

# KÄRCHER

makes a difference

**CLEANLINESS IS ALWAYS IN SEASON.**

PROFESSIONAL | HOSPITALITY

## THE BEST-KEPT HOTELS IN TOWN

Sustainable hygiene management is now a standard practice in the hotel and restaurant business. It improves the wellbeing of guests and reflects the self-image of the business. In addition, professional maintenance extends the service life of the facilities. Cost-conscious managers invest in Kärcher cleaning systems because they are economical in use, intuitive in operation and extraordinarily long-lasting.

## **WELCOME YOUR GUESTS WITH CLASS AND STYLE.**

The name Kärcher is a synonym for high performance, quality and innovation worldwide. For cleaning expertise that sets standards. For the hotel and hospitality industry, the Kärcher system offers outstanding solutions for all requirements: perfectly balanced machines, accessories and cleaning agents. Top-performing, efficient and economical thanks to innovative technology, low consumption and durability. Inconspicuous and stylish in classic anthracite. Whisper-quiet.

### 1 The highest standard of cleanliness

The Kärcher microfiber roller is a state-of-the-art accessory. Unbeatable on fine stoneware tiles, it achieves exceptionally good results on all smooth or lightly textured floors.

### 2 eco!efficiency – achieve more with less

Efficiency comes in different dimensions. For example: Reduced energy consumption. High-performance internal-combustion engines. Lower cleaning agent consumption. Highly concentrated cleaning agents, to avoid packaging. Environmental design of machines, while minimising components. Effects which can only be achieved through new ideas and innovative technologies and which, above all, require the will and ability to actually carry them out. Kärcher already offers an extensive range of machines and cleaning agents with the eco!efficiency rating.

### 3 Low operating noise

Thanks to soundproofed motors and optimised flow channels, dry vacuum cleaners from the eco!efficiency range are especially suited for use in noise-sensitive areas or during normal business hours.

### 4 Quality you can see and rely on

Kärcher products are synonymous with quality. See the ergonomics. Feel the power. We are constantly working on optimising the combination of technology, design and operating convenience. Numerous awards bear testimony to the perfection of our products. What is most important to us is the positive feedback from our highly satisfied customers.

# READY TO RECEIVE GUESTS IN STYLE

The first impression counts. This is especially true in the hotel and restaurant business. Cleanliness is the first impression guests have of a hotel. Leading hotels and service providers rely on the world market leader Kärcher for this. From scrubber driers for the foyer to incredibly quiet vacuums for the lobby, Kärcher always has the right cleaning system.

**Professional in every detail**  
Dry vacuums and electric brooms are powerful, compact machines with many practical features.

**During business hours**  
Spray extraction machines are designed to clean carpets and upholstery quickly and thoroughly - also during business hours.

**Effortless sweeping**  
Push sweepers are time-savers when it comes to cleaning small and large areas quickly and thoroughly - plus they are easy on your back.

**Discreet, but thorough**  
Step-on scrubber driers only draw attention due to their easy operation and excellent performance.

**1 Retire your broom and dustpan**

The KM 35/5 battery-operated micro sweeper or cordless EB 30/1 Adv Li-Ion electric broom are ideal for spot cleaning entrances and reception areas. They quickly, quietly and easily pick up loose dirt from hard and carpeted floors, are immediately available when you need them and can be set aside inconspicuously just as easily.

**2 Cost effective and technically brilliant**

Scrubber driers make floors hygienically clean and give them a brilliant shine. With its high surface pressure, roller brush technology is advantageous for textured or jointed surfaces. Machines with proven disc technology are suitable for smooth surfaces.

**3 Saving energy has never been so much fun!**

Thanks to an optimised flow system, the T 12/1 ecoefficiency offers the same excellent cleaning performance as the T 12/1 standard version - but with an up to 40% lower power consumption and 5 dB(A) quieter.

**4 Torque conquers dull spots**

Kärcher polishing machines, such as the BDP 43/450 C Adv, generate high torque to produce an especially high-gloss surface. Vacuum extraction of the polishing dust makes the work pleasant and prevents airborne dust formation. This technology also scores top marks for wear and maintenance.

