The right Kärcher cleaning system for any application:

# CLEAN, SAFE - AUTONOMOUS.

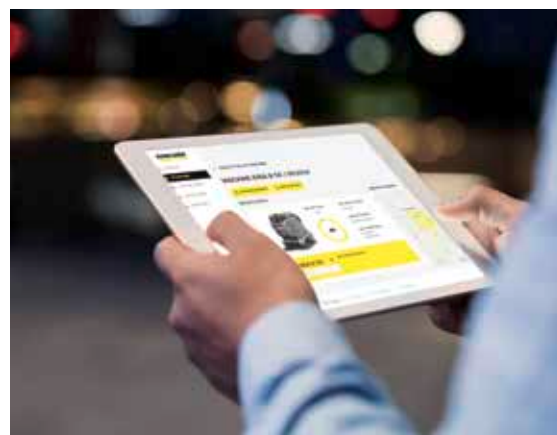

## 5 REASONS TO CHOOSE THE KIRA B 50 CLEANING ROBOT

- **Less work:** Cleaners no longer have to perform monotonous tasks, freeing up their time for more demanding work.
- **Cost-effectiveness:** The ability to perform multiple cleaning tasks in parallel saves time and increases productivity.
- **Operation:** Intuitive operation thanks to a large touchscreen display and simple maintenance and servicing.
- **Safety:** Safety-certified for public areas thanks to excellent detection of surroundings.
- **Autonomy:** Optional docking station enables fully autonomous replenishment of resources. The cleaning module keeps manual preparatory work and rework to a minimum.

The new KIRA B 50 cleaning robot looks impressive and provides outstanding service every day in a wide variety of transport and logistics applications.

KIRA B 50

Find out more  
about KIRA B 50:

Reliable sensor technology, connectivity and transparency deliver full cleaning performance – the KIRA B 50 intelligent cleaning robot offers new ways for you to tackle diverse cleaning tasks in transport and logistics companies.

The professional scrubber dryer robot is easy to set up and operate, works fully autonomously and cleans all surfaces reliably, thoroughly and highly economically. KIRA B 50 can also be easily integrated into the infrastructure, opens roller shutters and communicates with automatic guided vehicle systems.

A worker wearing a black beanie, a dark jacket, and an orange high-visibility vest is operating a grey Kärcher industrial sweeper. The sweeper has yellow brushes and is moving through a warehouse aisle. In the background, there are yellow metal shelving units and a pallet with various items, including a large black roll of material and some framed panels. The floor is concrete.

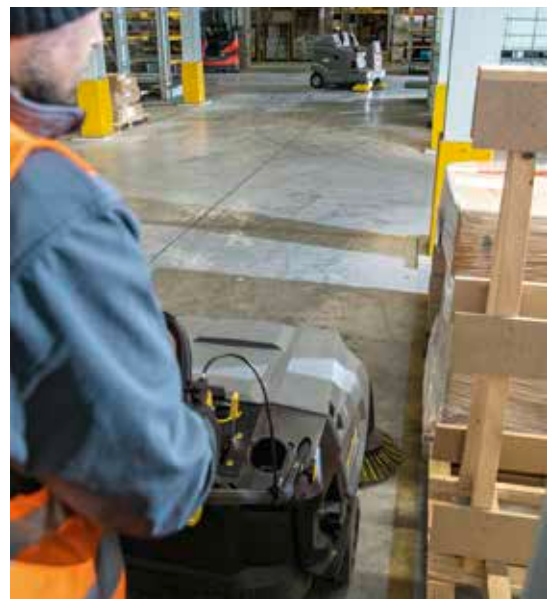

# WELL-MAINTAINED AISLES, KEEPING THINGS FLOWING

A clean warehouse promotes productivity and occupational safety, as well as protecting valuable goods and the health of employees. Kärcher sweepers and vacuum sweepers meet the highest demands.

In warehouses, high-value goods are ready for onward transport. These extensive spaces, which are often built up or difficult to access, must be kept clean on an ongoing basis, as dust, logistics vehicles and remnants of packaging can cause dirt to develop.

This is where the efficient sweepers and vacuum sweepers come into play. They are ideal for regular cleaning applications, reducing the amount of dust during cleaning and thereby protecting cleaning staff.

**Ride-on vacuum sweepers**

Climb on and go! The filter system ensures virtually dust-free sweeping. Ride-on vacuum sweepers are ideal for medium to large areas and offer benefits including intuitive EASY Operation and sophisticated ergonomics. They can be individually configured with accessories.

