Vacuum Cleaner with Water Filter | Penyedot debu dengan saringan air

The multi-stage filter system (water+HEPA filter) of DS 6 ensures that even microscopic dirt particles as small as 0.3 µm are extracted. This is ideal for families with young children or people with allergies. DS 6 relies on the natural power of water being swirled around at high speed. The dirt is piped through the swirling water, reliably filtered from the air and bound in the water. The result: exceptionally fresh, 99.9% clean exhaust air.

Sistem penyaringan berjenjang (filter air+HEPA) dari DS 6 menjamin bahkan partikel debu sekecil 0.3 mikrometer tersaring. Ideal untuk keluarga dengan anak-anak atau mereka yang memiliki alergi.
