

KÄRCHER

FLEXIBLE. COMPACT. EFFECTIVE.

For radiant results: the SB OB single-bay unit stands out as a solution for professional vehicle washes in the smallest of spaces.

OUTSTANDING. IN ALL AREAS.

One machine, many advantages. The SB OB offers your customers complete cleaning with maximum flexibility, individual configuration options and a compact design. What's more, it also boasts low investments costs.

A CLASS OF ITS OWN

The advantages are obvious.

- With up to four dosing pumps, customers can choose from a maximum of seven wash programmes.
- A complete vehicle wash can be offered with different wash modes. This means a significant increase in sales for you.
- The integrated third wash tool makes it possible to use power foam and power rim foam as additional wash programmes.
- Additional pre-cleaning ensures an even better cleaning result.
- No separate cabinet is required for water softening and osmosis, as both are already integrated in the system without taking up much space.
- Quick and easy adjustments. The system is controlled with an intuitive, user-friendly touchscreen.

YOU CAN
ACHIEVE
MORE

LEVEL

UP

In the vehicle cleaning sector, productivity is the decisive success factor. Improving productivity has a direct impact on earnings.

- **Consultation** Deciding on a vehicle cleaning system is more than just a decision in favour of a machine. We support you from site analysis to the marketing and communication concept to final installation. During this time, you can benefit from our international experience and extensive expertise.
- **A strong brand** We put the customer at the heart of all our thinking and action. Cleaning tasks should become easier, more comfortable and more efficient. This is our mission: Kärcher makes a difference. In vehicle cleaning, we primarily achieve this for you through innovative technology, sustainability and future-oriented services.
- **Machines and accessories** We are pioneers when it comes to high-pressure cleaning. Our systems are robust, powerful and economical. Our technology is sophisticated, reliable and proven. With our systems and versatile accessories, you are perfectly equipped for any task at any time.
- **Digital transformation** Digital applications are essential to success. We offer you innovative solutions with maximum cost-effectiveness and unparalleled convenience to increase customer satisfaction.
- **Cleaning agent** Effectiveness and productivity in vehicle cleaning are inextricably linked with the use of the correct cleaning agent. Only cleaning agents which are perfectly suited to system and customer requirements guarantee optimal results in the long term.
- **Financing** We offer you modern financing options in cooperation with well-known leasing partners with great flexibility and economy, to maintain liquidity and expand the scope for action of your business.
- **Service** Your system is installed and runs without a hitch. To ensure your system remains this way in the long term, we offer you ongoing support. Our service packages and Kärcher customer service and factory-trained service partners guarantee problem-free operation in the long term.
- **Sustainability and the environment** For many years, Kärcher has been the driving force for sustainability and environmental protection in cleaning technology. As a leading global provider of cleaning systems, we have the responsibility to develop durable products with which our customers can clean in a way that conserves energy and resources. They ensure not only maximum cleanliness but also value preservation. Without unnecessary harm to the environment.

about vehicle cleaning with Kärcher.

INDIVIDUAL. PRECISE. CLEAN.

Adjustable cleaning and care programme
for highly effective cleaning.

Ex-works programmes

High-Pressure Wash The high-pressure wash using warm water removes stubborn dirt, including dust, oil and grease.

Foam Wash The foam wash using warm water, brush and active foam eliminates stubborn dirt and grey film.

Rinsing Powerful rinsing with cold water eliminates cleaning agent residue and loosened dirt resulting from the high-pressure or brush wash.

Hot Wax A water-repellent, long-lasting and glossy preservative layer is applied to seal the surface.

Additional wash programmes

Top Care Osmosis water combined with liquid spray wax is applied to ensure streak-free, stain-free drying.

Dirt Removal Eliminates especially stubborn dirt in an instant.

Insect Removal Removes insect residue from the windscreen, headlights and body without leaving any remnants behind.

Additional power foam wash programmes

Power Foam Powerful against dirt. Our power foam effectively cleans your vehicle and removes both dirt and insect residue with its foaming power.

Power Rim Foam Loosens even the most stubborn residue on rims gently and without leaving any remnants behind.

VEHICLE WASH WITH WOW FACTOR

Turning a vehicle wash into a show, our power foam ensures sensational foaming and perfect cleaning.