**Push sweepers and vacuum sweepers**

The perfect system for smaller or built-up areas. They also perform well in cluttered warehouse areas thanks to their flexibility and ergonomic operation. Push sweepers and vacuum sweepers with or without traction drive are available as individual solutions for differently sized areas.

A man in a blue and white checkered shirt is operating a grey Kärcher Professional scrubber dryer in a large warehouse. The machine has a large black brush at the front and a vacuum system. The warehouse has high ceilings and metal shelving units filled with cardboard boxes. The floor is polished and reflective. The text "WET CLEANING, VACUUMING - DONE!" is overlaid in large white letters on the lower half of the image.

# WET CLEANING, VACUUMING - DONE!

A scrubber dryer stands out from the crowd. Because it offers perfect cleaning quality without expending much effort or time. A real asset for any warehouse.

Clean storage areas preserve the value of goods and ensure compliance with health and hygiene standards. Scrubber dryers do the wet cleaning and vacuuming in a single operation. This reliably binds dirt and prevents customer complaints and injuries to employees caused by inhalation, tripping and slipping.

A well-maintained environment also implies good service quality, increases warehouse vehicle productivity and employee satisfaction, and reduces the costs of floor coverings and vehicle repair.

#### **Disc - roller**

The roller with increased contact pressure and higher speeds is perfect for deep cleaning. Coarser dirt particles are picked up by the counter-rotation without the need for time-consuming pre-sweeping. The disc delivers an optimal cleaning performance on smooth surfaces and for lighter dirt.

#### **Battery - combustion engine**

Batteries are available for all scrubber-dryer sizes and offer maximum flexibility for all applications. Diesel or LPG combustion engines for large machines allow unrestricted use on large surfaces in well-ventilated rooms and outside areas.

# SPOTLESSLY CLEAN COMMERCIAL- VEHICLES

HGVs are an important part of the distribution chain, and serve as a business card on wheels for your transport company. The right cleaning solutions from Kärcher mean you're always looking your best on the road.

Every day, various types of delivery vans and HGVs transport millions of tonnes of goods, such as building materials, heating oil, food, parts for production and consumer goods. Refrigerated trucks, articulated lorries, tankers and many more are the linchpin of logistics. Cleanliness is therefore a must.

Kärcher offers a wide range of cleaning systems for cleaning the exteriors of vehicles. Gantry car washes and mobile high-pressure cleaners allow you to remove all dirt reliably and economically, depending on your needs.

#### **Mechanical vehicle wash**

From commercial vehicle gantry car washes to mobile single brush vehicle washes through to the appropriate detergents or water treatment systems: the perfectly coordinated Kärcher system solutions for vehicle washes impress with efficiency and cost effectiveness.

#### **Mobile and stationary high-pressure cleaners**

Ideal for prewashing and smaller fleets. Combined with the right detergents, they are the perfect solution for fast, reliable dirt removal. Hot water systems loosen dirt even more effectively to make cleaning easier. Stationary systems are always ready for use with no set-up time.

A woman in a black t-shirt and grey pants is operating a grey Kärcher floor sweeper inside a large cargo van. The van's interior is lined with green metal panels and wooden slats. In the background, there are stacks of white plastic-wrapped goods on a pallet. The floor is made of dark, textured metal plates. The overall scene is brightly lit, suggesting a clean and well-maintained environment.

# WELL- MAINTAINED, HYGIENICALLY CLEAN

A hygienically clean transport environment is particularly important for foodstuffs. However, all other cargo areas must also be cleaned. The perfect job for Kärcher's systems.

Transport vehicles also need regular and thorough maintenance on the inside. Food transporters are also subject to strict legal hygiene requirements. Intensive cleaning routines are needed to meet these requirements. This is because bacteria and dirt constantly accumulate in the evaporator, especially in refrigerated vans.

Sweepers, scrubber dryers and steam cleaners from Kärcher enable you to keep everything systematically clean – in no time at all. Other dirt, for example caused by packaging or forklifts, is also completely removed.

### **Sweepers**

Remove coarse dirt that comes from packaging and when handling pallets. The manoeuvrable, compact ride-on sweepers are perfect for large areas and deliver quick cleaning results. Sweepers reach into every corner and require minimum set-up times.

### **Scrubber dryers**

Your professionals for cleaning refrigerated trucks. They take care of the wet clean and the vacuuming in a single operation. This eliminates the drying time, meaning it can be loaded again immediately. The high contact pressure removes dirt particularly effectively: perfect for transporting food.

