

KÄRCHER

makes a difference

HYGIENIC AND EFFICIENT

Cleaning solutions for hospitals

PROFESSIONAL | HEALTHCARE

PERFECT HYGIENE WITH HIGH EFFICIENCY

The successful day-to-day running of busy hospitals and clinics is inextricably linked with modern hygiene and efficiency. The vital importance of maintaining hygiene, in particular the avoidance of nosocomial infections and transmission of germs, must be ensured at all times through optimal care and cleanliness. The various areas in hospitals each require their own specific cleaning solutions – from small to large areas, from kitchens to operating theatres. In busy hospitals and clinics, efficient maintenance cleaning is crucial as there is rarely enough time for time-consuming deep cleaning. More stringent hygiene standards, increasing cost pressures and competition make things more difficult. Kärcher offers products that are ideally suited to meeting these high demands: professional, efficient cleaning systems. And individual services ranging from mobile to intensive cleaning.

KÄRCHER - YOUR RELIABLE PARTNER

The name Kärcher is synonymous with high performance, quality and innovation worldwide and for cleaning expertise that sets standards. The Kärcher system offers convincing solutions for every requirement: perfectly matched machines, accessories and cleaning agents. They are high performance, efficient and cost-effective thanks to innovative technology, low consumption and durability. They are also pleasantly inconspicuous, stylish in their classic anthracite colour and whisper-quiet.

1 Always the best cleaning agent

For over 30 years, Kärcher has developed its own highly efficient and eco-friendly cleaning agents and chemicals for specific cleaning tasks. Kärcher has been a supplier of high-quality systems for years and now ranks as a world leading manufacturer of cleaning machines, cleaning agents and chemicals. Kärcher has a wealth of expertise and technologies that set standards and offer tailor-made solutions from one source.

2 eco!efficiency – achieve more with efficiency

Efficiency comes in different dimensions: Reduced energy consumption. High-performance internal-combustion engines. Lower cleaning agent consumption. Highly concentrated cleaning agents to avoid packaging. Designed for recycling or minimisation of components. Effects which can only be achieved through new ideas and innovative technologies and which, above all, require the will and ability to actually carry them out. Kärcher offers a comprehensive range of machines featuring the eco!efficiency mode as well as cleaning agents for effective, efficient and eco-friendly cleaning.

3 Tank rinsing system

The B 40 C/W, B 60 W and B 80 W are the first and only scrubber driers with integrated tank rinsing system. After cleaning, the dirty water tank can be cleaned via an integrated nozzle system. These machines support the HACCP concept.

4 Safety is a key function

The KIK system of the B 40 C/W, B 60 W and B 80 W offers much greater protection against operating errors. Operators cannot change the basic machine settings, which are preset or enabled by the supervisor for the cleaning job or facility concerned. The operator only needs to insert the key. The machine can only be started with the associated coded key and is thus protected against unauthorised use.

5 6-stage filtration system including HEPA

Dry vacuums with 6-stage filtration system. 3-ply fleece filter bag, permanent main filter, motor filter and blower/HEPA filter ensures optimal dust separation with an efficiency of up to 99.997% in HEPA quality.

6 An outstanding combination of form and function

Kärcher machines have repeatedly won awards for the successful combination of form and function, such as the "red dot design award" and the "iF Product Design Award". And they are SGS approved for use in hygiene-sensitive areas.

PUBLIC AREAS – CLEAN AND SAFE

The constant traffic in public areas such as entrances, corridors and ward corridors leaves little time for cleaning. Decisive here is the balance between maintenance, interim and deep cleaning. For thorough cleanliness, value retention, dust suppression and safety – for all kinds of floors, hard surfaces and carpets. Kärcher puts hygiene first.

Carpet cleaners for thorough cleaning: low residual moisture, quick drying.

Scrubber driers for small to large areas. Easy to use. Water and energy-saving. Quiet and inconspicuous.