The power foam lance covers the entire vehicle in a large quantity of very effective foam in seconds. The power foam removes stubborn dirt and insect residues effectively and gently. The cleaning result is intensified for the customer through the foamy consistency and the comprehensive distribution of the power foam.

This effective washing result ensures a high level of satisfaction with the customers using your wash system and additional sales for you. The power foam lance is suitable for up to two additional programmes (Power Foam and Power Rim Foam).

Kärcher self-service cleaning agents are the ideal addition for a perfect washing process:

- Power Foam:
VehiclePro Foam Cleaner RM 838
- Power Rim Foam:
VehiclePro Klear!Rim Foam RM 802

Ease of operation is another advantage. Colourful operating instructions, programme tiles and the wash tool hoses guide the customer and facilitate operation.

GREAT PERFORMANCE IN A SMALL PACKAGE

We have exactly what you need for your wash. Kärcher offers an all-inclusive package for effective, comprehensive cleaning.

The SB OB single-bay unit has everything your customers need for successful complete cleaning in the smallest of spaces.

Heating Electric heating with 6 kW, 12 kW or 24 kW.

High-pressure pump The high-pressure pump is available in two versions, depending on the cleaning requirements: 500 l/h / 100 bar and 900 l/h / 120 bar.

Wash tools Depending on the version, the system offers a high-pressure lance, powerful power foam lance, gentle foam brush or combi wash tool comprising a high-pressure lance and brush.

Water softening (and osmosis) Significantly reduces limescale deposits, ensures brilliant cleaning results and, most importantly, guarantees a long system service life.

Frost protection Thanks to the frost protection, the system can be operated during the winter months without issue.

Swivel arm One or two swivel arms are available depending on the wash tools. This minimises hose wear and tear and allows for operation without a steel framework.

Wash tool container A wash tool container can be attached to the machine or provided externally for optimum wash tool storage.

- **Additional wash programmes** The additional wash programmes Power Foam, Power Rim Foam, Dirt Removal, Insect Removal and Top Care set you apart from other wash bays and continually increase sales.

APPEALING. IN EVERY SENSE.

Your customers expect more than just a wash. Kärcher combines quality with innovation. The modern design and highly effective features of the SB OB guarantee perfect cleaning results.

A real eye-catcher – the self-service single bay unit is available in the appealing Kärcher design, as a stainless steel or steel cabinet.

But the SB OB scores points not only with its design, but also with its outstanding technology that delivers great results in even the smallest of spaces.

Technical specifications don't tell the full story, but they certainly have a lot to say. Discover the potential of our SB OB wash system.

- Flexible
- Compact
- Effective
- Individually configurable
- Modular

Technical data

Number of wash bays		1
Flow rate per pump	l/h	500/900
Working pressure	bar	100/120
Voltage	V	400
Frequency	Hz	50
Number of current phases	Ph	3

RESEARCHED. TESTED. SUCCESSFUL.

40 years of experience in chemicals development – our experts collaborate across disciplines in the research, development and testing of new cleaning agents and application methods. For the best result and safe application, the team have state-of-the-art laboratories and top research and testing facilities at their disposal.

Through close collaboration with industrial customers and private users, our technologies are always setting new standards. Worldwide.

Top-level development The new chemical laboratory is at the centre of the research and development of innovative cleaning and care agents. Our experts analyse every type of dirt on all surfaces so that they can be professionally removed, picked up and disposed of. Every product that is developed here for our industrial and private customers is created using holistic thinking from the very beginning, systematically and entirely at Kärcher.

Sustainable right from the start Meeting environmental standards is becoming increasingly important. This is why Kärcher places particular value on the sustainable selection of raw materials, the development and production process and the use of resource-saving packaging solutions throughout the production chain.

Made in Germany Highest quality – Kärcher produces its own cleaning products in order to achieve consistently high quality, sustainable production and the best delivery capacity. In the highly flexible system, 0.5-litre bottles and tankers with capacities of up to 20,000 litres can be filled promptly and very economically from 25,000-litre mixing drums.

Perfect cleaning solution Kärcher cleaning and care agents are just as versatile and powerful as the devices and machines in which they are used – because they are specially developed for use with Kärcher cleaning machines. The combination makes it possible. The effective interplay between machine and cleaning agent therefore guarantees optimal cleaning.
