KÄRCHER

VACUUMING IN A NEW DIMENSION

Our individually configurable self-service vacuum cleaners provide maximum suction power together with convenience and an innovative design

POWERFUL. CONVENIENT. INDIVIDUAL.

Developed for the highest demands in terms of suction power, convenience and design and with numerous options for individual configuration

With our self-service vacuum cleaner SB VC, you always have exactly the right machine that fits perfectly into your site. And the sophisticated technical details guarantee trouble-free operation and easy servicing. Automatic filter cleaning Tact ensures consistently highest suction power. The hose retract with fibreglass pole minimises ground contact. And the optimised, ergonomic suction nozzle sits so comfortably in the hand that it is almost a pity that vacuuming can be done so quickly.

FEATURES

Automatic filter cleaning system Tact

Patented filter cleaning system Tact ensures consistently highest suction power. At the same time, it extends the lifetime of the filter and turbine, as well as the intervals between filter changes.

Simple suction hose replacement

Should the hose ever need to be replaced this can be done quickly, efficiently and cost-effectively.

Large filter area

Less is more: small, compact filter still has an approx. 50% larger filter area than comparable machines. Filter replacement is also very quick and simple.

Optimised, ergonomic suction nozzle

Your customers will achieve excellent cleaning results both in crevices and gaps as well as on surfaces with the newly developed suction nozzle. The special surface structure on the handle ensures efficient vacuuming for high customer satisfaction.

Ergonomic dirt container

The large, fully usable volume extends the intervals between emptying of the dirt container. And emptying is very easy.

Electronic coin acceptor (optional)

Thanks to simple, individual programming, you can collect different types of coins and tokens with just one coin acceptor.

Hose retract with fibreglass pole

The hose retract with fibreglass pole effectively minimises ground contact of the hose - for reduced wear and tear and to ensure that virtually no dirt gets carried into the vehicle.

Durable Ec turbine (optional)

Selecting the optional brushless DC motor will extend the service life considerably.

INDIVIDUAL CONFIGURATION OPTIONS