### **Steam cleaners**

Effective against germs and bacteria, with no need for chemicals. Our steam cleaners ensure hygienic cleanliness, especially in hard-to-reach sections of food vans. Excess condensation water can be vacuumed back up straight away, which saves time and allows the van to be used again immediately.

# A CLEAR CASE FOR SWEEPERS

Running like clockwork. Well-maintained premises ensure smooth, safe logistics processes. With Kärcher sweepers and municipal machines, you can keep large areas clean efficiently, all year round and in all weather conditions.

A lot of dirt accumulates in logistics centres, container ports and transshipment centres. The large sweepers and municipal vehicles are specially designed for use in extended areas with high levels of dirt. This allows you to remove contamination in the most efficient way.

The ergonomic, simple and intuitive operation supports users in their cleaning tasks. Our implement carriers can also be used for various applications in winter, for example for clearing snow or spreading salt.

### **Industrial sweepers**

Thanks to their high area performance, they reliably remove dirt for smooth-running logistics. On machines with an integrated Flexible Footprint System, the brushes adapt to the surface and, together with the sweeping system, ensure excellent cleaning results. Intuitive operation and high container emptying guarantee working comfort.

### **Municipal machines**

The compact, manoeuvrable machines are designed for large areas and are true all-time professionals: from spring cleaning and summer green space maintenance through to autumn leaf fall and winter services. The robust municipal machines with a range of implements offer application-optimised solutions in terms of performance, operation and economy, and therefore represent a stable investment for many years.

# GO-TO HELPERS ALL YEAR ROUND

Quiet, flexible and safe cleaning: Powerful Kärcher Outdoor Power Equipment is the ideal choice for maintaining the outdoor areas and green spaces of logistics companies.

Innovative cordless tools combine power and durability with health and safety and environmental protection. All batteries in the 36 V class are suitable for all machines in the Kärcher Outdoor Power Equipment range. That means they're always ready for use and guarantee optimal results on every cleaning task.

Low-noise, ergonomic and comfortable battery-powered tools enable you to keep your premises in perfect shape all year round. For example, use the leaf blower in autumn to efficiently remove fallen leaves.

### Leaf blower

Removing leaves and other dirt quickly, thoroughly and above all quietly is the speciality of our battery leaf blowers. Available for large areas as backpack version LBB 1060/36 Bp or as the smaller handheld LB 930/36 Bp.

### Multi-tool

The battery-powered MT 36 Bp multi-tool is a pole hedge trimmer and pole-mounted pruner in one. It offers impressively smooth running, comfortable and safe handling as well as exhaust-free, low-noise operation.

### Brush cutter

Thanks to its low operating noise, the BCU 260/36 Bp can also be used in noise-sensitive areas. With its individually adjustable, ergonomic two-handed handle, it sits comfortably in the hand and can also be used as a line trimmer with the appropriate accessories.

# NEXT STOP: CLEANLINESS

Kärcher cleaning solutions ensure optimal freshness and well-being anywhere where thousands of people travel to and from every day for business or pleasure.

Countless travellers pass through railway stations and airports. They all want to experience a pleasant environment. To meet this demand, numerous cleaners work behind the scenes every day, effectively supported by Kärcher cleaning systems.

From high-pressure cleaners to vacuum cleaners and floor cleaning equipment, special detergents and special solutions, they all remove dirt in a targeted and reliable manner to ensure spotlessly clean buildings, platforms, sanitary facilities and other public areas.

**Indoor areas**

Here, the floors in particular are subject to heavy use. Scrubber dryers help with daily cleaning and offer the optimal solution in a range of sizes for every nook and cranny.

**Special solutions**

Escalator cleaners are indispensable for removing dirt from escalators effortlessly and effectively. Dry ice machines can remove stubborn dirt in places where water cannot be used, for example on ticket machines.

**Outside areas**

On forecourts, entrances and stairs, travellers generate a lot of dirt that needs to be removed regularly. Mobile high-pressure cleaners are suitable for this purpose. These are available as cold-water or hot-water machines, as well as battery-powered units or trailers.

# ALWAYS FIRST CLASS

Whether on a plane, bus or train, a well-maintained environment is essential to passenger health, safety and well-being. Kärcher cleaning systems keep everyone right on track.

