# BIG IS BETTER

Heavy guns against coarse dirt.  
In building construction. In civil  
engineering. In road construction.  
With Kärcher.

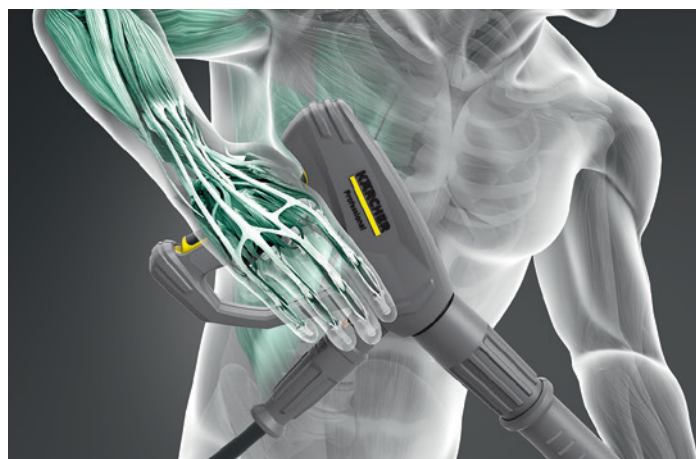

# ZERO. NOTHING AT ALL. AND STILL THE BEST

With our EASY!Force high-pressure gun, we have defined a new dimension in the ergonomics of high-pressure cleaning. Nothing less, no exaggeration. Both the patent and independent testing confirm this.

Our patented EASY!Force high-pressure gun will relieve the strain on your joints and muscles noticeably.

**What makes EASY!Force so special for users.**

In a nutshell: the holding force for the trigger is zero. Sounds like magic? Almost. But it's simply very clever use of physics, for EASY!Force uses the energy from the recoil force of the high-pressure jet. Joints, muscles and the whole body are protected, the risk of injury and non-scheduled breaks due to fatigue are reduced and ultimately productivity is increased.

# ALWAYS READY. WHEN YOU ARE

Dirt adhering to machines, tools and other equipment not only looks scruffy. It also affects readiness for use and reduces value retention.

Concrete and paint residues as well as remains of building materials on machines and equipment ultimately cause damage due to corrosion, thus incurring costs and reducing availability. Hot- and cold-water high-pressure

cleaners from Kärcher easily remove such residues. And, thanks to the adjustable water pressure and volume, they are always tailored to the task. So your investment will retain its value with minimum effort.

#### **Mobile. Whatever the size.**

Smaller machines are naturally also suitable for use on scaffolding and can be easily carried. You can simply carry the larger equipment to the right place by crane. Appropriate suspension attachments are, of course, integrated.

#### **Accessories. Tailor-made.**

With the right nozzles, only the dirt is attacked, and not the surface. And our surface cleaners for façade and floor cleaning already have the right suction device for dirty water.

#### **Working. But comfortably.**

Our EASY!Force high-pressure gun protects the health of the user. And, thanks to servo control, it ensures easy adjustment of water pressure and volume to the cleaning task in accordance with requirements.

# SWEEPS FAST TO PREVENT BUILDUP OF COARSE DIRT

Construction sites, building shells, warehouses: coarse dirt must be removed immediately, as it obstructs working and reduces safety at work.

Large quantities of coarse dirt can be found on practically every construction site. To prevent this resulting in dangerous tripping or slipping hazards, it should be removed as soon as possible. This can be done fastest and most easily with our sweepers and vacuum sweepers.

They are a tried and tested means of removing coarse dirt quickly, thoroughly and safely, and thus increase safety at work and ensure that you can continue working without delay.

### **Sweepers and vacuum sweepers.**

Depending on the location and available space, various options for the removal of coarse dirt are available. However, they must all be ready for use at the press of a button without set-up times, very manoeuvrable, easy to handle and designed for harsh use. Main sweeper rollers that can be precisely adjusted to requirements ensure the best sweeping results.

Push versions are suitable wherever the use of a broom would be too time-consuming and troublesome. With big ride-on machines, you can also clean very extensive areas faster and above all more economically than with a large number of staff. And, thanks to state-of-the-art filter systems, vacuum sweepers work practically dust-free.

# INTERIOR CONSTRUCTION WORK. PREFERABLY DUST-FREE

Eliminate dust during interior construction work as soon as it is generated. Mobile. Fast. Effective. On the safe side with Kärcher.

# LOOSE DIRT. KÄRCHER KEEPS IT DOWN

Many different phases of interior construction work cause different kinds of loose dirt. This cannot be avoided. But the dirt can be reliably removed.

Electricians, carpenters, drywall builders, joiners, parquet layers and tilers: during interior construction work, many trades meet – and each one unavoidably causes loose dirt such as dust or chippings during milling,

drilling, sawing or cutting work. Thanks to clever solutions from Kärcher, it can be effortlessly removed as it is generated and then safely disposed of.

