CLEANWAVE

REVOLUTIONARY
TECHNOLOGY

Unleash the power, without the cord.

Experience the freedom of cordless cleaning. Karcher's CleanWave harnesses innovation to lead the way to a cleaner, greener future with zero emissions. First-of-its-kind, the CleanWave battery-powered professional cold water pressure washer marks a new era of efficiency and flexibility—an innovative cordless solution for heavy-duty cleaning, boasting an impressive runtime of up to 4 hours. It features auto start/stop, pump protection, and extended runtime ECO mode operation at the flip of a switch. CleanWave delivers powerful cleaning performance without compromise.

1 Battery power

- CleanWave Deluxe's lithium-ion battery requires zero maintenance, providing 3,000 charge cycles. Lithium-ion batteries have excellent charge efficiency and low self-discharge.
- Charge time from flat to full in 10 hours (L-ion) with built-in charger.
- Saves approximately \$5,000 in fuel costs annually when compared to gas-powered pressure washer usage against annual cost of electricity* to fully charge the batteries.

2 Flexible controls

- ECO mode extends battery life up to 240 minutes
- Turn-key start

3 Smart features

- Forklift compatible frame
- Direct drive triplex crankshaft pump
- EASY!Force gun with cruise control like technology - uses its own recoil force to hold the trigger down - so, no more sore hands after hours of use

4 Ready to roll

- Mounted on the durable TRK-3500 single-axel trailer
- High-density, polyethylene 200-gallon water tank increases productivity with fewer refills
- Saddle boxes, lighted license plate holder and recessed tail lights
- 1,000 lb. swivel jack with a 2-inch ball coupler for quick and easy hook up of the trailer
- Dual hose reels hold up to 100 ft. of high-pressure hose and quick connects to chassis

*Based on AAA average gas price as of Nov. 2023 in California; Electricity calculated with average kWh utility rate.