**5 Just spray and vacuum for a clean carpet**

Ideal for heavily soiled carpeting: Spray-extraction cleaners loosen and remove dirt in a single operation. The spray-extraction function of the Puzzi series is ideal for heavy traffic areas which must be quickly restored to dry, accessible condition.

# ONLY THE BEST IS GOOD ENOUGH.

Guests come first. And guests want things clean and quiet – always and everywhere. Cleaning systems for indoor areas must therefore have special characteristics: They must be quiet, easy to transport, ergonomically designed, and usable even in small spaces. These characteristics also make these machines easier to use and more pleasant for the user.

## Endless steam

Kärcher steam cleaner with two-tank system for continuous operation without a cool-down break.

## Top-class maintenance

Whisper-quiet dry vacuum cleaners such as the T 15/1 and T 12/1 ecoefficiency for daily maintenance cleaning.

## Clean large areas thoroughly

Dual-motor upright vacuum cleaners with generous working widths clean even large areas in almost no time.

## For carpeted areas up to XXL

Automatic carpet cleaners for thorough, deep carpet cleaning or interim cleaning with encapsulation technology.

### 1 Tip-top carpet appearance

Upright vacuum cleaners such as the CV 38/2 combine suction with the power of an electrically driven brush. The effect: The pile is raised to allow the vacuum to remove dirt from deep within the pile. The indicator lamp shows the user when the roller brush setting needs to be adjusted to obtain the best cleaning results.

### 2 Because less is more – everything is as it should be

The T 12/1 ecoefficiency vacuum cleaner can be operated with or without filter bag. It features a versatile and highly efficient filter system. After all, cleanliness matters, but so does hygiene. And the antistatic Irgastat bend ensures full suction power for effortless vacuuming.

### 3 Suction tube with extra long hose

The brush vacuum for all surfaces – the CV 60/2 RS is a true all-rounder, as it automatically adjusts itself to every floor covering. From hard floors to carpet and vice versa – no manual adjustments are required. The stand-on vacuum is easy to use and extremely manoeuvrable. With contra-rotating roller brushes, side brushes, suction tube and optional HEPA filter. The on-board practical accessory kit for cleaning hard-to-reach areas, as well as other accessories and charger are easy to reach at all times.

### 4 The classic solution for edges and corners

This telescopic manual vacuum tube reaches places the brush can not reach. Overhead cleaning is made easy thanks to the flexible suction hose.

### 5 Take large areas in stride

Automatic carpet cleaners in the BRC series combine spray extraction with the mechanical action of roller brushes. With the matching detergents they are ideal for interim cleaning and deep cleaning of large areas.

### 6 The upholstery master

Puzzi spray-extraction cleaners excel in upholstery cleaning with unbeatable extraction performance for extremely short drying times.

### 7 Remove lime and dirt without chemicals

Steam cleaners loosen stubborn lime and dirt in bathrooms without cleaning agents, and their ingenious two-tank system eliminates waiting times for water heating. The VapoHydro function allows for the spray jet to be adjusted continuously from hot water to steam.

### 8 Tackle difficult vacuuming jobs

With its ergonomic strap system, the BV 5/1 backpack vacuum can be carried comfortably on the user's back – ideal for cleaning, e.g. staircases or between narrow rows of seats. Also available as a battery-operated vacuum for even greater flexibility.

# PURE RELAXATION

Cleanliness and hygiene have top priority in swimming pool and sauna areas. Without compromise. Kärcher cleaning systems are ideal for cleaning in wellness areas to remove coarse and fine dirt, dissolve limescale and to disinfect. Areas are left not only looking clean, but also being properly hygienic.

## Big in small places

Compact scrubber driers deliver top performances in small places – in spas as well as fitness rooms.

## Hygiene with high pressure

High-pressure cleaners and surface cleaners, with or without suction, do not give germs a chance.

## At the source

Kärcher WPD series water dispensers provide water of an incomparable natural quality.

