machine based

DID YOU KNOW?

Tough cleaning tasks need a robust solution. Kärcher's industrial vacuum cleaners perform in even the most challenging environments. Ideal for heavy-duty, continuous use these machines provide the highest levels of filtration and are available in both mobile and stationary variants.

- Metallurgy & Metal-Forming
- Mechanical Engineering
- Chemical Industry
- Pharmaceutical Industry
- Food Industry

- Manufacturing of Rubber & Plastics
- Processing of Lumber
- Processing of Coke & Refined Minerals
- Metalworking Industry
- Textile Industry

- Automotive Industry
- Manufacturing of Furniture
- Electronic & Optical Industries
- Manufacturing of Print Media
- Processing of Glass & Stone

Kärcher has a vast array of
accessories for each system

ID RANGE

ID

Our standard de-dusting solution

ID (Large)

Standard de-dusting with a larger capture capacity

ID 90

Standard portable unit for mobile work

ID AFC

Mobile de-dusting and spot cleaning

ID Ex

Wide range of standard units converted to run in Z22 area

DID YOU KNOW?

Tough Continuous dust extraction directly at the point of origin in the process, as well as from the surrounding area, makes an important contribution to process reliability and occupational safety. Our industrial de-dusters for use in production are suitable for all kinds of dust and fine swarf that occur in the machining process
