

KÄRCHER

ONE-OF-A-KIND. VERSATILE. INNOVATIVE.

Solutions that are perfectly tailored to your cleaning requirements.

PROFESSIONAL | RETAIL

CLEANLINESS DOESN'T COME OUT OF NOWHERE. IT COMES FROM US.

- 2 Kärcher System
- 4 Areas of application
- 6 Autonomous cleaning
- 8 Clean floors manually and mechanically
- 10 Professional machine solutions for every application
- 12 Textiles and carpets
- 14 Café and customer restaurant
- 16 Surfaces, interior glass and sanitary facilities (customer toilets)
- 20 Deli counters, food preparation, food-to-go areas

- 22 Outside areas and maintenance of green areas
- 24 Façades, exterior windows and glass, mobile high-pressure cleaners
- 26 Logistics centres, lorries and loading ramps
- 28 Special cleaning: escalators, photovoltaic modules, ovens
- 30 Air purifiers and water dispensers
- 32 Recommendations
- 34 Kärcher Services

We serve retailers with everything that is really important for properly functioning markets and clean businesses! With our Kärcher System cleaning solutions, you can get everything from a single source: robust, easy-to-operate machines and innovative techniques. This gives you optimal results, every time, everywhere – outdoors and inside the store, in production and in the logistics area.

Safe and economical. With Connected Cleaning, we simplify the planning, control and documentation of your cleaning processes. This gives you a previously unknown level of transparency over processes and results. We customise and adapt these solutions to your individual needs.

TOP-NOTCH MACHINES ARE NEEDED EVERYWHERE

Floor cleaning: our machines give you perfect results for deep cleaning, maintenance cleaning or intermediate cleaning.

Washroom cleaning: our powerful steam vacuum cleaners and, where necessary, suitable cleaning agents are the perfect combination for cleaning sanitary facilities.

Textile and carpet cleaning: for maintenance and fibre-deep cleaning, you can depend on our patented cleaning methods.

Surface cleaning: the Kärcher System includes the perfect solution for every surface.

External cleaning and maintenance of green areas: we have the right solutions for every task, from daily sweeping of the entrance area to maintenance of green areas.

Mobile and stationary high-pressure cleaning: ensure you meet the most stringent hygiene standards easily and reliably with our high-pressure cleaning machines.

Glass cleaning: our Window Vac ensures easy streak-free cleaning. Without any paper towels at all.

Distribution centres and logistics: large surfaces, stubborn dirt, a lot of dust and, in many cases, coarse dirt. What you need here is heavy-duty machinery. Also for interior cleaning of trucks and goods receiving areas.

Special cleaning: tackle the hardest cleaning tasks with no problem. We have solutions for cleaning everything from solar panels to escalators.

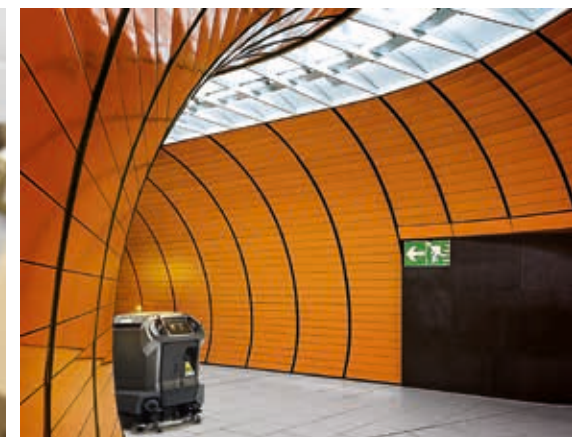

AUTONOMOUS. ECONOMIC.

Fully-autonomous floor cleaning without compromise. The KIRA B 50 cleaning robot is impressive from the very first glance, and continues to impress in its day-to-day use.

KIRA B 50

Reliable sensor technology, connectivity and transparency meet complete cleaning performance – this is the new smart KIRA B 50 cleaning robot. Open up completely new (cleaning) paths with the professional scrubber dryer robot: easy to set up and operate, it offers complete autonomy and facilitates safe, thorough and economical cleaning of all surfaces.

