Investing in the right sweeper and scrubber dryer saves time, money, machine life, and maintains a safe work environment.

# MAXIMUM RESULTS, MINIMAL MESS.

Developing the ideal cleaning routine for clean, debris-free floors can help keep your facilities in top condition, protect the health of staff and offer a more long-term, cost-effective solution.

By investing more in preventative and daily cleaning, you can reduce your cleaning costs by at **least 10%**

## Did you know...

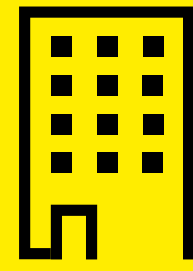

**94%**

of the accumulated dirt enters a building via machines or foot traffic.

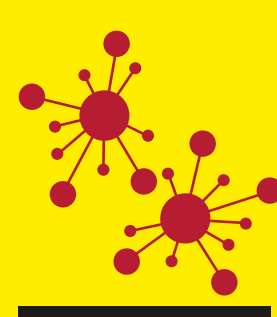

**16 kg**

of dirt enters a building each month for every 1,000 people that enter.

**70%**

By daily sweeping of exterior areas you can avoid 70% of dirt entering a building.

Sweepers reduce fine dust particles caused by smoke, hair, bacteria and building dust. Tackling particles sizes up to 1,000µm

**~£1,200**

It costs £1,200 to remove 1kg of dirt from a building.

