

**KÄRCHER**

# PROFESSIONAL VACUUMING: REDEFINED.

Discover the best and latest dry vacuuming technology from Kärcher Professional.

# THE DRY VACUUM RANGE

Our technically advanced Kärcher Professional dry vacuum cleaners reliably remove loose and dry dirt - making them ideal for use in hotels, offices, retail, building cleaning, and a range of other environments.

From sustainability-focused models made from up to 60% recycled materials, to ergonomically designed innovations like our back-friendly BVL vacuums and whisper-quiet machines reaching just 52 dB(A), our Professional dry vacuum range caters to a versatile range of requirements

## T 11/1 CLASSIC ADV RE!PLAST DRY VACUUM CLEANER

1.527-219.0

Max. power rating (W)	850
Vacuum max. (mbar)	235
Air-flow rate (l/s)	40
Sound-pressure level (dB(A))	67
Container capacity (l)	11
Weight (kg)	6.2
Dimensions (mm) (LxWxH)	385 x 285 x 385

## T 10/1 HEPA DRY VACUUM CLEANER

1.527-309.0

Max. power rating (W)	585
Vacuum max. (mbar)	185
Air-flow rate (l/s)	40
Sound-pressure level (dB(A))	52
Container capacity (l)	10
Weight (kg)	6.6
Dimensions (mm) (LxWxH)	430 x 255 x 370

## T 10/1 HEPA BP DRY VACUUM CLEANER

1.527-355.0

Max. power rating (W)	500
Vacuum max. (mbar)	223
Air-flow rate (l/s)	40
Sound-pressure level (dB(A))	57
Container capacity (l)	10
Weight (kg)	6.5
Battery Runtime in in ecoefficiency / power mode (7.5 Ah battery) (min)	31 - 66
Dimensions (mm) (LxWxH)	440 x 250 x 355

## T 15/1 HEPA BP DRY VACUUM CLEANER

1.355-355.0

Max. power rating (W)	500
Vacuum max. (mbar)	223
Air-flow rate (l/s)	40
Sound-pressure level (dB(A))	57
Container capacity (l)	15
Weight (kg)	7.1
Battery Runtime in in ecoefficiency / power mode (7.5 Ah battery) (min)	31 - 66
Dimensions (mm) (LxWxH)	430 x 255 x 405

# THE NEW T RANGE

Sustainable, ergonomic, and ultra-quiet: our **NEW T-Range** machines are made from 45% recycled material and offer outstanding suction power, ergonomic operation, and extremely low noise levels.

Available in corded and battery-powered versions, these revolutionary vacuum cleaners redefine the standard of flexibility and ease in Professional vacuuming.

## CORDED VERSION

Operating at an ultra-quiet 52 dB(A), the corded versions are perfect for seamless daytime cleaning.

Featuring an extra-long 12m cable and a practical integrated re-winder, you get maximum reach with quick, twist-free storage - minimising stress and keeping your workspace safe and tidy.

## BATTERY VERSION

Part of the 36 V Kärcher Battery Power+ platform, these Bp models offer total cordless flexibility with fast charging to keep downtime to a minimum.

Operating at a whisper-quiet 53 dB(A) in eco!efficiency mode, they are perfect for daytime cleaning in noise-sensitive environments, delivering high-performance suction anywhere, anytime.

## FEATURES OVERVIEW

**NEW**

### Robust metal tube

A chrome-plated steel suction tube ensures maximum durability and stability in daily vacuuming.

### 45% recycled materials

Each unit is made from 45% recycled materials, significantly reducing the energy required for production and minimizing the use of valuable raw materials which saves up to 2.0 kg of virgin plastic per unit.

### Ergonomic foot switch with additional eco!efficiency mode (Bp Version only)

Save energy and reduce noise levels even further with the eco!efficiency mode. Designed to optimize efficiency, this technology ensures that you achieve maximum results while minimizing energy consumption.

### 10 l or 15 l container (modular interchangeability)

The heads and containers are fully interchangeable allowing the user to customize the cleaning set-up to suit different tasks.

### Switchable combi-nozzle (280mm)

Match your vacuum to your cleaning requirements with a range of ergonomic accessories including the switchable combi-nozzle.

### 2 m hose

Enjoy greater vacuuming flexibility with a practical 2m long hose.

### 36 V Battery Power

(also available in 12m corded version)

### Easy accessible accessory storage

Access your required vacuuming accessories all within an arm's reach with on-board storage.

