## NO CABLE. NO LIMITS. NO END.

With our battery-operated dry vacuum cleaners  
you are mobile, flexible and independent.

PROFESSIONAL | T 9/1 Bp / BV 5/1 Bp / HV 1/1 Bp

# INDEPENDENT PERFORMANCE. NO COMPROMISE.

You have everything you need with our battery-operated dry vacuum cleaners. Top performance and cleaning quality. All these machines easily compete with comparable mains-operated dry vacuum cleaners. No power cable – it only gets in the way. No more plugging in/unplugging. Our new battery-operated dry vacuum cleaner T 9/1 Bp runs for 24 minutes on one charge and for 46 minutes in eco!efficiency mode. Our backpack vacuum BV 5/1 Bp is unbeatable where space is tight: cinemas, buses, trains and aeroplanes. And our handheld vacuum cleaner HV 1/1 Bp is the powerful and durable all-rounder for tradesmen and service providers.

**BV 5/1 Bp**

**T 9/1 Bp**

**HV 1/1 Bp**

## FULLY CHARGED!

Our BV 5/1 Bp is a battery-powered backpack dry vacuum cleaner which allows you to work with maximum mobility and flexibility and without a cable. Thanks to its high suction power, which is comparable to mains-operated machines, the BV 5/1 Bp has the best cleaning performance on the market. Its patented ergonomic backpack frame offers you a high level of comfort and particularly easy operation because you control all functions directly via the control panel on the hip belt. With the BV 5/1 Bp you are more relaxed when working and save up to 23 percent in time. And you save service costs because cordless machines never have faulty cables.

# BACKPACKERS CAN GO ANYWHERE.

Mains-operated machines reach as far as the end of the cable. Our battery-operated dry vacuum cleaners can go anywhere.

No winding and unwinding. No pulling along. No getting caught. No searching for and constantly changing sockets. No cable, but up to 23 percent time savings with increased productivity. Make things easy for yourself in areas with little space or few or no sockets. The superb comfort of the ergonomic backpack frame will also impress you with long work intervals.

#### Full power requires no cable

Our BV 5/1 Bp offers the best cleaning performance on the market with the innovative 36 Volt battery. And this performance corresponds to the performance of comparable mains-operated dry vacuum cleaners. The only thing you sacrifice is the cable. And you get so much more in return.

#### Easy to use

With the control panel directly on the hip belt our backpack dry vacuum cleaner takes you into a new dimension of ergonomic operation. You control all functions practically from the hips without any work interruptions. And with the battery status indicator you know at any time how much reserve you have left.

#### Save energy and gain time

With battery-operated machines saving energy is twice as useful, for the environment and for a longer service life. In ecoefficiency mode the BV 5/1 Bp works with significantly less energy consumption, thus achieving considerably longer runtimes.

# A FULL CHARGE IS THE KEY TO RELAXED WORKING.

With our powerful battery-operated dry vacuum cleaner T 9/1 Bp there is no difference in performance and cleaning results compared with cable-based dry vacuum cleaners. It offers the best cleaning performance on the market and you will experience this every time you use it. You will be equally impressed by the unobstructed cordless working as well as the superb mobility and flexibility, increased productivity with less effort and up to 23 percent time savings. This makes our T 9/1 Bp the ideal dry vacuum cleaner for building service providers and cleaning tasks in the transport sector, hotel industry and retail trade.

# FREE AND RELAXED IS BETTER.

Battery-operated dry vacuum cleaners protect your employees and customers from tripping up and falling due to cables, especially during daily cleaning in public areas.

No matter how old or how skilled a person is, stooping down to plug and unplug power cables causes stress and strain on the body in the long run. Save yourself and your employees this strain. Instead with our T 9/1 Bp enjoy uncomplicated operation in areas with few or no sockets, be it on stairs, in cinemas, hotel corridors or wherever. And you no longer have to grapple with damage to walls or furniture from pulling the cable along.

