K-POS MATERIAL

K-POS Material

The K-POS is our brand's innovative and unique statement at the point of sale. This fully modular solution is designed to distinguish our brand from the rest, and represent our brand values towards the customer. The high-quality powder coating of all visible surfaces promises a visually appealing storage of goods in the sales area.

All our parts are based on a simple modular principle and easy to set up for everyone. In addition to the design, the K-POS focuses on modularity.

No matter whether for machines, accessories or detergents.

No matter whether in a DIY store, a specialist store, or even as part of the presentation on small trade shows.

No matter whether the available space for our brand is 2 sqm or 20 sqm.

For any of these demands, the system can be configured individually.

Discover the endless options with our Kärcher POS system!

Overview K-POS and graphics: <https://smartbox.karcher.com/display/MAR/POS+%7C+Trade+Marketing>

Does not fit with standard shelf system!

Pallet presenter metal

The new generation of the pallet presenter offers the possibility to show a machine and have communication space at the same time. Its space-saving design allows for smooth sales of goods from the pallet. Ideally suited for use in DIY for secondary placements, in pallet streets or busy aisles. The metal construction guarantees durability, and easy motif changes thanks to magnetic foil mean that communication can be quickly adapted to new machines or campaigns. Graphics have to be ordered separately. Dimensions: 45 x 93 x 200 cm (w/d/h)

Order no.

STANDARD CARDBOARD DISPLAY

Standard Cardboard Display

These displays can be used very flexibly with nearly all product groups. Due to the modular structure, the display can be configured individually, allowing the use in various POS situations. The display system is produced very cost-effectively, in large quantities, and at an outstanding quality level and sturdiness. The pricing depends on the individually required configuration and the necessary service level of our supplier.

Thus we can ensure that only required parts are shipped and invoiced, avoiding the waste of already produced materials.

The displays are stored at our supplier's facility. On demand they are picked, packed or shipped in bulk. The order placement is done as usual, the shipment is effected by our Marketing warehouse. Bulk orders have to contain the part numbers of the components, transportably packaged displays usually will be given a separate Marketing part number. Due to this handling process we're able to provide individual display solutions quickly, at an excellent quality and at a very reasonable price. If you want to receive your display set in single packing - please add to your order our part number 0.023-758.0 in the respective quantity.

PODIUM SHOP IN SHOP

Podium Shop in Shop

For any type of Professional Point of Sale, and as well for large-scale placements of other product ranges, we are offering our fully modular and flexible Professional Shop in Shop system. Starting at a size of 120 x 80 cm, the system is adaptable to any available store space and can be used e.g. for sample machine placements, for combinations with accessories, or for machine stock.

The prints - or product carriers - are exchangeable in seconds, thus can be adapted to any new placement situation.

MINI SHOP IN SHOP 2.0

Mini Shop-in-Shop 2.0

The further development of the Mini Shop in Shop 2.0 offers the possibility of displaying and stocking goods in a small space. In addition, there is still space for communication. The robust metal construction ensures durability. With a simple exchange of the magnetic graphics, the Mini SiS can be quickly adapted for other devices or campaigns. With the optional back wall attachments, more space can be created for hanging goods or communication. The Mini SiS 2.0 is offered

in two different versions (wide and narrow) to suit different space requirements. It is possible to connect several Mini SiS 2.0 and place them next to each other.

The crossbar at the front of the shelf - compatible with all Battery machine holder.

Dimensions of the large basic version: 132 x 62 x 140 cm (W/D/H)

Dimensions of small basic version: 72 x 62 x 140 cm (W/D/H)

MINI SHOP IN SHOP 2.0

Mini SiS 2.0 Basic module large

On request

The high-quality and robust construction of the Mini SiS 2.0 makes it possible to present Kärcher machines in an attractive way. The basic version large offers sufficient space to stock goods on a pallet. Back wall and side panels can be used for graphics as well as for hanging accessories on perforated panel hooks.

The robust metal construction ensures durability. With a simple exchange of the magnetic graphics, the Mini SiS 2.0 can be quickly adapted for other devices or campaigns.

Crossbar at the front of the shelf - compatible with all Battery machine holder.

Dimensions: 132 x 62 x 140 cm (W/D/H)

Currently no stock, as demand is too low - re-production only from a requirement of at least 25 units
