

KÄRCHER

**HIGHLY
EFFICIENT
DISINFECTION
AND HYGIENE
SOLUTIONS**

Kärcher is the leading professional cleaning solutions provider, offering the very best in thermal disinfection, chemical disinfection and filtration.

We deliver an extensive range of robust, reliable and easy-to-use equipment; specialist service and support with flexible purchase options; and an array of value-added features including next-level monitoring tools for multiple sites.

In other words, Kärcher is here to keep you cleaning.

THERMAL DISINFECTION

What it is

Heat is a highly effective and reliable means of inactivating or killing micro-organisms even after a brief contact time. At Kärcher, we've proven this with our hot water high-pressure cleaners, steam cleaners and steam vacuum cleaners.

Where to use it:

Temperature-resistant hard surfaces and exterior surfaces, as well as surfaces and areas where chemical disinfection is not desired or is not possible, are especially suited to treatment with hot water or water steam.

CHEMICAL DISINFECTION

What it is:

Chemical disinfection allows pathogens on objects or surfaces to be killed or inactivated by means of a specially developed disinfectant. Our range of solutions offers great results with short contact times, low dosage and good material compatibility.

Where to use it:

Disinfectants and disinfectant cleaners from Kärcher are suitable, subject to approval, for hard and textile surfaces in a wide range of environments. The choice of agent must be carefully weighed up in each individual case - we are extremely happy to advise you on this.

FILTRATION

What it is:

Before viruses become bonded to dust particles and fall to the floor, they can survive in the ambient air for hours and can therefore be breathed in by people. Effective filtration removes particles, particulate material and pathogens.

Where to use it:

High-performance air purifiers and vacuum cleaners from Kärcher, which are equipped with high-quality HEPA-14 filters, close an important gap in infection prevention. They are suitable for use in all kinds of interior spaces - ask us for more information.

Choose a solution that suits you

With highly effective disinfectant and hygiene solutions, Kärcher offers the tailor-made answer to each need, for every environment and every application – today and in the future.
