makes a difference

## EFFECTIVE. ECONOMICAL. ECO-FRIENDLY.

Complete cleaning solutions for agriculture

**PROFESSIONAL |** AGRICULTURE | CLEANING AGENTS

# BIOSAFETY AND CARE

Whether in livestock farming, arable farming or winegrowing, in forestry and everywhere else in agricultural holdings: efficiency and economy. cleanliness and hygiene, functionality and quality are the key to business success. Investments must be right, as the room for manoeuvre is tight. Furthermore, maximum biosafety and care are the essential preconditions for protecting the health of the animals, the value of the machines, systems, sheds and buildings, and thus for safeguarding one's own income. To achieve these objectives, Kärcher offers a whole range of easy-to-use, robust, reliable, economical and eco-friendly cleaning solutions and cleaning agents that are precisely adapted to the needs of farmers.

## **SOAKING AGENT RM 92 AGRI**

It may be true that pre-cleaning very dirty sheds, stall equipment and milking parlours before the actual cleaning creates an additional work step. But it is a work step that reduces the subsequent cleaning time and the necessary water consumption to such an extent that it's doubly worthwhile. The soaking agent has excellent greasedissolving properties and also removes dried organic dirt such as excrement and leftover animal feed without problem. At the same time, thanks to corrosion inhibitors, the stall equipment is not corroded, there is no adverse effect on the manure, and use is unproblematic even in biogas facilities. The product is fully bio-degradable and, of course, optimally suited to subsequent cleaning with our alkaline Agri PressurePro Foam Cleaner RM 91.

Contents:		Type of	cleaning:		Pri	mary mi>	kture:	Dosage:		Soilir	ıg:		Yield:

## **FOAM CLEANER RM 91 AGRI**

In poultry, pig and cattle sheds, as well as in milking parlours, at milking carousels and milking robots, maximum biosafety and hygiene are the basic preconditions for animal health, and thus also for product quality and economic success. Our alkaline foam cleaner penetrates deep into dried dirt and, thanks to its excellent grease-dissolving properties, also effortlessly eliminates organic material such as excrement and leftover animal feed without problem. Here, manure in channels, cellars or biogas facilities is in no way negatively affected. Surfaces and stall equipment are also not subject to corrosive effects. This is ensured by the corrosion inhibitors in the foam cleaner. The cleaner reaches its maximum effectiveness and efficiency after pre-cleaning with the specially adapted PressurePro Soaking Agent, alkaline RM 92 Agri.

Contents:	T	Type of o	cleaning:		Prir	mary mixt	ure:	Dosage:		Soilin	g:		Yield:

## **SURFACE CLEANER RM 93 AGRI**

Our acidic surface cleaner is ideal for milking parlours and carousels, milking robots, milk rooms and stall equipment. Thanks to its greater viscosity, even stubborn inorganic deposits such as lime, minerals, milkstone or rust, as well as dirt on vertical surfaces, are reliably removed. Furthermore, RM 93 can also be used for greasy dirt, and is thus ideal for ongoing maintenance cleaning. Despite its high cleaning power, the cleaner is gentle on typical surface materials such as plastic, (stainless) steel and tiles, and is fully bio-degradable. Also manure in channels, cellars or biogas facilities is in no way negatively affected.

## **ACTIVE CLEANER RM 81 AND RM 41**

Agricultural machinery and vehicles are subjected every day to heavy loads and often adverse conditions. To ensure correct operation and functioning, and also value retention, regular cleaning and care are therefore essential. Our PressurePro Active Cleaner, alkaline RM 81, also removes the most stubborn grease, oil and mineral contamination, without corroding or even damaging the equipment. And this cleaner too is fully bio-degradable.

**PressurePro Hot Wax RM 41:** heavy-duty machines and vehicles, used for example in winter service, or those that are out of operation for lengthy periods, should be protected in advance against external influences with a preservation agent. For this purpose, we recommend our PressurePro Hot Wax RM 41.

Contents:			Prir	mary mixt	ture:	Dosage:		Soilin	g:	Yield:					
10,000 ml		High-pre	essure clea	aners	-			3-5%		stron	g		260 m	2

## HOLIDAY APARTMENT AND FARM SHOP

In order to cushion production and harvest risks, many farmers today prefer to have several commercial footholds and therefore run farm shops or let holiday apartments. For this purpose, Kärcher naturally also offers specially adapted cleaning agents for daily requirements.

**FloorPro Multi Cleaner RM 756:** strongly wetting, allpurpose use, slightly alkaline, very foamy and extremely economical.

**All-purpose Cleaner Tefral:** tenside-free, odourless everyday cleaner, especially suited for use in scrubber driers.

**CarpetPro Cleaner iCapsol RM 768:** cleaning agent with encapsulation technology. Dirt is encapsulated and suctioned during the next maintenance cleaning.

**SurfacePro Alcohol-based Cleaner Alcal:** all-purpose cleaner, very foamy, lightly scented, dries quickly and streak-free.

Contents:	-	Type of c	leaning:		Prir	nary mix	ture:	Dosage:		Soilin	5. 2.		Yield:

**SurfacePro Glass and Surface Cleaner Sural:** ready-to-use glass and surface cleaner, provides fast and streak-free drying and gentle and efficient cleaning.

SanitPro WC Cleaner Tolisan: thick, acidic toilet cleaner, removes lime and urine deposits, deodorising and antibacterial.

SanitPro Maintenance Cleaner Allsan: pleasant longlasting fragrant everyday sanitary cleaner, very foamy, mildly acidic.

**Universal Stain Remover RM 769:** removes oil, tar, shoe polish, adhesives, etc. from solvent-resistant surfaces.

### **CONSUMABLES FOR HOLIDAY APARTMENT AND FARM SHOP**

As the world's leading provider of cleaning technology, we are continuously expanding our range of professional and high-quality manual cleaning tools. The current product range is modular and divided into the areas of wet cleaning, dry cleaning and glass cleaning.

# MINIMUM EFFORT. MAXIMUM BENEFIT.

Reliability and dependability are 2 very decisive factors for a professional production process. Equipment, machines and vehicles must always be in perfect condition and also operate perfectly.

The effective, efficient and versatile cleaning solutions from Kärcher, the extensive range of accessories, and not least frequent innovations such as the time-saving barrel cleaner BC 14/12, support farmers in many respects. Firstly, they ensure maximum biosafety and hygiene. Secondly, they keep plants, machines and vehicles in top condition, ensuring smooth production processes and maintaining the value of investments over many years. Overall, they thus play a decisive role in safeguard-ing income and, at the same time, reducing the necessity of expensive new purchases.
