

A Kärcher industrial floor sweeper is shown in operation within a curved tunnel. The machine is grey and black, with a large rotating brush at the front. A person in a blue shirt is seated on the machine, steering it. The tunnel has a curved concrete ceiling and walls, with a metal railing on the right side. The floor is a smooth, light-colored concrete.

# KÄRCHER

# SIMPLY RENT.

**Renting for a short term, or adding equipment to your fleet for an extended project are great reasons to rent equipment from Kärcher.**

**We have equipment available for both your interior and exterior. All equipment is factory certified by Kärcher technicians.**

**Sweepers  
Scrubbers  
Carpet  
Extractors  
Burnishers  
And More!**

With rental machines, you're always using just the right machine that is optimal for the specific application. And only for just as long as it is actually needed.  
Renting directly from the manufacturer – the first choice for professionals.