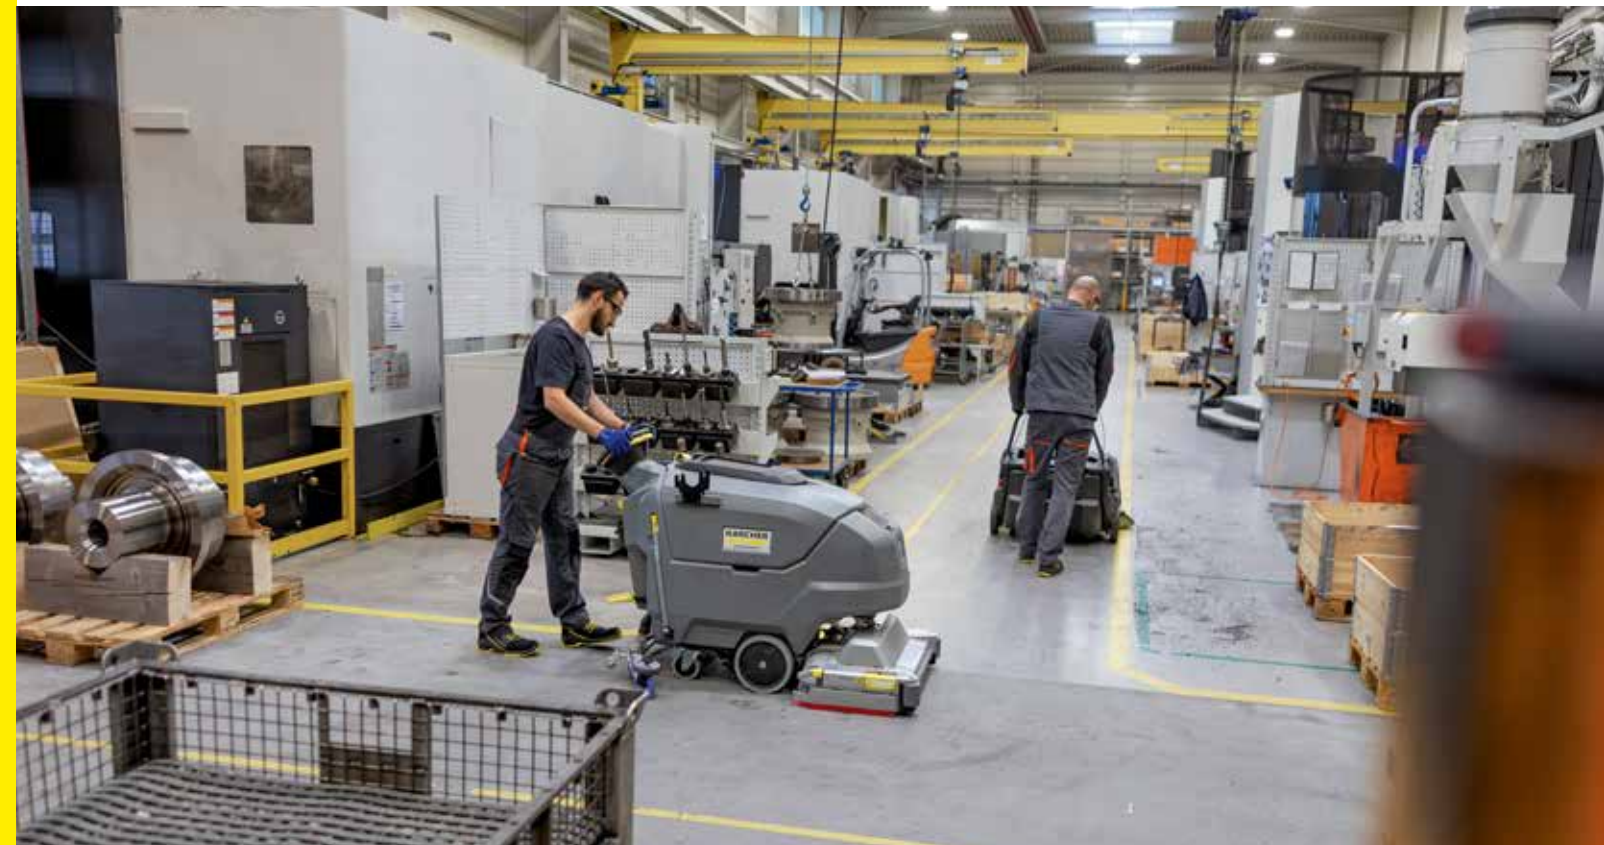

**120 GRIT**

Dirt is abrasive and can damage floors, with an impact similar to 120 grit sandpaper.

Statistics sourced from ISSA (International Sanitary Supply Association)

# BEST RESULTS.

When professionally cleaning a floor area, you should always use a sweeper before a scrubber dryer because it improves the quality of the clean and the longevity of the equipment.

## FIRST SWEEP

### SWEEPER

Sweeping first ensures the scrubber dryer can do its job effectively, resulting in a superior clean in small or large areas quickly. High accumulations of fine dust and coarse dirt can be removed effectively both inside and outside, providing an optimal clean and safeguarding your investment.

- **Reduce dust generation** and improve well-being of staff
- **Higher productivity** - up to **44x** faster than manual sweeping
- **Lower costs** with an affordable purchase price, low maintenance, repair and cleaning costs
- **Reduces risk of sludge and blockage** for the scrubber dryer
- **Fewer deep cleans** required.

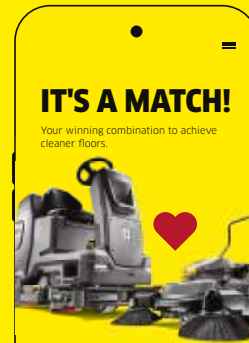

## THEN SCRUB

### SCRUBBER DRYER

Using a scrubber dryer delivers top cleaning results and reduces workload to deliver efficient cost effective solutions. The brushes allow the machine to carry out a deep clean and dry almost instantly thanks to a vacuum system. Versatile enough to be used on a wide range of hard floor surfaces, including tile, vinyl, concrete, and sealed wood.

- **Improved efficiency and speed** by cleaning and drying a large area in a single pass
- **Enhanced safety** due to fast drying, which drastically reduces the risk of slips and falls, responsible for 90% of accidents resulting in broken bones
- **Increased hygiene** by removing dirty water rather than reusing it to prevent the spread of germs and bacteria
- Designed to be **eco-friendly** by using less water and cleaning agents.

# PRODUCT RANGE OVERVIEW.

Your winning combination to achieve cleaner floors.

## SMALL AREAS

### PUSH SWEEPERS

Manual sweepers are always ready for action to sweep small areas efficiently. Ideal for indoor spaces and outside areas - push sweepers are lightweight, ergonomic and easy to transport.