EVERY FLOOR CAN BE THIS CLEAN

Innovation on every level. You will be amazed at the new possibilities available to you in the area of floor cleaning alone.

can be obtained here:

BD 50/50 C Classic Bp Pack

T 22/1 Ap Te *EU

Trolley ECO!Clean Liner

Our current product range for floor cleaning includes everything you need for efficient floor cleaning: the Kärcher System for deep cleaning, maintenance cleaning or intermediate cleaning.

To ensure that your customers will feel good with every step they take in your business and want to stay longer, we give you system solutions for floor cleaning that give you an easy win over any dirt, no matter how stubborn: scrubber dryers, dry and wet and dry vacuum cleaners and manual machines. In conjunction with application-specific accessories and cleaning agents, you have powerful dirt-removing action that is gentle on the floor.

Simple is good. Very simple is the best.
No matter how big the areas that you want to clean are, time is money, and the results must be perfect. Finding the ideal combination of machine, accessories and cleaning agent for every floor is a science in its own right. You can always depend on us to provide the best solution for you.

Daily cleaning - economical cleaning
Even with modern, efficient cleaning machines, manual cleaning remains a common practice in daily maintenance cleaning. Surfaces can be quickly and affordably cleaned by hand in places that machines cannot reach.

FOR ALL SCENARIOS. WHATEVER THE APPLICATION.

For your business to have a professional appearance, you need clean and well-maintained floors. Our professional cleaning machines ensure that your floors are always hygienically clean and remain so for a long time.

Brush head with roller technology

- Especially for structured floor coverings
- High contact pressure
- For heavily soiled surfaces
- Sweeping function
- Self-cleaning rollers
- Good corner cleaning

Technology that serves everyone

The multitude of different floor coverings available, often with mixed surfaces, and a wide variety of soiling create complex demands. We have the perfect solution for thorough and maintenance cleaning of all floor types. The roller technology, with its 8-times higher contact pressure, attains the best results for stubborn dirt on structured floors (joints) and for polishing.

How can you make the most of this?

You need a system to get perfect results. Our Kärcher System combines powerful cleaning machines with the right accessories and specially formulated cleaning agents to create your individual solution for the very best cleaning results.

- Option to adapt the brush hardness (colour-coded from light = soft to dark = hard).
- Special melamine/microfibre pads for gentle cleaning on difficult surfaces such as fine stone, etc.

CLEAN, DON'T REPLACE

When cleaning textiles and carpets, the goal is to maintain their value. With our patented cleaning methods for maintenance and fibre-deep cleaning, you can achieve this goal over the long term.

Puzzi 10/1

CV 30 /1

Phosphate-free formulas

Our cleaning agents demonstrate that powerful cleaning is also possible without using products containing harmful materials such as phosphates.

Integrated odour absorber

An integrated odour absorber cuts the time needed for intermediate and deep cleaning of textile surfaces. Perfect cleaning results mean surfaces are not only left clean, they smell clean too.

Our CarpetPro Line enables you to clean and maintain textile surfaces in a gentle and effective manner. This innovative system reduces cleaning and drying times, and delays resoiling, thereby protecting treated surfaces – as well as the environment and your budget. The CarpetPro Line is based on iCapsol technology, which encapsulates and binds the dirt. It is no longer necessary to rinse carpets, as the encapsulated residual contamination is simply vacuumed during subsequent maintenance cleaning. Carpets dry quickly and are ready to walk on in no time.

FOR THOSE LITTLE BREAKS

For many customers, the café is a beloved haven. It is where people get together for lunch, take a break to grab a coffee, have a quick catch-up and recharge their batteries mid shopping trip.

BD 30/4 C Bp Pack

T 9/1 Bp

Cafés can quickly fill up with both customers and staff, especially during the lunchtime rush. This results in a quick turnover of tables and their occupants. It also means that these areas must be cleaned quickly and regularly.

