

KÄRCHER

GET A GRIP OF YOUR WINTER MAINTENANCE PLANS.

While everyone else is starting to think about their summer holidays and promise of warmer weather, now's the time for you to be thinking ahead and putting plans in place to keep next winter's snow and ice at bay.

You can't be in control of what mother nature throws your way, but you can rely on Kärcher as a trusted partner to help you manage the risk as much as "reasonably practicable".

Get ahead and get the job done with our wide range of winter service applications:

- Snow removal
- Snow throwing
- Snow sweeping
- Snow transporting
- Spreading (with mounted, box or funnel spreader)
- Brine spraying

READY FOR ANYTHING

Clearing winter away just got easier (and more comfortable!) with Kärcher's strong, compact and maneuverable implement carriers.

Technology that means something

Thanks to the permanent all-wheel drive and four equal-sized wheels, there is outstanding traction even in wintry conditions. The load limit control is particularly effective when snow throwing. It ensures that the driving speed is automatically adapted to the decrease in performance on the front implement.

Driver comfort is key

Our implement carriers are comfy too, with optimal heat insulation, powerful heating systems and winter-proof equipment features, such as heated seats, heated windscreen and exterior mirrors - drivers won't want to leave the cab.