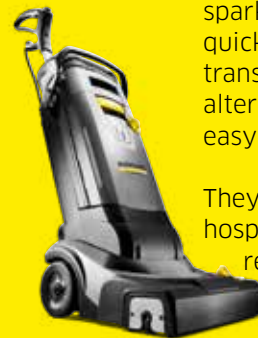

Recommended for small parks, parking areas, pathways, and hospitality. Also suitable for sweeping in agricultural holdings, on farms and in barns.

### COMPACT & SINGLE DISC SCRUBBER DRYERS

For cleaning small areas quickly - these scrubber dryers ensure sparkling clean floors with a quick drying time. Easy to transport, offering a versatile alternative for convenient and easy handling.

They are ideal for use in hospitality environments, restaurants, and small public indoor spaces.

## MEDIUM AREAS

### WALK-BEHIND SWEEPERS

Walk-behind sweepers and sweeper vacuums are ergonomic and easy to use. They sweep thoroughly with low dust development - even in corners, and are ideal for areas from 300 m².

For cleaning production areas, warehouses, car parks and service stations. Also ideal for smaller workshops, and in agricultural settings and school playgrounds.

### WALK-BEHIND SCRUBBER DRYERS

Excellent manoeuvrability, easy handling, robust and hard-wearing. Less machine downtime and higher productivity at lower costs.

Perfect for building sites, public spaces, retail areas or schools and hospitals.

## LARGE AREAS

### RIDE-ON SWEEPERS

Economical and efficient on medium to large floor areas, these machines offer customer-oriented technology as well as easy handling. With a large range available, Kärcher Ride-on sweepers meet all requirements.

Application areas include logistic centers, warehouses, multi-storey car parks, hotel complexes and production areas.

### RIDE-ON SCRUBBER DRYERS

Suitable from 1500 m²: Kärcher ride-on scrubber dryers are the comfortable alternative to large walk-behind machines. Particularly manoeuvrable thanks to their narrow width.

For applications in production, logistics and industrial settings or warehouses.

## EXTRA LARGE AREAS

### INDUSTRIAL SWEEPERS

Largest of all the sweepers, they are designed for the toughest large areas and increased dirt volumes. The award-winning filter system ensures a dust-free environment even in extreme cases.

Recommended for construction sites, processing plants, Iron and steelworks.

### INDUSTRIAL SCRUBBER DRYERS

Designed for the toughest industrial cleaning applications. These machines offer a powerful traction drive and integrated sweeping mechanism to remove the toughest dirt.

Suitable for use in production areas, warehouses, logistics and industrial facilities.

## ACCESSORIES & DETERGENTS

### DETERGENTS

For superior results, Kärcher's patented, highly concentrated detergents are specially formulated to deliver the best possible protection for the operator, machine and environment.

### ROLLER TECHNOLOGY

Structured or pad unstructured coverings available to suit elastic, natural and artificial flooring.

### DISC TECHNOLOGY

Structured or pad unstructured coverings available for deep cleaning, maintenance cleaning, polishing and crystallising.

# YOUR PARTNERS IN SHINE.

Investing in the right sweeper and scrubber dryer saves time, money, machine life, and maintains a safe work environment.

**IT'S A MATCH!**  
Your winning combination to achieve cleaner floors.

## SCENARIO ONE

A warehouse floor is subject to a unique combination of heavy traffic, spills and debris on a daily basis. The combination below considers manoeuvrability around tight aisles and potential obstacles when sweeping. Additionally, a ride-on scrubber dryer effortlessly cleans wide pathways in fewer passes.

KM 70/20 C 2SB

B 110 R Bp Pack 170Ah Dose+R75

## SCENARIO THREE

Distribution warehouses, manufacturing plants and airports have a large floor surface area and require machines with optimal efficiency. Given the sheer scale of these facilities, a ride-on machine is almost always the most efficient choice. They cover a large area much faster than walk-behind models, and their ergonomic design reduces operator fatigue, which is crucial for long cleaning shifts.

KM 130/300 R I Bp

B 260 RI

## SCENARIO TWO

Large outdoor car parks, workshops and reception areas receive high foot traffic and are subject to a variety of debris gathering in corners. Using a robust sweeper capable of removing a high volume of debris ensures optimal efficiency and maximises user time. A compact ride-on scrubber dryer delivers powerful scrubbing action to remove tough, ingrained stains like oil, grease, and tyre marks.