YOUR SANITARY PROFESSIONAL AGAINST TOUGH DIRT

With our specially designed SanitPro cleaning agents, you'll be all set for perfectly hygienic cleaning in delicate sanitary facilities.

SurfacePro Glass and Surface Cleaner Sural, 0.5 l

SanitPro Everyday Cleaner CA 20 R eco!perform, 0.5 l

Unique diversity

With our innovative, complete product range for manual cleaning, you have all the options – from glass cleaning to surface cleaning. Colour-coding and language-neutral labels clearly indicate the right application.

Optimal results

On windows and all other horizontal or vertical glass surfaces, our Window Vac gives you streak-free results, effortlessly.

Consistent sustainability

Kärcher is a member of the "Association for Soaps, Detergents and Maintenance Products in Europe (AISE)" sustainability initiative. All products in our green cleaning agent range carry the EU Ecolabel – EU Flower – and the Austrian Ecolabel. Our advanced formulas improve effectiveness and are also eco-friendly – from production to waste water treatment. Concentrates reduce packaging. And the spray heads are reusable.

OUTSTANDING PERFORMANCE FOR PERFECT HYGIENE

Lime deposits, urine scale, grease and soap residue as well as other stubborn dirt stand no chance against the cleaning power of SanitPro.

SanitPro Maintenance Cleaner
Allsan, 1 l

SanitPro WC and deep cleaner
CA 10 C eco!perform, 1 l

Outstanding, safe handling
The optimised shape and function of our spray heads and bottles provide exemplary user-friendliness and ergonomics. The 0.5-litre spray bottles are easy to handle, even during long periods of use. The adjustable foam nozzle prevents aerosol formation and thereby increases work safety.

Easy-to-clean effect
The water-repellent effect on fittings and surfaces prevents dirt adhesion and lime stains. This makes subsequent cleaning easy.

Powerful and reliable
Thanks to their innovative acids, our products set standards when it comes to the tricky task of sanitary cleaning. They always achieve optimum cleaning performance while keeping surfaces streak-free. You can clean washrooms and toilets with our powerful steam vacuum cleaners, with or without cleaning agents as required. Even without cleaning agent, the SGV steam vacuum cleaner eliminates 99.99 percent of all bacteria.

COMPLY WITH HACCP*. ALWAYS.

Performance is the decisive factor. Where hygiene comes first, the cleaning performance has to be exceptional. Whether cold water or hot water – high pressure, steam or suction power – our solutions set the standard in critical environments as well.

SGV 8/5

HD 7/10 CXF

WVP 10 Adv

Your best solution for thorough wet cleaning is our HACCP-compliant hygiene high-pressure cleaners, made from rust-proof stainless steel: designed for use with water up to a temperature of 85°C, with all water-carrying parts made of special food-grade brass, and two cleaning agent tanks with rinse function.

Cleaner, faster
Cleaning surfaces really can be this simple: with a high-pressure cleaner, our foam lance and the right cleaning agent, you can foam, spray down and disinfect entire production areas, for example. If our surface cleaner is used in closed rooms, you can clean up to 30 percent quicker: thanks to the Venturi principle, dirty water is removed by suction during cleaning and can be discharged directly into a drain or container.

* HACCP stands for Hazard Analysis Critical Control Points – these critical points are assessed for risks and monitored at every stage of preparation, processing, manufacturing, packaging, storage, transport, distribution, handling and sales of foodstuffs.

KEEPING GREEN AREAS CLEAN

Cleaning is important. It's even better to catch the dirt before it enters the building. We will show you how.

Cleaning tasks in the outside area are at least as varied and demanding as those performed indoors. Lawns must be mowed, parking areas and foot-paths swept and entrance areas vacuumed. This includes winter service, removal of autumn leaves and other occurrences that cause dirt.

