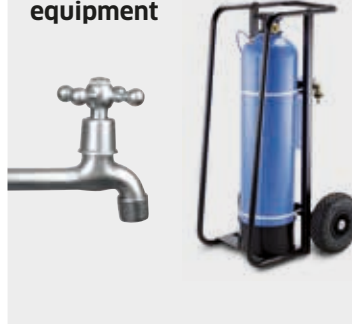

Total dosing	0.125 - 0.25% from concentrate
Consumption	5 - 10 ml/m ² (depending on machine and accessories)
Application temperature	max. 40 °C
Hazard label	No hazard label
pH value	9 (slightly alkaline)
Order no.	6.295-798.0 (10 l) / 6.295-799.0 (20 l)

NEEDS-BASED WINDOW AND FACADE CLEANING

FIXED BRUSHES

For window cleaning, use osmosis water, a telescopic lance, water hose and angle joint to position the brush. To clean window panes, use a soft brush. A brush with a medium degree of hardness is recommended for stubborn dirt.

Starting equipment

Telescopic lances

ROTATING ROLLER BRUSH

We recommend gentle application with the high-pressure roller brush for difficult and ingrained dirt. If working with a rotating brush, you will need a Kärcher high-pressure cleaner, a telescopic lance with TL hose and a low-pressure adapter. Depending on the surface and level of dirt, a soft or hard bristle attachment can be mounted on the roller brush 500.

Starting equipment

Telescopic lances

HIGH-PRESSURE NOZZLE

High pressure for removing dirt: a Kärcher high-pressure cleaner, telescopic lance with high-pressure adapter, a TL hose and the high-pressure articulated joint for variable adjustment of the spray angle is recommended here too.

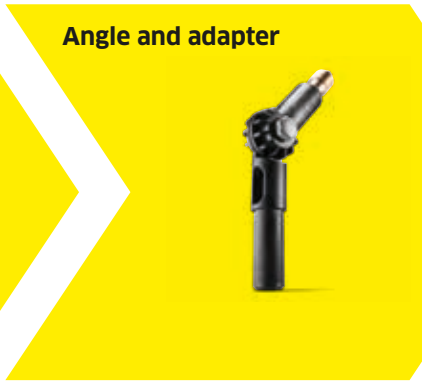

Starting equipment

Telescopic lances

Optimal cleaning results thanks to individual treatment: delicate surfaces are cleaned using soft brushes, while stubborn dirt is tackled with harder brushes or high pressure. Kärcher is taking window and facade cleaning to the next level.

SUSTAINABLE CLEANING FOR INCREASED SOLAR POWER

WITH FIXED BRUSHES

To clean slightly dirty solar panels, use osmosis water, a suitable telescopic lance, a water hose and an angle joint to better position and fix the brush. For solar panels, the soft brush with split bristles is recommended for delicate surfaces.

Starting equipment

Telescopic lances

WITH HIGH-PRESSURE BRUSHES

For work with a rotating brush, you will need a high-pressure cleaner, a telescopic lance with high-pressure hose and low-pressure adapter, a Vario joint for control and a roller brush 500 with a soft brush attachment. For large areas, the iSolar 800 brush can be used.

