

LOGISTIC EXPERT

If you are an experienced logistic specialist with a process improvement mindset, data driven and cost optimisation approach, looking for the next challenge in your career in an international environment, this role may be the right opportunity for you!

While the supply chain is primarily operated by a regional distribution centre, local subsidiary is looking for a local specialist able to improve the logistic processes and to reduce the logistic costs. The person will collaborate closely with the regional distribution centre.

Your main responsibilities will be:

- Support company initiatives to improve logistic processes and systems and reduce logistic costs
 - Analyse customer orders and logistic data and implement cost reduction measures
 - Develop relevant logistic KPIs to ensure achievement of logistic targets and regular reporting to management
 - Collaborate with regional distribution centre to ensure order fulfilment and to reduce logistic costs
 - Work with sales teams and order management team to ensure customers and internal orders met logistic targets.
 - Optimise local logistic flows between various locations
 - Identify adequate parameters and processes in SAP that contribute to logistic cost reduction
 - Negotiate transportation pricing with local transportation companies and monitor the quality of services provided
 - Monitor stock levels in central warehouse and regional locations and ensure achievement of stock days and stock level targets
 - Responsible for demand planning in SAP APO application in collaboration with sales teams and regional distribution centre
-
- Minimum 5 years of logistic experience in supply chain/operations
 - In depth logistic and transportation knowledge
 - Very good understanding of logistic Cost drivers
 - Very good organiser, with systematic approach
 - Ability to improve processes and drive changes
 - Problem solving mindset
 - Strong Analytical skills and details oriented
 - Very good communication skills
 - Experience in global organisations
 - SAP experience (SD, MM)