Single-disc scrubbers/polishers. Compact and manoeuvrable. Battery or cable. Ideal for concentrated or interim cleaning.

Whisper-quiet vacuum such as the T 12/1 eco!efficiency. Extremely quiet with 40% less energy consumption – economical and eco-friendly.

1 Carpets quickly cleaned

When there is not enough time for drying or basic cleaning of carpets: the Kärcher system consisting of BRC 45/45 C and CarpetPro Cleaner iCapsol RM 768 featuring 2-roller technology for optimal cleaning results forward and backwards. Compact for space-saving storage.

2 Ideal for entrances

The B 90 scrubber drier is designed for cleaning large areas. It features a pre-sweeping function for removing coarse, loose dirt. The diamond pad leaves stone floors looking shiny for longer. Thanks to the whisper function, the B 90 is also ideal for use in patient areas.

3 Manoeuvrable and quick in corridors

The BD 50/40 RS is the most manoeuvrable in its class. Allows a clear view along ward corridors. Easy to get on and off for more space. The efficient solution for daily maintenance cleaning of hard surfaces.

4 Efficiency is a matter of adjustment

The B 60 with KIK system is fully configurable and with its tank interior cleaning system ensures hygiene not only on floors. In the ecoefficiency mode, the brush speed and suction power can be reduced for light soiling.

5 The quietest vacuum in its class

The T 12/1 ecoefficiency with HEPA filter is designed to meet hygiene requirements on wards. The noise level reduced by 5 dB(A) compared to the standard model is equivalent to a noise level reduction of about 70%.

6 Simply polish marks away

The BDP 43/450 C Adv and FloorPro Spray Cleaner RM 748 are a time-saving solution for removing marks and films. Ideal for use in busy areas where thorough cleaning is not possible.

CarpetPro Cleaner iCapsol RM 768

Quick and powerful intermediate cleaning of carpets.

FloorPro Spray Cleaner RM 748

Anti-slip spray emulsion for all coated hard surfaces. Repairs and restores coated floors.

S 65 vibrating head

Modular brush head with innovative vibrating technology – ideal for restoring shine. No extra attachment necessary: simply change the brush head.

Diamond pads

A Kärcher innovation for cleaning and polishing in one pass.

SANITARY AREAS – CLEANS DEEP INTO JOINTS AND CREVICES

Manual cleaning reaches its limits in sanitary areas with anti-slip floors. Especially when limescale, skin oils or cosmetic residues need to be removed. In baths, showers and changing rooms – suitable for structured floors and small areas where hygiene requirements are high: the avoidance of germ transmission and cross-contamination in these areas is crucial. The regular use of compact, efficient Kärcher cleaning machines ensures that floors are hygienically clean deep into joints and crevices.

The BR 30/4 C compact scrubber drier removes limescale and mould in joints. Easy to use – ideal for confined spaces.

BR 40/10 C Adv scrubber drier with two-roller technology. Scrubs, vacuums and polishes floors. Cleans close to edges and under benches.

Wet and dry vacuum cleaners remove coarse dirt: dry, moist or liquid. On-board accessories – always at hand.

Steam cleaners remove stubborn dirt from joints, cracks and pores. Kind to the environment and material.

1 Optimal interim cleaning

The BR 30/4 C cleans right into corners, around bends and under low fittings. Featuring a microfibre roller, it is ideal for removing fluff and hairs on fine stone tiles. Ideal for use in sanitary areas or wet zones, like water birth suites.

2 Optimal deep cleaning in sanitary areas

The BDS 43/180 C Adv is ideal for uninterrupted use: height adjustable handle for ergonomic operation, two-column handle for easy manoeuvrability even at maximum power. Folds down for space-saving storage.

3 Ideal for structured flooring

The BR 40/10 with roller technology cleans deep into joints and crevices and scrubs and vacuums in one pass. Keeps sanitary areas and exercise baths hygienically clean.

4 Clean joints and crevices – no chance for dirt

The steam cleaner SG 4/4 is the answer to stubborn soap residues in showers, particularly in difficult to reach areas. Kind to surfaces and the environment.