Starting equipment

Telescopic lances

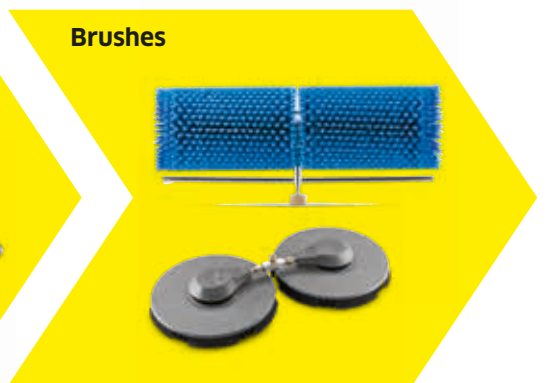

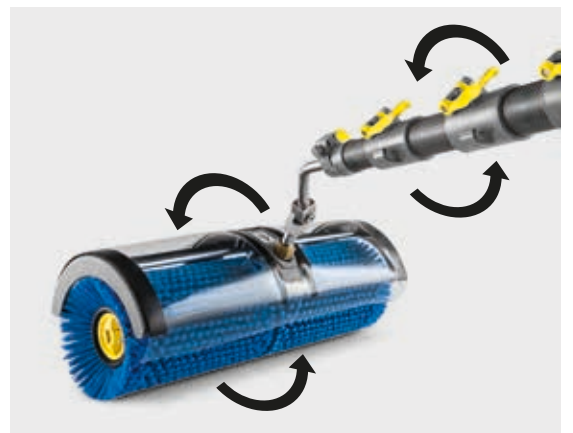

Dust, soot and pollen can reduce the output of photovoltaic and solar systems on roofs by up to 30 per cent. To achieve a consistently high electricity yield, cleaning the plant regularly is therefore crucial.

Easy steering in every direction

Rotating the telescopic lance about its own axis guides the brush to the left and right with the Vario joint.

CLEAN FLOORS: IT'S THEIR TIME TO SHINE

Cleaning delicate floor coverings? No problem. Here you need a standard Kärcher high-pressure cleaner and the roller brush 500.

Floor cleaning with the roller brush 500

The roller brush 500 allows you to clean surfaces in a gentle way. Thanks to the three different degrees of hardness, it is possible to clean every floor covering.

The perfect combination for successful cleaning

A Kärcher high-pressure cleaner, the adapter 8 to attach it to the high-pressure lance and the roller brush 500 are used for floor cleaning, together with the three different brush attachments.

Starting equipment

Adapter

Brushes

VACUUM DIRT – AT ANY HEIGHT

The vacuum application makes it easier to clean objects such as high beams and pipes.

Cleaning in next to no time

Dirt deposits can be easily removed using the telescopic lance systems and a Kärcher vacuum, meaning that dirt does not fall everywhere on the floor and spread around the room.

Cleanliness even at lofty heights

To remove dirt with suction, use a wet and dry vacuum cleaner (DN 35 or DN 40), an appropriate telescopic lance (10 m or 14 m), the TL vacuum adapter and an appropriate suction nozzle (DN 35). Due to the DN 35 minimum diameter, the upper elements of the telescopic lance must be removed so that a suction height of nine metres is possible.

POWERFUL CLEANERS

Kärcher goes well with Kärcher

- Our Kärcher cleaning agents have been specially formulated for Kärcher cleaning machines and for use with high-pressure cleaners.
- The resulting formulas are particularly pressure- and temperature-stable.
- We guarantee top performance and a long lifetime: integrated maintenance components prevent lime deposits in all parts in contact with water, ensuring optimal heat transfer as well as maintaining the machine and protecting it from corrosion.

Apply it, let it work for a short while, then rinse well: our Universal Cleaners effortlessly remove every kind of dirt on facades.

PressurePro Façade Cleaner, gel RM 43

Removes soot, oil, grease and dirt deposits effectively from facades clad with stone, clinker, rough-cast plaster, plastic, wood and glass.

PressurePro Active Cleaner, neutral RM 55

All-purpose, gentle high-pressure liquid concentrate for removing grease, oil and emission contamination. Suitable for facade cleaning and cleaning delicate surfaces.

PressurePro Oil and Grease Cleaner Extra RM 31

The highly concentrated high-pressure cleaning agent tackles the most stubborn dirt, such as oil, grease, tar, soot and smoke resin.

PressurePro Solar Cleaner RM 99

The biodegradable cleaning agent, which is gentle on materials, is particularly suitable for residue-free and streak-free cleaning of solar and photovoltaic systems and for removing ingrained dirt, such as pollen, soot and dust.
