GAME CHANGING CLEANING SOLUTIONS

A leading facilities management and professional services company managing some of the nation's most recognised landmarks, and working with a wide range of private and public sector clients

› CHALLENGE

Having played a huge role in maintaining critical infrastructure during Covid-19 for sites including airports and key rail hubs, Mitie needed to become more agile in its delivery of services to clients. The business was seeking an innovative outdoor cleaning solution that prioritised the health and safety of both its staff and the public but maintained hygiene standards when it mattered most.

› SOLUTION

We worked with Mitie to really understand the business need and were able to supply an innovative solution in the form of a battery-operated pressure washer with bowser, which allows for a continuous flow of water and complete mobility around the site without the need for a hosepipe.

› RESULTS

Increased productivity and faster clean time due to mobility of solution.

Enhanced quality of clean due to ease of use.

Improved safety for staff and the public.

“The battery-operated pressure washer with a bowser is a real game changer because no one had previously been able to supply us with any.”

Gerard Murphy

Transport Facilities Manager Clean Environment, Mitie.
