

Turnable Hose Connection

DSA 1500 / 3000

Turnable Hose Connections are accessories to WOMA high-pressure guns. They are designed to allow the high pressure hose to rotate freely at the connection to the high-pressure gun. Recoil forces of the hose are avoided and the gun work becomes more comfortable and safe.

Special benefits

- Pressurized components made of high-strength stainless steel
- All functional components are protected against the penetration of dirt and splashing water