### HEPA 14 filter

All versions in the new T Range are fully equipped with a HEPA 14 filter. HEPA H14 is approved according to DIN EN 1822:2019 and DIN EN 60335-2-69. HEPA 14 filters can capture particles as small as Covid-19 thanks to the filter's specific modes of action.

### Fleece filter bag Basket filter, Motor protection filter

All models in the new T-Range include a tear-resistant 3-layer fleece filter bag (dust class M).

## A DESIGN THAT JUST MAKES SENSE.

### All within an arms reach.

With integrated accessories (including an integrated crevice tool and upholstery tool) and a foldable handle, the T-Range sets a new standard for accessible cleaning equipment.

### Shaping up for success.

Designed with ergonomics at the core, the slim rectangular shape of our new dry vacuum range is a game-changer, not just a design statement. The unique build allows almost effortless navigation of tight spaces, gliding around furniture and obstacles.

Hallways and crowded rooms are no longer a challenge, plus carrying the vacuum from room to room is far more comfortable, sitting close to the body to reduce strain and fatigue.

Better yet, storing the vacuums is simpler than ever with a seamless flipped parking position that allows practical storage of machines in a much smaller space (no more cramming into cupboards!).

### Stair-proof and life-proof

Not forgetting an impressive degree of durability and robustness, the tough design of the chassis, housing, bumper, and large wheels ensure these vacuums are well protected against the bumps and mishaps of everyday life.

Don't believe us? Scan this QR code to see for yourself (QR linking to video of vacuum being chucked downstairs on Youtube)

### Build your perfect vacuum.

With a modular design, these vacuums offer versatility like never before. With two corded and two battery versions to choose from, and container capacities of either 10 or 15 litres, this range uniquely caters to your specific cleaning needs.

But that's not all - the modularity extends beyond just the provided versions. The heads and containers are fully interchangeable allowing you to customize your cleaning set-up to suit different tasks.

# HAVE YOU HEARD OUR NEW T VACS? NO, OF COURSE YOU HAVEN'T.

Minimise disruption and maximise peace with ultra-quiet vacuuming. Operating at a volume of just **52 dB(A)** for the corded version and 53 dB(A) with battery power in eco!efficiency mode.

Thanks to a particularly efficient motor and its special mounting and encapsulation, these machines have been cleverly designed for use in **noise-sensitive** areas, making daytime cleaning easy.

They are ideal for day and nighttime use in offices, public facilities, schools, nursing homes, hotels and anywhere where low volume is required. Shhh...

# VACUUM THE EXTRA MILE (OR PRETTY CLOSE TO THAT).

Vacuuming has never been so flexible with the **12m long cord** within our corded models. But don't worry, the rewinding of this extended cord is still super quick despite its impressive length thanks to the practical **cable rewriter** feature.

Better yet, the cable itself is also **fully replaceable**. This means no expensive service costs or the need to replace the entire machine due to a minor issue like the power cord breaking.

**Looking for the full freedom a battery vacuum can provide?** The Bp models are powered by our 36 V battery platform, offering efficient runtimes and battery interchangeability with other products in the Bp range. Specifically, with our Battery Power+ 36/75, you can clean for up to 66 minutes on a single charge.

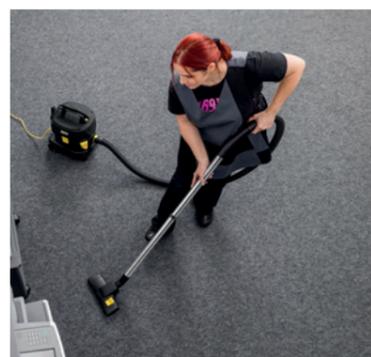

The battery versions also include the innovative ecoefficiency mode, designed to optimise efficiency whilst reducing energy consumption and volume levels (even more), meaning you can work super quietly during the day without causing disruption.

# RE-THINK THE VACUUM WITH THE RE!PLAST.

The **NEW** T 11/1 Classic Adv Re!Plast dry vacuum cleaner offers powerful suction for carpets and hard floors, while being sustainably constructed from 60% recycled plastic.

The 850-watt motor generates an impressive level of power at 235 mbar/23.5 kpa, combining outstanding cleaning performance with innovative features such as the fully detachable and ultra-visible power cord. Excellent maneuverability is also provided by two fixed and two steering castors, while the tilt-proof design, carrying handle, and ergonomic elbow ensure comfortable transport.

All of this comes at an excellent price-performance ratio.