## The 2-in-1 solution

The AP 100/50 M: a combination of high-pressure cleaner and wet and dry vacuum cleaner.

#### 1 Quick and clean

The compact BR 30/4 C scrubber drier is the first choice for maintaining floor hygiene in sensitive areas, e.g. barefoot areas. Spray, brush and vacuum in one pass, or separately. Fast and spotless.

#### 2 A multitalent for floors

The BR 40/10 C scrubber drier combines many features in a single unit: It scrubs like a single-disc machine, picks up cleaning solution like a wet vacuum, and polishes like a high-speed machine. Thanks to the positioning of its two suction bars, it can vacuum especially close to the edge. In addition, the squeegees pick up cleaning solution in both directions of travel - forwards and backwards.

#### 3 Environmentally friendly hygiene

Steam cleaners provide impeccable hygiene in saunas without using any cleaning agents. A plus for people and the environment (further information on page 13).

#### 4 The multi-talent for mobile use

The AP 100/50 M is a simple and versatile all-in-one solution - suitable for different surfaces. The cleaning fluid can be sprayed on and vacuumed away.

#### 5 Best against thirst

Body fluid lost in perspiration needs to be replaced quickly, preferably with pure water. And preferably right on site. The Kärcher WPD 100 water dispenser provides a constant supply of cold or hot, natural or sparkling water of the purest quality.

#### 6 Unbeatable cleaning performance

Surface cleaners such as the FR 30 ME deliver ten times more area cleaning performance - indispensable efficiency for cleaning large wellness areas hygienically.

#### 7 Forewarned is forearmed

The NT 70/2 wet and dry vacuum cleaner quickly removes water from floors to avoid a slipping hazard and effectively removes dirt. This powerful vacuum cleaner also removes coarse dirt.

#### 8 Dead zone for bacteria

The Kärcher Inno-Foam kit is a foam system for cleaning and disinfection with a high-pressure cleaner. The disinfecting foam has an especially long adhesion time, which enhances its effectiveness. The dual spray lance is remarkably easy to use, changing between the foam nozzle and the high-pressure nozzle with a flick of the wrist.

# CLEANING ACCORDING TO THE HOUSE RULES

The kitchen is vitally important for the reputation of a restaurant. For official reasons as well, there is no room for doubt that kitchen and restaurant hygiene is the top priority. The Kärcher system offers all the machines, accessories and cleaning agents necessary to maintain stainless steel and other surfaces in clean condition.

## Crumb alert

Handy battery-operated cleaners such as cordless brooms and sweepers effortlessly remove loose dirt.

## Powerful and independent

Battery-operated scrubber driers are mains-independent, immediately ready to use and manoeuvrable. Also available for mains operation.

## Versatile all-rounder

Compact mobile scrubbers such as the BR 40/1000 C for basic and maintenance cleaning of all hard surfaces are ideal for use in small kitchens.

## High pressure in the kitchen

Special high-pressure cleaners with components approved for use with foodstuffs deliver uncompromising hygiene.

### 1 Cordless wet cleaning

The BR 30/4 C Bp cleans up minor messes in no time. With cordless power instead of an annoying cable. There is no risk of tripping or getting caught somewhere. Nevertheless, this scrubber drier has enough endurance for thorough cleaning.

### 2 Even the machine is hygienic

The HD 7/10 CXF high-pressure cleaner is specifically designed for commercial kitchens. It has a food-grade high-pressure hose and abrasion-resistant grey wheels that leave no tracks. Together with the FR 30 ME surface cleaner, it is simply indispensable in a top-rank restaurant.

### 3 For tough jobs

The NT 65/2 Ap is a high-performance, twin motor wet and dry vacuum for professional use. The flat pleated filter is efficiently cleaned by blasts of air for virtually constant suction power.

### 4 The lowest profile in its class

The BRS 40/1000 C scrubber is an all-round machine for all hard surfaces. Thanks to its extremely low-profile construction, it can also reach under shelves – an important factor for kitchen hygiene.