5 Powerful suction, tried and tested

Small or large spills are part of everyday life in hospitals. Wet and dry vacuum cleaners such as the NT 48/1 are ideal for removing large amounts of water quickly and when cleaning with the single-disc machine.

FloorPro Deep Cleaner, acidic RM 751

Effectively removes cement film, deposits and residues, e.g. limescale, rust, beer or milk scale.

Microfibre pads and rollers

Unrivalled on fine stoneware tiles, it achieves optimal results on all smooth or lightly structured floors.

DE 4002 joint and crevice kit

Ideal accessories for joints and fittings.

CA 10 C Sanitary Deep Cleaner

For manual cleaning of sanitary surfaces.

CA 20 C Sanitary Everyday Cleaner

Ideal for everyday cleaning of sanitary facilities.

TREATMENT AREAS – MAXIMUM HYGIENE

Cleaning in sterile areas such as operating theatres and laboratories places high demands on the cleaning systems used. The aim is to achieve and maintain a maximum level of hygiene to avoid nosocomial infections. Cleaning machines used in these areas must comply with high hygiene standards. The often busy environments, not enough time for thoroughly cleaning floors subject to high traffic and cramped conditions make things more difficult.

BDP 50/1500 C – polishing at ultra-high speed. Polished floors are more resistant to aggressive disinfectants. Integrated vacuum minimises dust pollution.

Compact battery powered machines for maintenance cleaning in one or two passes for areas up to 700 m².

B 40 W scrubber drier. Traction drive, innovative operating system, hygienic design. Roller or disc engineering technology for smooth to structured floors.

T 15/1 – the quietest vacuum in its class. Yellow cable prevents tripping. Standard HEPA filter for optimal hygiene.

1 Faster is better

Perfectly polished floors are extremely important where surfaces are subject to high mechanical stress and exposure to aggressive media such as disinfectants. The BDP 50/1500 ultra-high speed polishing machine is ideal for floors subject to heavy traffic and features floating driver plates for uneven floors.

2 Quickly on site and quickly finished

The BD 38/12 is the intelligent alternative to a mop thanks to its fast set up, excellent cleaning performance and quick drying. This compact battery powered machine is versatile and manoeuvrable and ideal for maintenance cleaning especially in small rooms.

3 For growing demands

In histological laboratories, where large amounts of wax are used, floor cleaning is very time-consuming, but essential for work safety. A precondition

for the successful removal of stubborn soiling such as wax calls for a perfectly matched machine and cleaning agent: e.g. the BR 40/10 with contra-rotating, self-cleaning pad rollers and FloorPro Intensive Deep Cleaner RM 750 for cleaner floors and greater safety.

4 Ideal for operating theatres

B 40 W meets the highest requirements: easy to use and so quiet that it can be used at any time. The tank rinsing system protects against contamination. Maintenance-free batteries ensure trouble-free operation. Thanks to its compact design and ease of use, the B 40 is also ideal for use in operating theatre environments.

5 Silent, but tough on dust

Frequent changes of clothing produce a large amount of dust. With only 56 dB (A), the T 15/1 is the quietest in its class and can be used at any time. Standard HEPA filter.

Cleaning according to colours

The disc brush colour system makes it easy to select brushes or discs with the required properties.

FloorPro Intensive Deep Cleaner RM 750

The powerful deep cleaner effectively removes the most stubborn stains such as oil, grease, soot, blood and proteins.

Healthy air

Kärcher HEPA filters ensure perfectly clean and hygienic exhaust air.

KITCHEN AREAS – APPETISINGLY CLEAN

Preparing food for a large number of patients and staff places the highest demands on hygiene. Kärcher offers a complete system which follows the HACCP concept and complies with all cleaning standards using special equipment. In all preparation, storage and distribution areas. For cleaning work surfaces and implements, including serving trolleys. For removing stubborn and coarse dirt. Also effective on heavily structured floors.