## Service-friendly!

Sometimes, power cords break due to the daily strain of everyday Professional cleaning. This can typically lead to expensive service costs and machine downtime.

That's why we've equipped this model with a detachable power cord which can be easily replaced in just a few seconds. We've also included a durable protection cover which provides additional protection against the cord from pulling out again. Simple, but very cost, time, and resource-saving in the long run.

## Performance meets responsibility

The T 11/1 Classic Adv is manufactured with an impressive 60% recycled material content. Thanks to the use of recycled material, the energy needed for production is significantly reduced and the amount of valuable raw material is minimised. In general, we can say that using recycled material saves 1.425 kg of virgin plastic per T 11/1 Classic Adv Re!Plast unit.

The detachable and replaceable power cord design also means that replacement on the entire machine due to a small fault such as the cord breaking is no longer necessary. This reduces electronic waste and extends the lifespan of the machine.

## Tough enough for the job

Even with such a high recycled plastic percentage, this vacuum does not falter in its robustness.

Passing tough professional laboratory testing, the T 11/1 Classic Adv provides the durability needed to meet the requirements of daily cleaning.

## FEATURES OVERVIEW

**NEW**

### Robust metal tube

A chrome-plated steel suction tube ensures maximum durability and stability in daily vacuuming.

### 2 m hose

Enjoy greater vacuuming flexibility with a practical 2m long hose.

### 60% recycled materials

A benchmark in sustainability, this model is manufactured from 60% recycled materials.

### 12m yellow cable

Vacuum further with a 12m long cable, designed in a noticeable yellow shade for maximum visibility and trip safety in busy spaces.

### 11 l container

The 11 litre container capacity is perfect for efficient daily professional cleaning.

### Plugable cable

A fully detachable cable allows easy replacement in seconds, with a protection cover to prevent the cable from disconnecting once re-fitted.

### Switchable combi-nozzle (272mm)

Match your vacuum to your cleaning requirements with a range of ergonomic accessories including the switchable combi-nozzle.

**Fleece filter bag, Basket filter, Motor protection filter**  
Includes a tear-resistant 3-layer fleece filter bag (dust class M).

# MAKES A DIFFERENCE

Our latest dry vacuums represent our ongoing commitment to a sustainable future. Made with 45% recycled materials, our T 10/1 and T 15/5 models minimize their environmental impact and your carbon footprint. We comply with all legal requirements for end-of-life plastic component take-back and are continually developing initiatives to further enhance our recycling practices.

Better yet, the Bp versions are also equipped with an eco:efficiency mode which significantly reduces energy consumption without compromising performance.

\*Basis for calculation: using the machine for 4 h per day, 260 days per year and with an electricity price (11/2024 in Germany) of €0.268 per kWh.

Boasting an even higher percentage of recycled materials at an impressive **60%**, the T 11/1 Re!Plast sets the standard for eco-friendly vacuuming. Named perfectly to reflect the sustainable design focus, the “Re” stands for “recycled” whilst “Plast” “plastic”.

With traditionally fixed cords, a machine often needs to be replaced if the cord is damaged or the cord has to be replaced by a service technician. Whereas the plugable cable of the T 11/1 Adv allows separate replacement and continued use of the device, thus **reducing electronic waste** as well as extending the lifespan of products.

Additionally, detachable cords offer convenience and flexibility. It's easy to switch between cords of different lengths or types, adapting to specific needs and reducing unnecessary cable clutter. This versatility promotes efficiency and eliminates the need for multiple devices or adapters, further **reducing resource consumption**.

\*With no plastic coating for future recycling!

# CUSTOMER TESTIMONIALS

“THE PARKING POSITION IS BRILLIANT! EASY TO STORE, AND IT SAVES SPACE. WHY DIDN'T ANYONE THINK OF THIS BEFORE?”

“IT'S VERY GOOD THAT IT'S MADE WITH RECYCLED PLASTICS. THAT'S IMPORTANT TO ME AND MY CUSTOMERS.”

“HOW QUIET!”

“THE MODULARITY IS A COOL FEATURE WHEN CUSTOMERS NEED BOTH VERSIONS AND REQUEST FLEXIBILITY.”

“THE NEW SHAPE IS MORE ERGONOMIC AND QUIET OPERATION ARE BIG SELLING POINTS TO DAYTIME CLEANERS.”

“THE PARKING POSITION IS A REAL GAME CHANGER. FIND THE PROBLEM AND SOLVE IT, IT'S AS SIMPLE AS THAT.”