## Super powerful and forgetful

Our new BP 750 lithium-ion battery is incredibly powerful and has no “memory effect”, i.e. it doesn't remember how much it was charged. But it does show you on the charge level indicator. In this way you can charge the BP 750 irrespective of its current charging state, without affecting its capacity. With 36 Volt voltage and a capacity of 7.5 Ah, the BP 750 gives you 24 minutes of vacuuming at top performance in Power mode. In eco!efficiency mode there are 46 minutes with added sound reduction. Each time you achieve a top cleaning performance and save time.

## From 0 to 100 in 60 minutes

Our BC 1/7 quick charger lives up to its name. With 290 Watt power instead of the previous 90 Watt, it charges every battery to full capacity in maximum 60 minutes. The BC 1/7 is compatible with batteries up to 36 Volt.

# HANDY, POWERFUL, CORDLESS!

Close to hand, incredibly powerful suction power and impressive endurance: the battery-operated handheld vacuum cleaner HV 1/1 Bp for tradesmen and service providers in building or vehicle cleaning. It has various attachments and is therefore suitable for a multitude of specific cleaning tasks – from furniture cleaning to removing drilling dust during installation work.

# ALWAYS ON THE MOVE AND PERFECT EVERYWHERE.

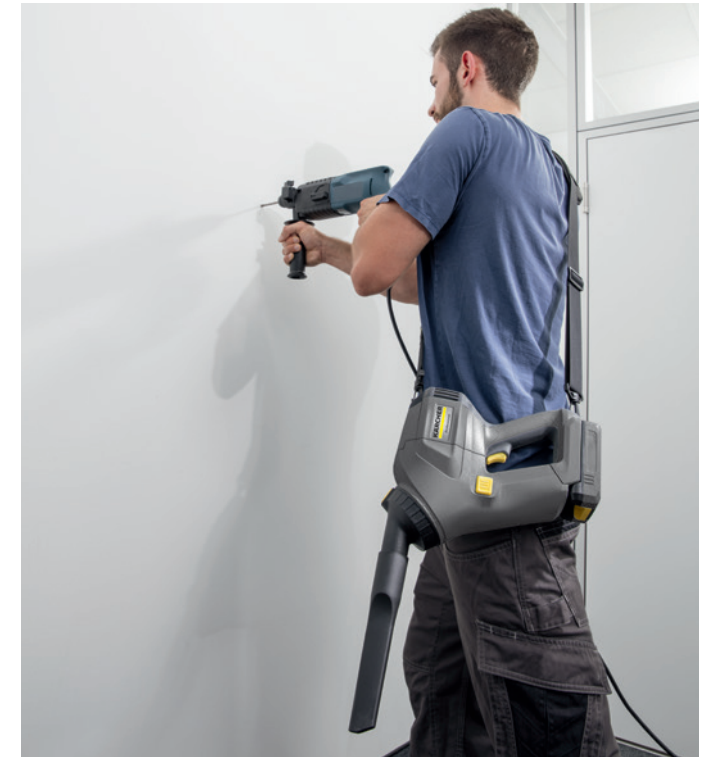

Our HV 1/1 is the battery-operated handheld vacuum cleaner for tradesmen, cleaning service providers and everyone who wants to vacuum flexibly with high suction power.

We analysed precisely which cleaning machine is required by tradesmen and service providers in building or vehicle cleaning: a manageable, powerful and durable battery-operated handheld vacuum cleaner. Our HV 1/1 Bp is compact and light and also has the right accessories for specific applications in order to optimally fulfil all typical cleaning tasks – from the office to the workshop and vehicle cleaning in the car dealership through to assembly work.

With our HV 1/1 Bp you get the best cleaning performance. Its simple handling, the energy-saving eco!efficiency mode and the charge status indicator are the basis for enhanced productivity during cleaning. The battery-operated HV 1/1 Bp spares you from time-consuming tasks such as unwinding and winding up the cable, pulling along the device, looking for a socket and inserting and removing the plug. This reduces your working time by up to 25% and accelerates the cleaning process overall.

#### Clean before the door closes

With our HV 1/1 Bp and the crevice nozzle you remove dirt in the guide rails of elevators in a flash. You can also vacuum the floor in the elevator in no time with the cordless HV 1/1 Bp.