### 5 Putting on the pressure

It takes the concentrated force of a hot-water jet or steam jet to remove stubborn baked-on dirt. Tackle the job with Kärcher accessories for steam cleaners, including the detail nozzle, brass bristle brushes, and a cleaning cloth set. Kärcher SGV\* and SG 4/4\*\* steam cleaners kill 99,999% bacteria without chemicals.

\* Accordant to prEN 16615, PVC floor, machine: SGV (floor nozzle with slats, 30 cm/sec., max. steam pressure, min. VapoHydro) Test-germ: Enterococcus hirae ATCC 10541

\*\* Accordant to prEN 16615, PVC floor, machine: SG 4/4 (floor nozzle, 30 cm/sec., 1. steam, 2. steam vacuum, level 3) Test-germ: Enterococcus hirae ATCC 10541

# OUTDOOR FACILITIES – YOUR CALLING CARD AT THE ENTRANCE

The anticipatory pleasure of a good meal or a wellness weekend reaches its climax immediately before the entrance. This expectation can be further enhanced by a well maintained outdoor area. This advantage should be exploited to the full – in the car park as well as the forecourt area, and in the underground car park, walkways and pool area. You can do this systematically with the Kärcher system: perfectly coordinated machines, accessories and cleaning agents.

**Absolutely indispensable**  
High-pressure cleaners are indispensable in many areas, including façade cleaning, vehicle maintenance and floor or surface cleaning.

**Swift brooms**  
Compact push and walk behind sweepers complete sweeping tasks in a fraction of the usual time and are considerably more cost effective than a normal broom.

**Broad areas**  
Ride-on sweepers are the solution for large-area sweeping tasks – on car parks as well as golf course paths.

**Ready for big jobs**  
Ride-on scrubber driers for extremely severe conditions and long working hours. Your first choice for underground and above-ground car parks, as well as loading areas.

**1 Progress made simple**

Kärcher compact ride-on sweepers combine superior ease of use with high area performance and effective automatic filter cleaning. The adjustable seat position, tilting steering wheel and oversized wheels underline their aim to fulfil contemporary expectations for ease of use.

**2 Can we make that easier?**

The compact and extremely manoeuvrable KM 75/40 W makes child's play of thorough cleaning of small to medium-sized surfaces. Traction drive replaces brute strength, while effective vacuuming delivers cleanliness without a cloud of dust. Available with a choice of a powerful petrol engine or an especially quiet battery-powered version also for indoor use, with an antistatic carpet sweeping kit available as an option.

**3 High-pressure surface cleaning**

The FR 30 surface cleaner masterfully transforms the power of a Kärcher high-pressure cleaner into surface cleaning performance. The version with a plastic housing is especially easy to use, both outdoors and indoors.

**4 Right on track**

With their large surfaces, coarse and stubborn dirt and steep ramps, multi-level car parks often impose special demands on scrubber driers. The Kärcher B 150 R is ideally suited for the task, with its robust steel frame for use under severe conditions on surfaces with slopes up to 15%. The large water tank and powerful battery enable for long periods of continuous operation.

**5 High frequency cleaning made easy**

The innovative cordless KM 35/5 C is a fast, effective and comfortable alternative to conventional sweeping. Thanks to the cleverly placed roller brush, it delivers impressive performance right to the edge. A powerful lithium-ion battery eliminates the need for an annoying cable. The foot-operated power switch is especially convenient.

# THE KÄRCHER SYSTEM

Kärcher's development into a system provider follows the principle of achieving more together. In the company itself, as with suppliers and particularly with end users, solutions that benefit all parties are sought together. For innovative products and services that are combined to create an optimised system: the Kärcher System. Crucially, by using the Kärcher system, the most important – and ideally all – requirements and needs of the customer are completely fulfilled.

As a system supplier, Kärcher does not want to offer anything and everything, but only what operators need for their individual cleaning system. It is not the available range that is decisive, but the actual demand. It is important to have an answer to all questions relating to performance, efficiency and sustainability. A system that consists of machines, accessories, cleaning agents, services and digital solutions that can be easily integrated into operating procedures and adds value. A system that makes a difference: the Kärcher System.
