MORE SUCCESS WITH A SYSTEM

Every sales floor is different. But what your customers always want are cleanliness and tidiness. And that is no problem at all when you work with the Kärcher system. We work with you to find the perfect, most economical solution by helping you select the right machines, accessories, cleaning agents and services.

High risk classification:

Areas with a high risk of infection. These are surfaces with frequent hand and skin contact or surfaces which may be considered high risk due to the work process.

Medium risk classification:

Areas with a potential risk of infection. These areas should be cleaned regularly using particularly careful methods (dust removal, surface cleaning, floor cleaning).

Low risk classification:

Areas with no risk of infection. These areas should be cleaned in order to remove contamination (e.g. dust, chemical substances, microorganisms, organic substances). There is no risk of infection here.

CUSTOMER-RELEVANT AREAS

The sales floor is one of the most frequented areas and requires correspondingly high attention. High hygiene and cleanliness standards make the difference, create trust and ensure customer satisfaction.

CHECKOUT AREAS

No matter how big the areas that you want to clean are, the result must be perfect. Manual cleaning is still common even though we now have efficient cleaning machines. Surfaces can be quickly and affordably cleaned by hand in places that machines cannot reach.

STOREROOM

Shop surfaces and goods handling areas are subject to stringent hygiene standards in food retail. Wherever hygiene matters, you can rely on special machines like our high-pressure cleaners from the Cage Food and Food compact class. In the fresh meat and frozen goods areas, our SGV steam cleaners ensure maximum hygiene and eliminate 99.999 percent of all germs.