More information
can be obtained here:

LB 930/36 Bp leaf blower

KM 70/20 C

SGG 1

Dirt should stay outside

Studies have shown that 94 percent of dirt is brought into buildings by people walking into the building. Systematic cleaning in outside areas reduces the amount of dirt brought into the building by as much as 80 percent. Use our small yet powerful tools, such as the electric broom and push sweepers, for cleaning in and around the entrance area. We developed our carpet vacuum cleaner specifically for the intermediate cleaning of anti-dirt mats.

Think as far out as you can

Expand your cleaning to the boundaries of your area. Sweep paths and parking spaces with push or ride-on sweepers. Our ride-on sweepers are extremely manoeuvrable and robust while consuming little energy. The right accessories even make them suitable for large areas. For large areas, including winter service and maintenance of green areas, our implement carriers and municipal vehicles are the perfect solution. Our attractive financing and leasing models also give you the safety and flexibility that make sense with your schedule.

CLEAN FAÇADES FOR A CLEAR VIEW

For glass, façade and building cleaning, we have developed a versatile range of tools that you can use to achieve perfect and streak-free cleaning results with next to no effort.

Depending on how buildings are situated, façades tend to become unsightly due to exhaust fumes and dust. You can use our

high-pressure cleaners to remove all kinds of dirt – even graffiti – quickly and easily. We offer the right solution for any surface and any type of dirt, from cold water high pressure to hot water high pressure. A variety of accessories such as nozzle heads and wash brushes and adapted cleaning agents give you all the options for focussed, efficient cleaning.

Cleaning windows from the inside and outside is one of the main responsibilities of building service contractors. This is where the strengths of our Kärcher System give you transparency in every sense of the word. The systematic interaction between manual machines and cleaning agents makes it easier for you to work on both sides of the window, resulting in a view unhindered by streaks.

Dry off without streaks

The high-quality textiles that we use are absorbent and clean without leaving streaks.

Everything to hand, at all times

Our all-in-one solution is the proper, professional addition to your equipment. Work faster and more flexibly with your equipment always quickly to hand.

HDS 10/20-4 MX

HD 6/15 MXA Plus

THIS IS WHAT WELL-MAINTAINED LOGISTICS LOOK LIKE

In logistics, it's not just goods turnover that adds a whole other dimension. Cleaning tasks also accumulate as surfaces and structures are added.

The size of a surface being cleaned always makes a huge difference. If the machines are too small, this wastes time and manpower. Machines that are too large are not economical. The Kärcher System will always give you the right solution, even for the toughest problems. We support you by offering professional consultation for all levels.

More information can be obtained here:

NT 70/2

KM 100/120 R G

The logistics field uses mostly powerful and robust machines that remove any dirt, dust or waste stuck to large surfaces. Lorries, ramps and the incoming goods zone are equally challenging to clean. You can find the right machine for all of these different tasks in our extensive product portfolio, along with a full range of accessories and cleaning agents.

Large machines such as scrubber dryers and sweepers are used in a wide variety of areas. Likewise, there are many different drive choices to consider. Our self-propelled machines use electric, diesel or petrol engines or LPG. All options provide you with exemplary ergonomics for drivers and operators, in addition to saving you time and adding efficiency.

SPECIAL SOLUTIONS FOR SPECIAL TASKS

There are no cleaning tasks that can't be solved. There is only equipment that isn't suitable. We have the right machine with matching accessories and ideal cleaning agents for every cleaning task. We have made it our task to develop practical solutions featuring Kärcher quality even for special applications.

BR 47/35 Esc

NT 22/1 Ap Bp L

Clean at every turn

Thoroughly cleaning escalators used to be more than tiresome. We provide you with the solution for this which is currently the most effective and economical. Using our escalator cleaner, you can save a lot of time and achieve outstanding results.

Cleanliness even in ovens

There's no escaping crumbs at baking stations and in counter areas for baked goods. But you can quickly and easily vacuum them up between batches. Our smallest dry vacuum cleaners fit nicely into the drawers under the counters. And with our one-of-a-kind oven set of wet and dry vacuum cleaners, heat-resistant hose (< 200°C) and fully automatic filter cleaning, you can even clean hot ovens.

REFRESHING EVERYDAY SOLUTIONS