HD 7/10 CXF, the compact class especially for use in food preparation areas. With food-grade hoses and grey abrasion-resistant wheels.

Stationary high pressure cleaning systems can be adapted individually and flexibly to the needs of every hospital kitchen.

Compact floor scrubbers featuring roller technology – ideal for basic and interim cleaning of structured floors in kitchens.

The easy-to-use SGV 8/5 combines the functions of a steam cleaner and a wet and dry vacuum cleaner. Excess water is removed immediately during steaming. With extra cleaning programmes and accessory integration.

1 On rollers – deeper into joints and crevices

Being flat and compact, the BRS 40/1000 C scrubber easily reaches under kitchen cupboards. Featuring roller technology, this machine is the alternative to single-disc machines for use on non-slip tiles.

2 High pressure in the kitchen

High-pressure cleaning with integrated suction is ideal for kitchens. The FRV 30 surface cleaner can clean and vacuum in one pass. Used together with PressurePro Grease and Protein Remover RM 731, it is tough on protein, grease and oil – but kind to surfaces.

3 High and low

The B 40 W was developed on the basis of the HACCP principle and ensures optimal cleaning results on large areas. Featuring a roller brush head and high/low bristles, it also cleans non-slip tiles effortlessly. With Dose system for optimal cleaning agent dosing.

4 Specialist for canteens

Canteens are subject to heavy soiling such as coffee stains, grease and protein residues. The BD 40/12 C quickly and thoroughly removes adhering dirt on fine stone tiles in canteens. It also reaches areas inaccessible to large machines.

PressurePro Grease and Protein Remover RM 731

Removes even the most stubborn grease, protein, oil and soot from floors, work surfaces, machines, etc.

HD 7/10 CXF Inno Foam Set

With cleaning agent injector and nozzle kit. Effective foam cleaning based on the HACCP concept.

BR roller brushes (high/low)

For cleaning heavily structured floors and in deep joints and crevices.

Food-grade high-pressure hoses

With non-discolouring outer layer.

OFFICES AND CONFERENCE ROOMS – CLEANED DEEP INTO THE FIBRES

Offices and conference rooms in hospitals are often carpeted or have parquet flooring to create a pleasant atmosphere. To retain the value of these high-quality materials, specific cleaning systems are necessary. Not least, also to maintain a constant level of hygiene and prevent the transmission of germs – because dirt and germs make no distinction between clinical and office areas.

Dual-motor brush-type vacuum cleaners with generous working widths clean large areas in next to no time.

CV 60/2 – the step-on vacuum cleaner for all surfaces. A true all-rounder – it automatically adjusts itself to every type of floor covering.

Kärcher spray extraction cleaners are ideal for removing stains and cleaning carpets deep into the pile.

Handy cordless cleaners such as electric brooms and sweepers: always close to hand and always useful.

1 Whisper-quiet and universal

Dry vacuum cleaners such as the T 15/1 are perfect for daily maintenance cleaning – with or without filter bag: they thoroughly remove dirt and soiling on carpets, laminate or PVC floors effortlessly.

2 All-rounder for all surfaces

The CV 60/2 brush-type vacuum cleaner automatically adjusts itself to any floor covering. From hard floors to carpets and back – without having to change accessories. Ease of use meets extreme manoeuvrability. Performance also meets versatility: features include contrarotating rollers, side brush, suction tube and optional HEPA filter. Plus accessory kit for difficult to reach areas. With on-board practical storage for accessories and charger.

3 Thoroughly clean

Carpets are subject to heavy traffic everyday. That is why cleaning professionals prefer Kärcher carpet cleaners. These robust, powerful and versatile machines are designed for cleaning carpets deep into the pile and are ideal for interim use and removing stains from textiles. They also clean deep into the fibres of blinds and upholstery. With the appropriate accessories, the machines can even be used to clean tiles and windows.