Passengers and crew alike want a pleasant environment on board. This is the only way to guarantee a comfortable travel experience and a motivating working environment. The relevant areas must therefore be cleaned regularly.

Kärcher offers you time-saving and reliable solutions for these tasks. The versatile vacuum cleaners, manual tools and appropriate detergents support cleaning staff in their work on board the various transport vehicles in a highly efficient manner.

#### **Cordless or corded**

A wide range of vacuum cleaners is available to keep trains, buses and planes impeccably clean. The various corded or cordless machines are adapted to the aircraft's electrical system or operate on battery power.

#### **Backpack vacuums**

Pop it on, clip it in and start vacuuming! The ultra-lightweight, super-strong backpack vacuums enable simple, ergonomic cleaning powered by a battery with no annoying cord. Short set-up times minimise the workload and ensure greater efficiency.

#### **Spray extraction machines**

The ideal solution for cleaning seats and upholstery. For the best fibre-deep cleaning results, the cleaning solution is pressurised and sprayed deep into the textile fibres, then suctioned back up together with the loosened dirt.

#### **Manual tools and detergents**

Floor mops, feather dusters, cleaning cloths and appropriate detergents help cleaning staff to remove all kinds of dirt from various surfaces in a targeted manner and in the shortest possible time.

A woman in a green uniform and yellow gloves is standing on a staircase, holding a clipboard. She is looking down at the clipboard. The background is a blurred office or social room.

# THEY DO A FANTASTIC JOB!

Employees are the beating heart of transport and logistics companies. Their motivation is boosted by a visibly clean working environment – that's where smart Kärcher cleaning systems come in.

Logistics and transport companies need more than just vehicles and warehouses; they are nothing without a strong workforce. The workers' offices, social rooms and sanitary facilities must be cleaned just as carefully as the public operating areas. Because when somewhere is clean, people like to come back.

These types of cleaning tasks typically require smaller machines, manual cleaning tools and labour-saving solutions for cleaning staff. This allows all areas to be cleaned and disinfected highly effectively in a very short time.

### **FlexoMate**

With plenty of storage space, holders for cleaning machines and individual expansion options, this clever trolley can be adapted to meet the requirements of diverse cleaning applications.

### **Manual cleaning**

This is still the main method used for office spaces. Cleaners need simple but effective tools to quickly remove all dirt, such as cleaning cloths, textiles for dry cleaning, pads, mops and detergents.

### **Carpeted floors – Hard floors**

Carpet cleaners, vacuum cleaners and scrubber dryers are available for cleaning rooms of various sizes with different floor coverings.

### **Sustainable detergents**

eco!perform high concentrates and ready-to-use products are designed for daily cleaning routines on floors, surfaces and sanitary areas. Simple, efficient and ecological. This is also confirmed by the EU Ecolabel and Nordic Swan Ecolabel sustainability certificates.

**36 V**

**BATTERY POWER+**

**GALACTIC POWER.  
INFINITE  
POSSIBILITIES.**

# UNLIMITED COMPATIBILITY:

All batteries in the Kärcher Battery Universe are exchangeable within their voltage class, even between Professional and Home & Garden machines.

**Real Time Technology:** integrated LCD screen with intelligent display of remaining runtime and remaining charging time for more information and control.

**Watertight:** once inserted in the machine, the battery is protected against water spray from all directions (protection class IPX5).

**High peak performance:** processor-based and with optimised heat buffering.

**Automatic cell monitoring:** protection from overloading during charging, overheating and deep discharging.

**Housing with integrated soft components:** extreme mechanical robustness and grip in any situation.

**Powerful lithium-ion cells:** consistent performance with low self-discharge and no memory effect.

# PROFESSIONAL CLEANING TECHNOLOGY

Now available for everyone! With our liquid-to-pellet dry ice blasters, this technology will now become the first choice for you and your company. Technically and economically.

Always ready for action, mobile and independent of dry ice suppliers, the IB 10/8 L2P - the only one of its kind in the world - simply produces its own pellets from liquid CO<sub>2</sub> and also requires so little compressed air (maximum 900 l/min) during operation that it can be used on compact workshop compressors and with common compressed air networks without any problems. With this superior cleaning technology, anyone can benefit from these impressive features.

**Dry ice can do what water cannot.**

And it can also do these things in situations where water is not a viable option. Sensitive vehicle electronics or heavily soiled operating equipment such as conveyor belts are just two examples. Our dry ice cleaners allow you to effortlessly and gently remove the most stubborn dirt. Oils, greases, wax, brake dust,

sealant and adhesive residues, silicone and rubber residues, soot and resin all disappear, even from the most complex substrates. Even in the vehicle interior you can remove coffee, chocolate or chewing gum remnants from seats, floor mats and areas that are difficult to access.

