EVERYTHING YOU NEED FOR HIGH-PRESSURE CLEANING

EVERY PH VALUE, EVERY MATERIAL

Unlimited applications: detergents that can handle the pressure.

Extraordinary versatility

High-pressure cleaners are great at targeting dirt, though in many applications, they are even more effective (or sometimes only compatible) when used in conjunction with detergents. Kärcher has been developing cleaning formulas for more than 40 years, and gives care and attention to the compatibility of detergents with different materials, including specialist applications such as photovoltaic systems, food production and much more.

Dirt does not stand a chance

Alkaline deep cleaners are effective against stubborn dirt, be it insect residue or smoke resin. Gentle surfactant-based cleaners are highly effective on delicate surfaces. Plus, the clever combination of acids and surfactants means they can even remove limescale and mineral contamination. See our core portfolio in this overview – or find the full range online.

OUR TOP PICKS FOR HIGH-PRESSURE CLEANING