4 Torque conquers dirt

Kärcher polishing machines generate high torque to produce an especially high-gloss surface. The dust suction makes the work easier. This technology also scores top marks for wear and maintenance.

Universal Stain Remover RM 769

For all textile flooring, upholstery and hard surfaces. Removes dirt from solvent-resistant surfaces.

CarpetPro Cleaner RM 760 Powder

Spray extraction cleaner with outstanding cleaning performance, iCapsol encapsulation technology and odour absorber. No time-consuming rinsing.

CarpetPro Protector RM 762

For carpets and textile surfaces. Seals the fibres and makes them hard-wearing.

CA 30 R and CA 40 R

Ready-to-use manual cleaners for surfaces and glass. Dry quickly and streak-free.

HIGH PERFORMANCE IN ALL AREAS

The areas outside hospitals must not only give a good impression. All-round maintenance of the infrastructure is indispensable for ensuring that daily routines can be carried out smoothly and safely. This applies in particular to access for ambulances, entrances and footpaths for patients and staff. Also important are the cleaning of multi-storey car parks and maintenance of grassed areas. Kärcher sweepers have the power and versatility to do the job: sweep, dry or wet. Mow grass. Collect leaves. And provide a complete winter service.

Compact walk-behind sweepers clean in a fraction of the time and clean much more efficiently than a broom.

Ride-on sweepers are the solution for sweeping large areas – car parks and driveways.

Ride-on scrubber driers for demanding cleaning jobs and long periods of use. The first choice for underground car parks and multi-storey car parks as well as loading zones.

The MC 50 vacuum sweeper for all requirements: with coarse dirt flap – designed for optimal cleaning results also on large areas.

1 Right on track

Multi-storey car parks often place high demands on scrubber driers: large areas, coarse and stubborn dirt and steep ramps. The Kärcher BR 150 R is the right machine for this job: with robust steel frame for heavy-duty use on areas with inclines up to 15%. With large water tank and powerful battery for long periods of uninterrupted use.

2 Could it get any easier?

The compact and extremely manoeuvrable KM 75/40 W thoroughly cleans small to medium-sized areas effortlessly. The traction drive replaces physical strength, while the powerful vacuum picks up dust without any turbulence. Available with a choice of powerful petrol engine or whisper-quiet, battery-powered version for indoor use – with optional antistatic carpet sweeping kit.

3 The standard for efficiency

The MC 50 demonstrates on a daily basis that economy and ecology go hand in hand. A highly efficient compact sweeper that is eco-friendly in every respect. The innovative vacuuming system with large vacuum blower reaches maximum suction power at 75% motor speed. The result: quieter, lower consumption, lower emissions and less wear. The MC 50 even falls below the values specified in the stringent exhaust emission standard STAGE IIIa.

4 Progress made easy

Ride-on vacuum sweeper with highly effective, patented and fully automatic filter cleaning, unique sweeping crescent side brush (optional), automatic wear adjustment of the main sweeper roller via Teach System and new sweeping concept. With this new sweeping concept, stored between the rear wheels, the sweeping system is protected when driving over obstacles and allows corners to be swept out in just three strokes.

5 For year-round use

The MC 50 Advanced delivers optimal sweeping results and is suitable for year-round use. The quick changeover system enables attachments such as mower or snow blade and spreader to be changed within minutes.

WPD 100, 200, 600 WATER DISPENSER – DELIVERING WATER IN A CLASS OF ITS OWN

The Kärcher WPD 100 turns normal tap water into healthy drinking water. Plumbed in, it offers a constant supply of water of the highest quality due to its unique filter and hygiene concept. Chilled or hot, non-carbonated or carbonated at the push of a button. Hygienic, calorie-free, neutral tasting and pure. This is achieved by automatic thermal disinfection, a water dispensing valve with contact protection and innovative filter concept consisting of Active-Pure filter und Hy-Protect filter.

