

**KÄRCHER**

# KÄRCHER FLOOR SCRUBBERS

Compact. Walk-Behind. Ride-On.

**KÄRCHER FLOOR SCRUBBERS** are the perfect scrubber for your maintenance program. With our wide assortment of compact, mid-size walk-behind scrubbers and our ride-on floor scrubbers, you're sure to find the right tool for your job.

# SCRUBBER EFFICIENCY

## BIG JOB, SMALL JOB - WE'VE GOT YOU COVERED

When it comes to cleaning, no job is too big, or too small for Kärcher scrubbers. We have the perfect size machine to fit your needs. Our scrubbers are made to be both powerful and efficient - built for getting into tight spaces where dirt hides and covering lots of space (our B300 covers up to 15,800 sq ft in an hour!). We pride ourselves in not just providing you a piece of equipment, but building a relationship that is going to help you clean better, faster, safer and with less expense. With Kärcher, you have a partner in clean.

## WHERE WE CLEAN

Airports  
Automotive  
Building Service Contractors  
Constructions Sites  
Educational Facilities  
Farms  
Food Processing  
Healthcare Institutions  
Hospitality  
Malls & Retail  
Manufacturing Facilities  
Offices  
Transportation

The optimal scrubber for every surface size

# EXPERIENCE CLEAN

## A KÄRCHER SCRUBBER IS BACKED BY A TEAM WITH INDUSTRY EXPERIENCE ACROSS MANY INDUSTRIES

Kärcher scrubbers are backed by three important assets - our history of over 80 years of cleaning know-how, our strong line of tested cleaning equipment that will find you the right machine for your needs, and our people, including customer service and support staff. When you have a big cleaning job, you are not going into it alone, you have Kärcher behind you!

We don't stop there. When you buy our equipment you also get recommendations on our complete line of detergents, parts and accessories that make your work easier, save you money and decreases the chance of your machine being down.

## EXPERIENCE INNOVATION - KÄRCHER FLEET

Kärcher Fleet is an innovative professional fleet management system. This IoT-based solution provides task managers with frequently updated machine data, allowing them to maximize performance by allocating resources where needed.

**COMPACT FLOOR SCRUBBERS** are ideal for daily scrubbing of areas up to 12,000 square feet per hour. Award winning and innovative design provide you with the best in daytime cleaning.

## COMPACT

**BD 38/12 C Bp**

Our compact scrubbers are highly maneuverable, user-friendly and easy-to-maintain. They are built for tight spaces and smaller cleaning jobs, yet powerful and affordable.

### CONFIGURATIONS & OPTIONS

All Kärcher compact scrubbers come standard with everything you need to get down to cleaning. We also offer products that make your scrubber more efficient – detergents, accessories and parts.

#### FC 5

- Faster and more economical than mopping
- Portable and lightweight
- Microfiber rollers are machine washable

#### BR 30/4 C

- 1/1 gallon fresh/waste water tank
- cleans up to 1,400 Ft<sup>2</sup>/Hr
- 120v corded

#### BD 30/4 C Bp

- Lithium ion batteries
- cleans up to 3,600 Ft<sup>2</sup>/Hr
- 0.79/1.06 gallon fresh/waste water tank
- eco!efficiency mode for quiet daytime operation

#### BR 35/12 C Bp

- Lithium ion maintenance-free battery
- cleans up 6,600 Ft<sup>2</sup>/Hr
- 3.2/3.2 gallon fresh/waste water tank
- eco!efficiency mode for quiet daytime operation

#### BD 38/12 C Bp

- Lithium ion maintenance-free battery
- cleans up to 6,725 Ft<sup>2</sup>/Hr
- 3.2/3.2 gallon fresh/waste water tank
- eco!efficiency mode for quiet daytime operation

#### BR 40/10 C Adv

- 2.6/2.6 gallon fresh/waste water tank
- cleans up to 2,585 Ft<sup>2</sup>/Hr
- removable tank
- 120v corded
- ideal for transporting and storage

## Importance of proper cleaning with Kärcher Scrubbers

Keeping soils from entering the facility is the most critical and most overlooked component of floor maintenance. Highly efficient and effective floor care programs take an 'outside-in' approach, beginning where the soils originate - outside. Exterior paved areas like parking garages, parking lots and walkways should be addressed before soils even enter the facility. Preventative cleaning uses less labor, less chemical, and lower overall cleaning cost.

**Preventative (P):** Stopping the soils from entering the facility through removal or containment.

**Daily (D):** Removing soils daily to minimize their damage to carpet and hard floor finish.

**Interim (I):** Maintaining a high level of appearance with minimal labor, chemical and water.

**Restorative (R):** Intensive cleaning designed to restore the carpet or finish as close to original as possible.