#### **Wet and dry vacuum cleaners.**

For interior construction work, one of the most important machines altogether – we recommend vacuum cleaners which can be easily transported with a tank volume of up to 100 litres. Integrated tool sockets with automatic Start/Stop function and accessories allow you to start the vacuum cleaner at the same time as the machine for milling, drilling, sawing or cutting, and dirt can be removed immediately. The standard antistatic system ensures safety and, of course, our wet and dry vacuum cleaners can handle fluids effortlessly.

#### **Automatic Tact filter cleaning.**

Tact is the clever solution for constant high suction power. The filter integrated in the vacuum cleaner is cleaned automatically during operation. The entire tank volume can thus be used without the suction power decreasing.

# LUNGS DO NOT REPLACE FILTERS

Although our respiratory organs are excellent at cleaning themselves, they are not designed for constant exposure to the dusts that are present on all construction sites.

### **The right filter protects.**

Quartz dust, asbestos dust, sawdust, fibrinogenic and allergenic dust: the list of hazardous dusts is long. If these dusts are not consistently and reliably extracted, there is an increased risk of allergies and chronic lung diseases, and even life-threatening cancer.

In combination with our powerful vacuum cleaners, our special colour-coded filters for all dust classes significantly reduce dust impact and thus help to minimise the health risk to users.

# EXTREME CHALLENGES

On a construction site, things are much harder and more demanding than elsewhere. This also applies for questions of cleaning technology. And we have the answers to these questions.

The removal of especially large quantities of dirt, the cleaning of sensitive components, very stringent requirements regarding civil engineering, foundation construction, traffic routes and hydraulic engineering, building

repairs, and for sanitation, demolition and recycling: with our powerful solutions, we also take measures far beyond what is usual – specifically concerning the protection and safety of users.

#### **Ultra-high pressure (UHP).**

Our water-jet technology cuts through concrete (and even steel), exposes steel reinforcements and, with 4000 bar pressure, plays an important role in substrate preparation and concrete repair. In addition, we naturally also provide the appropriate protective clothing and equipment for users.

#### **Industrial vacuum cleaners.**

From the reliable removal of large quantities of dirt to use in Zone 22 and the safe extraction of harmful dusts: our robust machines perform their service as required, even in 24/7 continuous operation.

#### **Dry-ice cleaners.**

Dry ice can do what water cannot and where the use of water is taboo, for example the cleaning of sensitive electronic components. Our cleaners remove even the most stubborn dirt from extremely complex surfaces without damaging them.

**18 V / 36 V**

**BATTERY POWER +**

**GALACTIC POWER.  
INFINITE  
POSSIBILITIES**

# UNLIMITED COMPATIBILITY:

All batteries in the Kärcher Battery Universe are exchangeable within their voltage class, even between Professional and Home & Garden machines.

**Real Time Technology:** Integrated LC display with intelligent display of remaining runtime and charging time for better information and control.

**Watertight:** Once inserted in the machine, the battery is protected against water spray from all directions (protection class IPX5).

**High peak performance:** Processor-based and with optimised heat buffering.

**Automatic cell monitoring:** Protection from overloading during charging, overheating and deep discharging.

**Housing with integrated soft components:** Utmost mechanical sturdiness and grip in any situation.

**Powerful lithium-ion cells:** Consistent performance with low self-discharge and no memory effect.

# THE RIGHT SOLUTION FOR EVERY JOB

By professionals for professionals: as a global market leader, Kärcher offers you a diverse range of top-class services, as well as innovative and customised solutions for your requirements. We are happy to help. Every time you need our support.

## services

**All angles covered:** With our efficient solutions we help you achieve something great and become even better. Anywhere and anytime.

### consulting services

**Increased productivity means better quality:**

We optimise your cleaning processes and are happy to advise you with an individual and sustainable cleaning concept.

### service

**At Kärcher you can take customer proximity literally:** We provide expert help in the event of major faults or application problems – worldwide and at any time.

### all brands service

**Competent, reliable and fast:** for all machines. Use our Kärcher All Brands Service for the repair and maintenance of machines from other manufacturers.

### service packages

**Regular, professional maintenance** reduces the risk of breakdown for your machine fleet, extends the service life of your machines and increases their current market value.

### rental

**Rent directly from the manufacturer:** With our rental machines you use the machine best suited for your application. And only for exactly as long as you really need it.

### used

**Kärcher is Kärcher:** All machines, whether second-hand, leasing returns or demo equipment, are checked and conditioned in the used machine centre.

### visual remote support

**The appropriate diagnosis via video call:** With the "SightCall" application a Kärcher employee is connected to your smartphone camera and gives you personal advice.

### service app

**24/7 availability:** With the innovative Kärcher Service app, you can send all service messages quickly and precisely to Kärcher Service at any time.

### financial solutions

**Tailored financing:** In cooperation with well-known leasing partners we offer a variety of individual financing solutions.

## MORE INFORMATION

Our support for your success: we are your reliable partner when it comes to cleaning.