1 Patented hygiene system

Integrated thermal disinfection is a patented Kärcher system: all water-carrying lines, heating and cooling modules, the Hy-Protect filter as well as the water dispensing valve are disinfected at intervals using hot water. Compared to conventional systems, this method reduces service costs and protects the environment. Four different cleaning options are available. The Active-Pure filter, a sintered activated carbon block, ensures a pure taste by removing chlorine, heavy metals and other residues from the line. The Hy-Protect filter delivers perfectly clean water by means of ultrafiltration. Its extremely fine-pored membrane effectively removes bacteria and viruses whilst ensuring the water loses none of its natural minerals. The Hy-Pure filter is a combination of the Active-Pure and the Hy-Protect filters. The UV Protect lamp uses ultra violet light to destroy bacteria and viruses.

2 Certified quality “Made in Germany”

A renowned laboratory has tested all of the components in the Kärcher WPD that come into contact with water for their suitability for use with food products, confirming that the WPD consistently delivers water of the highest quality.

WPD 100 stand-alone version

A refreshing eye-catcher and a potential advertising medium.

WPD table-top version

Ideal for break rooms or for integration into existing installations.

PROGRAMMED TO SUCCEED: KÄRCHER MANAGE

The Kärcher Manage software optimises all documentation and information processes in facilities management: recording, management and control of facilities, rooms, equipment and services. Continuously, any time and anywhere. The application spectrum of Kärcher Manage extends from facilities manager activities and facilities management, complaints processing, planning and documentation of working hours and activities, complete machine management and documentation of technical maintenance services.

1 Quality control – standard compliant

The innovative Kärcher Manage app is a pioneering tool for QA inspections any time, anywhere. Quality inspections can be documented and evaluated in compliance with EN 13549. Internal inspections and spot checks as well as external quality inspections can be recorded based on standardised specifications for user groups, quality levels, test areas and complaints using scanners and barcodes or iPhone app. All results are available to every authorised user online. Always up to date, any time and anywhere.

2 Easy documentation by scanning

For complex tasks and activities in the service sector, modern organisation is a decisive success factor. Individual bar codes on doors, facilities or equipment enable fast and clear documentation of attendance times and activities by scanning. Regularly recurring cleaning tasks or disinfection as well as additional activities.

Kärcher Manage enables reliable and requirement-oriented acquisition, storage and processing of all relevant data in diverse areas: contract cleaning, security, property management, caretaking, machine management and technical services. Kärcher Manage gives managers a full overview of planned, current and completed activities and utilised resources, any time and anywhere.

3 Immediately record and react

Barcodes enable the recording of damage and appropriate measures to be taken on site. Instructions for subsequent cleaning, repairs or replacement can be issued immediately. This reduces reaction times and makes an important contribution towards the prevention of nosocomial infections.

YOU MANAGE YOUR BUSINESS. WE PROVIDE THE SUPPORT.

Things can be much easier when people's talents are combined. Because it is simply more successful to pursue common goals, to complement each other and to learn from one another. One could call it the principle of progress. We call it Kärcher Services. A promise of partnership. Our promise to you.

Kärcher Services:

Kärcher Maintain service packages

Every service package is exactly tailored to suit specific needs. The range of services includes inspections as part of prescribed safety tests, timely servicing and flat-rate full service.

Kärcher Rent

Precisely the right machine you need. Rent instead of buying. And get more: know-how and the Kärcher Full Service package.

Kärcher Used machines

If used is what you need. Starting up? Or simply just want to save costs? We have the right used machine for you. Used, generally reconditioned, good and affordable. Offers are constantly changing. Ask us.

Kärcher All Brands Service

Service and repair from a single source for your entire machine fleet – regardless of manufacturer and anywhere in the world. Service for all machines according to Kärcher standards. Service you can rely on.

Kärcher Lease Leasing

Tailor-made. Flexible. Safe. We provide the flexibility you need: with leasing and financing models for all requirements.

Kärcher Service Customer service

Service means trust. At all times. Services you really need. Fast reaction for maximum availability. Maximum value retention and compliance with all statutory requirements.