# RESEARCHED. TESTED. SUCCESSFUL.

Forty years of experience in chemicals development – our experts collaborate across disciplines in the research, development and testing of new detergents and application methods. For the best results and safe application, the team have state-of-the-art laboratories and top research and testing facilities at their disposal.

**Through close collaboration with industrial customers and private users, our technologies are always setting new standards. Worldwide.**

**Top-level development** The new chemical laboratory is at the centre of the research and development of innovative detergents and care agents. Our experts analyse every type of dirt on all surfaces so that they can be professionally removed, picked up and disposed of. Every product that is developed here for our industrial and private customers is created using holistic thinking from the very beginning, systematically and entirely at Kärcher.

**Sustainable right from the start** Meeting environmental standards is becoming increasingly important. This is why Kärcher places particular value on the sustainable selection of raw materials, the development and production process and the use of resource-conserving packaging solutions throughout the production chain.

**Made in Germany** Highest quality – Kärcher produces its own cleaning products in order to achieve consistently high quality, sustainable production and the best delivery capacity. In the highly flexible system, 0.5-litre bottles and tankers with capacities of up to 20,000 litres can be filled promptly and very economically from 25,000-litre mixing drums.

**Perfect cleaning solution** Kärcher detergents and care agents are just as versatile and powerful as the units and machines in which they are used – because they are specially developed for use with Kärcher cleaning machines. The effective combination of machine and detergent guarantees optimal cleaning.

# POWERFUL CLEANERS

Kärcher detergents are specially formulated for use in Kärcher cleaning machines. They are gentle on the machine while guaranteeing optimal dirt removal. Many detergents also contain special ingredients to care for and protect the machine.

Whether for use in high-pressure cleaners or scrubber dryers, for cleaning floors, office areas or sanitary facilities, we have the right detergent for every application.

**FloorPro Intensive Deep Cleaner Extra RM 752**

Extra powerful deep cleaner for removal of stubborn dirt and coatings from alkaline-resistant floors. Removes even the most stubborn oil, grease and mineral-based dirt.

**FloorPro Tyre and Abrasion Marks Remover RM 776**

Highly active special cleaner for removing rubber abrasion marks and marks caused by forklift trucks. Also effectively removes stubborn oil and soot contamination as well as polymer and wax coatings. Adhesive tape residue is efficiently removed.

**FloorPro Deep Cleaner RM 69 eco!efficiency**

Powerful detergent, effortlessly removes stubborn oil, grease, soot and mineral contamination from standard and industrial floors. It is economical, efficient and environmentally friendly thanks to the eco!efficiency formula.

**PressurePro Active Cleaner, alkaline RM 81**

This universal high-pressure detergent is powerful yet gentle on surfaces. The highly concentrated formulation effortlessly removes heavy oil, grease and mineral contamination and extremely high-yield and therefore economical. Suitable for washing vehicles, tarpaulins and engines.

A full-page background image featuring an astronaut in a white spacesuit driving a grey rover on a rocky, reddish-brown planet surface. The Earth is visible in the dark sky above, and the rover's headlights are on. The text 'WHAT IF THE FUTURE OF CLEANING CHANGES TOMORROW?' is overlaid in large white letters.

# WHAT IF THE FUTURE OF CLEANING CHANGES TOMORROW?

No matter how radically your business changes, we can help you to keep up with the challenges ahead. Just reach out to us to reach for the stars. **Nothing can stop you. With services and digital solutions from Kärcher.**

# AN OVERVIEW OF OUR SERVICES AND DIGITAL SOLUTIONS:

## financial solutions

**More freedom for your finances:** we will provide you with standardised and individually tailored financing solutions adapted to meet your needs and requirements.

## service packages

**Regular, professional maintenance:** reduces the risk of breakdown for your machine fleet to a minimum, extends the service life of your machines and increases their current market value.

## rental

**Rent directly from the manufacturer:** with our rental machines, you can use the machine best suited for your application. And only for as long as you really need it.

## mykärcher business

**24/7 availability:** with myKärcher Business we offer you the opportunity to submit service reports and orders of any kind quickly and precisely at any time and from any location.

## FURTHER SERVICES IN OUR PORTFOLIO:
